miles

### homewards. after Beirut release

Freed British hostage Terry Waite flew home yesterday to an emotional, rain-swept welcome at the Royal Air Force's Lyncham airbase in Wiltshire. The Archbishop of Canterbury's special envoy repeated his belief that the other hostages still in Beirut

would be freed by Christmas. The optimistic forecast was echoed by fellow hostage Thomas Sutherland of the US, as he was reunited in Weisbaden; Germany, with the family he had not seen for more than six years. Page 10

US move criticised Sadako Ogata, UN High Com-missioner for Refugees, criticised the US for sending Haitian boat people back home while moves were under way to find provisional sanctuary for them. White House attacked.

**Anti-pollution pact** European and North American states signed an agreement to cut emissions of volatile organic compounds by 30 per cent. The polluting gases come mainly from motor vehicles. solvents and petrol stations.

Shuttle launch delayed US space agency Nasa called off a shuttle launch shortly before scheduled lift-off because of a fault in with a \$300m military satellite on board. Officials predict a week's delay.

French lorry protest French lorry drivers blocked roads across the country to protest against rising motorway tolls, diesel fuel taxes and insurance costs.

Gelli to stand trial Licio Gelli, former leader of Italy's powerful P-2 masonic lodge, was sent for trial with others allegedly involved in the secret society. He is charged with slandering magistrates investigating the lodge. Fifteen others faces charges including political conspiracy and spying.

Quake halts trains Trains had to stop and an airport closed in Japan after the Tokyo district was shaken by an earthquake measuring 4.9 on the Richter scale. No casu-

alties were reported. Moi sacks minister

Kenyan president Daniel arap Moi sacked energy minister Nicholas Biwott, who was named by a British detective as a prime suspect in the mur-der of foreign minister Robert Ouko 20 months ago. Page 4

Rebuilding plan backed Lebanon's parliament approved plans to help rebuild war-damaged Beirut. The legislation clears the way for the formation of a property company to develop the former commercial district on the "Green Line" battle zone.

Sovjet army change Soldiers entering the Soviet army will be hired on contract from next year as the military begins its transition from a conscripted force to a professional one.

East Timor toll A clandestine opposition move-ment on Indonesian-ruled East Timor issued the names of 30 people it said were killed in

last week's army massacre. Jet pilots missing Two German airforce pilots were feared dead after their Tornado fighter jet crashed

off the Dutch coast. Cuba's instant justice Cuba is cracking down on black marketeers on Havana's seafront. Suspects are being tried near the scenes of their crimes almost immediately after arrest, then jailed for up to a year. The improvised courtroom is a building workers' canteen.

## Japanese growth will slip to 2,5% reports OECD

Japan's economic growth should slow from about 4.5 per cent this year to 2.5 per cent in 1992 largely because of the Bank of Japan's tight monetary policy, according to the

sures should ease, the OECD says in a generally upbeat review of Japan's economic performance. The rate of increase in consumer prices should fall from a forecast 3.2 per cent for 1991 to 2.4 per cent for 1992. Page 20; Benefits of rural life urged, Page 4; Editorial comment, Page 18

UK, reported mounting losses on its domestic mortgage indemnity business. The company made a pre-tax loss of £284m (\$503m) in the nine months to September, compared with a loss of £248m in the same period last year. Page 21; Results, Page 26

Monetary Institute, embryonic central bank planned for the next stage of European Monetary Union, has been voiced by Wim Duisenberg, president of the Netherlands central bank. Page 3

HOECHST began the autumn results season of the German chemical groups by reporting a 22 per slide in pre-tax profits for the first nine months, to DM1.9bn (\$1.2bn). The group held out little hope of an early improvement. Page 21

TDK, Japanese magnetic tape and electronic parts maker, reported a 10.8 per cent fall profit to Y27.7bn (\$214m) to end September, as sales of recording tapes fell slightly and fluctuations in the value 24: Japanese results, Page 24 FOKUS Bank, Norway's third biggest bank, suffered heavy net losses of NKribn (\$158.5m) for the first nine months of

elderly men and women - rescued

from their underground shelter only

Drunken, straggling bands of Serbian reservists, some wearing sunglasses, behave like madmen. One soldier, wearing a white ice hockey helmet and a Yugoslav flag wrapped around his neck, rides by on a child's bicycle.

Suddenly, a group of wild-eyed. reservists surrounds a silent, bearded man and starts to beat him. Zoran, wearing a green combat helmet, emblazoned with the words: "Vukovar 91", says: "He was in the Croatian Guard until four days ago. Look at him. He does not have bags under his eyes."

A regular Yugoslav army officer tells the reservists to stop. He says: "I cannot stand these volunteers. They

drive through the ruins of the town and expect now to be heroes here." On the Street of the Yugoslav People's Army, houses bear surreal, grisly witness to their address. An embroidered picture hangs on the remnants of a wall. Burned-out trees show how the battles left little alive, except dazed pets which sniff through the rubble. A cat jumps into the

wreck of a Volkswagen Golf. Flames, and stinging black smoke fill a building in the town centre. A Serb fighter, now brandishing a wad of bank notes, claims he took them from a Croat sniper he had shot.

They are bank notes from 1941, printed by the Independent State of Croatia, the Nazi-backed state set up

during the second world war. He claimed that Croat soldiers are now paid in kruna, the money of the Ustashe - the fascist state which killed hundreds of thousands of Serbs, Jews and gypsies. A corpse lies uncovered. The man

was shot in the forehead, his hands still clutch a gun. Wigs pinned on the walls inside a gutted shop and a bullet-ridden sign "Ladies Beauty Parlour" attest to the now lost normality of this town where 50,000 Croats and Serbs lived

before the civil war broke out. On the outskirts of town, shellshocked people pour out of trucks. The army tells them to sign their In one case, four generations have survived the three months of terror. Mrs Marija Sesto, a 41-year-old Serb, clutches Aleksandar, her 18-monthold grandson, while Zorica, her daughter, 21, and her 72-year-old mother stand by.

Marija, a Serb textile worker, said: "We drank rainwater." Her daughter was married to a Croat. The mother-in-law did not want a Serb in the family. So he left. She does not know where he is.

"At night the Croat guards would Continued, Page 20

# Wall Street falls again on concern over US outlook

By Patrick Harverson in New York and Peter Norman in London

SHARE prices fell sharply in New York yesterday for the second time in three trading sessions amid growing concern about the outlook for the US economy and the lack of new policy initiatives from the Bush administration. By 2.30pm, the Dow Jones Industrial Average was down

71.56 at 2.901.16, a decline of 2.4 per cent The selling was not confined to blue chips, with the Standard & Poor's 500, the broadest measure of the market, falling 9.60 to 375.64.

The secondary market was hit particularly hard, with biotechnology stocks - the subject of speculative buying all year - again taking the brunt of the selling. The Nasdaq composite index of secondary stocks was down 17.85, or 3.3 per cent, to 521.58 by 2.30pm. The weakness in share prices also fed through into the dollar, which fell another pfen-

nig to DM1.6005 in New York. The latest sell-off, which wiped out all of Monday's gains and took the total losses on the Dow in the last two and a haif trading days to more than 150 points, was not triggered by any specific news. Overnight and early morning losses in Tokyo and Lon-

don, however, unnerved New York traders who had hoped foreign markets would hold their ground in the wake of Wall Street's rally on Monday. In London, the British gov-

ernment's economic room for manoeuvre narrowed dramatically as a weak pound and falling share prices posed new threats to an already besitant out that Monday's 30-point

recovery from recession. The currency and equity markets brushed aside official figures showing an end to the recession in the third quarter as fears grew that the next move in UK interest rates would be upwards.

On Wall Street, dealers attributed some of the selling yesterday to comments from Mr Michael Boskin, chief economic adviser to President George Bush, who said his office would reduce its 1992 economic forecasts because fourth-quarter domestic growth was going to be weaker than originally

The market was also troubled by reports that the Bush administration has decided to delay until next year the introduction of any new policies to deal with the stalled economic

The assertion by Mr Bush that his most immediate task was to ensure his message about the economy got across more clearly, rather than to find new initiatives to spur growth, was said further to have undermined investor confidence in the government's ability to tackle the country's economic problems.
Yesterday's decline also

reflected attempts by securities firms and specialist market-

makers to sell unwanted stock bought during Friday's 120point collapse. Some analysts also pointed

raily in the Dow was partly an illusion; the bulk of the gains were said to have reflected mark-ups in share prices by dealers rather than concentrated buying. In London, the FTSE-100

index closed 39.8 points lower at 2,463.1 after having been some 52.5 points lower at one The pound closed down 0.25 pfennigs at DM2.8750 in London at around its lowest levels

against the D-mark for 11 months and only 2 pfennigs above its effective floor in the exchange rate mechanism of the European Monetary System. It registered a modest gain of 0.6 cents against a weak dollar to close in London at \$1.7965.

With the pound firmly established as the weakest currency in the ERM, Mr Norman Lamont, chancellor of the exchequer, stressed the British government would do whatever was necessary to maintain sterling within its 6 per cent fluctuation margins. "That has been our policy

and remains our policy and we wouldn't flinch from what was necessary," he told reporters.
The Bank of England, meanwhile, was understood to have been intervening modestly to support the UK currency.

Mr Yeltsin is believed to have played a key role His appointment, announced in Mr Shevardnadze's appointby Mr Mikhail Gorbachev, the Soviet president, and approved by Mr Boris Yeltsin, president

Mr Shevardnadze's acceptance of the job is both a brave gamble and a logical decision Having discovered the lack of promise in opposition politics - until recently he said his most important task was to nurture the Democratic Reform Movement which he helped set up - Mr Shevard-nadze evidently believes his experience can best be used to

salvage some form of Soviet foreign policy for a disintegra-ting nuclear superpower. What remains of the centre is trying to implement wideranging arms control treaties, preserve control of its nuclear weapons and of its army, and co-ordinate the search for west-

ern economic aid. Mr Shevardnadze said he believed it was still possible to salvage some kind of union after an agreement by six of the 12 republics to pursue a new-look union treaty for a confederation of sovereign

Mr Pankin, 60, an early and outspoken opponent of the coup when ambassador to Prague, suddenly found him-self catapulted into the top dip-lomatic job and coped with his new task as well as he could.

Moves on foreign aid, Page 2

## KLM and BA find models for their possible merger

By Charles Leadbeater in London and Ronald van de Krol in Amsterdam

BRITISH AIRWAYS and KLM, the Dutch airline, are discussing a possible merger which could be modelled on the Anglo-Dutch groups Unilever and Shell

The merger would create an airline with a market capitalisation of more than £2.2bn (\$3.9bn) which would overshadow the European industry.
Under the plan, the two airlines would remain legally separate entities and retain separate stock market quotations under these models. This maintenance of the national companies might help to overcome political opposition to a merger, as well as overcoming

However, the two companies would be able to manage their airline fleets, computer systems and staff jointly to reap economies of scale. By retaining national companies, but merging their operations, the two companies would reduce the risk that cru-

cial route licences granted to

them on a bilateral country to

regulatory obstacles.

country basis would be revoked. If BA simply took control of KLM, it is unlikely that aviation regulators would allow a British airline to take over the Dutch airline's international routes.

Significantly, Sir Michael Angus, the British joint chair-man of Unilever, is also BA's deputy chairman. Sir Michael is thought to be playing an influential role in the merger talks with KLM, which were disclosed a month ago. The new airline would be

more than twice the size of its

nearest competitor - Lufthansa, the German group. A merger would match Delta, the third largest US air-line although it would still be significantly smaller than the largest US companies, American Airlines and United Airlines, which are expanding their European operations.

A deal could become a crucial test of the balance of

power within the European

Commission over the balance

between deregulation to make

markets more competitive and industrial policies to promote European companies large enough to compete with the mighty US airlines.
Neither KLM nor BA would

comment upon a claim made by the Dutch transport union FNV, that BA was on the verge of taking a 60 per cent stake in a merged airline, with KLM holding a majority of the

After three hours of talks between the union and KLM, both airlines denied that a letter of intent on a merger was due to be signed yesterday in London. Other Dutch transport unions criticised the FNV's claim as alarmist. Under the Shell model, which analysts believe might prove more attractive, BA and

KLM would jointly own a hold-

ing company which would own

and manage the aircraft fleet and staff. This holding com-pany would pay dividends to the national parent companies.

BA going Dutch, Page 21

By Judy Dempsey, East Europe Correspondent

LEADERS of Yugoslavia's republic of Bosnia-Hercegovina yesterday appealed for the United Nations to send an international peace-keeping force to the region as soon as possible to stop the civil war spreading from Croatia. Mr Rusmir Mahmutcehajic,

deputy prime minister of Bosnia-Hercegovina, said that several villages along the republic's coast, including the hamlet of Rayno, 15km north of Dubrovnik, had already been destroyed by army reservists from the neighbouring republic of Montenegro, which has supported Serbia.

Bosnia has an ethnically mixed population of 4.3m, with Moslems making up 43 per cent, Serbs 33 per cent and Croats 17 per cent.

"About 600 Croats lived in Rayno," said Mr Mahmutcehajic. "The village was razed ear-lier this month. You have no idea about the scale of the evil taking place. All the inhabitants were killed. There is fighting and looting in other parts of the country. Over 3,000 refugees have fled to Sarajevo [the capital of Bosnia-Hercego-

He said the republic was "facing destruction and killing," adding that "UN peacekeeping troops should be located on all the republic's borders. This is the only way to stop the war from spreading." He added that he believed the Serb-dominated federal army, backed by Serb and Montenegrin reservists, and supported by Serbia's politicians, were deliberately using Bosnia as a base from which to attack Croatia. "Some of the bombardments

of Dubrovnik, which were carried out by Montenegrin reservists, were launched from inside Bosnia. We are now vulnerable to attacks from Croa-

"You can see the strategy of the federal army and Serbia's politicians unfolding. They want to draw us into the war, split this republic, and then create a new, Serb-dominated rump Yugoslavia," he said. Bosnia-Hercegovina has

refused to be drawn into the conflict. But the fragile relationship between the three eth-nic groups has been severely strained since the Serbian Democratic Party of Bosnia, led by Mr Radovan Karadzic, openly sided with President Slobodan Milosevic of Serbia and declared autonomy for Serb-inhabited regions in Bosnia over the past few weeks.

Meanwhile, Serbia is tightening its grip over the ethnic Albanians in its southern province of Kosovo. Mr Ibrahim Rugova, president of the opposition Democratic League of Kosovo (LDK), reported that several of its members were arrested recently, and scores of workers sacked or evicted from their homes for using their

Albanian language. Mr Rugova said he would ask the United Nations, the European Community and the US "to do everything in their power to demilitarise Kosovo". He said: "We ask that the army and the Serbian police be withdrawn from Kosovo."

EUROPEAN commissioners will be asked today to approve the French government's FFr2bn (\$350m) capital injection for Air France, the state

Mr Karel Van Miert, the

transport commissioner, began an informal inquiry into the matter in July and a formal investigation was started in September. Today's debate in Commission could pit Mr Van Miert, who will ask for the capital injection to be waved through, against Sir Leon Brit-tan, competition commissioner. State aid is normally handled by Sir Leon, who takes a strong line against subsidies for state-owned companies, but for historical reasons government aid to airlines is part of Mr Van Miert's portfolio. Mr Van Miert's recommenda-

tion will not touch on the decision last July by Banque Nationale de Paris, state-owned bank, to take a FFr1bn stake in Air France, Both the government injection and the BNP stake are part of a three-year plan by Air France to raise FFr5bn of fresh capital to keep its debts in line. In July, the transport com-

missioner said he could see no reason for an inquiry into whether the French govern-ment was behind the BNP purchase. That appeared to put him at odds with Sir Leon, who had just announced an inquiry into a similar case involving Crédit Lyonnais, another French state-owned bank, and steel-maker Usinor Sacilor.

commitment last month from the 12 newly assertive republics to honour vival was to promise one thing and do another, whether in fulfilling a five-

Back in Moscow this week, the same G7 deputies found the republics had not only made no progress in putting together a mechanism to implement their promise. Some even declared that their signature on last month's documents had not been for

No-nonsense men like Mr David Mulford, US Treasury under-secretary for international affairs, suddenly

behaviour were not applicable. So the G7, engaging in a crash course in Soviet behaviour, found themselves forced to use ultimatum tactics - just like some old party boss would have told a collective farm manager to get his harvest together or face expulsion from the party.

But despite an ultimatum to come up with a credible mechanism for jointly servicing the debts so that the G7 could put their financial aid package into effect, the republics' prime ministers had yesterday only reached

"If they do not reach an agreement, this will be a failure for both sides," said one western diplomat. "For the Soviet side it would be crazy to miss this opportunity (for debt release) because time is running out for them. On the G7 side, governments expect the deputy finance ministers to come to an agreement. Bush, Kohl and

everybody expects something to come out of this meeting." Late yesterday afternoon, nine republics said they would hammer out an agreement with the G7, while three others including the Ukraine,

withheld their approval. Mr Vitold Fokin, Ukrainian prime minister, said his proposal for the republics to go away for three or four days to divide up the assets and liabilities of the Soviet Union and then present a united front to the G7 had been rejected by other republics.

It was not clear what the agreement of the nine means in practice and whether the three others will finally come round. There is still a little time to find out: the G7 deputies are due to leave Moscow this afternoon.

## Europeans fight over space plans

By Cilve Cookson, Science Editor, in Munich

ATTEMPTS were being made last night to keep some European Space Agency activities going in the face of Germany's insistence that the agency's main programmes should not proceed to the next stage until they have been reviewed and thrown open to Japanese and Soviet collaboration.

Some of the smaller countries represented at the ESA ministerial meeting in Munich expressed concern yesterday that they might lose out in the clash of interests between Europe's two space glants,

France and Germany. France's priority has been to protect Hermes, the ESA's French-led manned spaceplane, against German demands to hold down its soaring costs. Germany for its part is reluctant to sacrifice Columbus, the German-led European contribution to the US space station. Freedom.

- Britain, only a small participant in European space politics with just 6 per cent share of the ESA's Ecu2.8bn (\$3.5bn)

1991 budget, has been leading move to proceed with the agency's "remote sensing" programme. This involves observing Earth and its environment from space. The main UK interest is in the Polar Plaform, an 8-tonne satellite loaded withearth-monitoring instruments? scheduled for launch in 1998. Italy, on the other hand, is insisting that any agreement

in Munich should protect the Data Relay Satellite in which it has a particular interest. "Everyone is fighting for his pet projects," said one partici-

The only safe prediction last night was that any agreement reached before the 13 ministers leave Munich today will be a short-term compromise. They will have to assemble again next year. Indeed, there is widespread feeling that the four-year interval since the last ministerial meeting was too long and allowed ESA programmes to run out of control Annual meetings are likely to be the rule from now on.

## Finland's EC date

By Robert Taylor in Stockholm

FINLAND WILL decide next February whether to apply for European Community membership, President Mauno Koivisto

said yesterday. Support for entry is growing in the country. In a fortnight, Finland's main trade confederation, SAK, is expected to come out in favour, last weekend,

the opposition Social Democrats urged the centre-right

government to decide soon. The government is carrying out three studies on the likely impact of membership on the economy, the constitution, and defence and foreign policy. These will be published at the turn of the year.

# Fresh doubts over HDTV strategy

By Andrew Hill in Brussels

THE European Commission's endorsement of a more flexible strategy to develop highdefinition television in the EC may not be enough to win the necessary support of broadcasters and satellite operators. . Mr Filippo Maria Pandolfi,

the telecommunications commissioner, told the European parliament late on Monday night that he was prepared to accept several important amendments to the draft HDTV directive. It is not yet clear whether MEPs will support the amended legislation when they vote on the draft this evening in Strasbourg. The measure, if approved. would then go forward for dis-

## Portuguese trade gap widens

By Patrick Blum in Madeira

PORTUGAL'S trade deficit worsened sharply in the first nine months of this year, rising almost 29 per cent against 1990, to Es1,060bn (\$7.5bn).

The deterioration follows a 0.5 per cent fall in the value of exports to Es1,721bn while imports remained strong, rising by 6.3 per cent to Es2,781bn, in spite of governthrough high interest rates. Popular confidence in the economy has encouraged consump-

For example, sales of new cars, mostly imported, have remained high and risen by more than 10 per cent so far this year, in spite of the high

cost of credit. The poor export performance is due to several factors including the effects of the Gulf war and the slowdown of the economies of some of Portugal's major markets in Europe and

The impact of the worsening trade balance, however, is minimised by revenues from tourism - expected to reach a record this year - and remit-

tances from workers abroad.

#### **QUESTIONS ABOUT** DOING BUSINESS IN THE UNITED STATES?

### HERE ARE SOME ANSWERS.

Expanding your business to the United States offers some special challenges. Now, The Principal Financial Group and Princor are producing a series of publications designed to provide information you need to move smoothly into the American workplace.

Guidebook To Pension Planning

 Responsibilities of Corporate Officers and Directors under U.S. Federal Securities Law A Guide To Employee Benefits in The United States

• The United States Workplace — Background Information For Foreign Companies

· How To Select A U.S. Life Insurance Company • The 1990 U.S. Tax Guide

The first book in this series, produced by The Principal Financial Group, Guidebook To Pension Planning, is now available and contains useful information about the practical and legal issues raised by providing a pension for U.S. employees. The first book in the series published by Princor, Responsibilities of Corporate Officers and Direc-

tors under U.S. Federal Securities Laws, provides information on duties and responsibilities under U.S. securities laws of corporate officials who supervise U.S. company operations. The two series provide information that will be useful to any executive relocating to the United States. As part of this series, The Principal Financial Group and Princor will also provide other general information books by various authors which deal with specific topics of interest and concern to-

executives entering the U.S. marketplace. Get the answers you need; contact Corporate Relations Department, Office of International Publications, The Principal Financial Group, 711 High Street, Des Moines, Iowa U.S.A. 50309

Duisenberg: No supranational powers for fledgling central bank

## UK gives ground on common foreign policy

By David Buchan in Brussels

for the EMI and the eventual

European central bank to be

sited in Amsterdam.

THE BRITISH government now concedes that an element of formal "common action" in EC foreign policy may be tolerable, even desirable, and that minor details of policy actions could be settled by majority vote, a UK official said yesterday.

However, it is determined to fight at next month's Maastricht summit the extension of majority voting in social policy. It is only ready to concede that a few more environmental laws could be

passed by majority verdict.

The EC's badly co-ordinated, and ill-tempered, participation at the Middle East peace conference in Madrid earlier trade gap. this month has apparently helped persuade the UK government that more formal arrangements could be useful in foreign policy.

The Madrid meeting was marked by Mr Abel Matutes, commissioner responsible for Middle East affairs, vainly squabbling to get a chair at the main

#### Irish raise Maastricht abortion issue

By David Gardner in

IRELAND has raised some partners by asking for a protocol to be attached to the political union treaty at Maastricht next month, specifying that none of its provisions would allow abortion, which the Irish constitution proscribes.

Irish officials in Brussels described the request as "an insurance policy" against constitutional challenge when the treaty - if it is agreed at the Maastricht summit put to referendum in Ireland. When the Single European Act was being ratified, claims that it compromised Ireland's neutrality delayed Irish assent for some six months.

participation in the Middle None the less, some officials in Brussels regard the move as a ploy by Mr Charles payments. This might, in the British Haughey's hard-pressed view, have settled Mr Matutes' proper place at the conference Fianna Fail administration, table, and also prevented riven by a spate of scandals various EC ministers speaking and challenges to with less than a united voice. Haughey's leadership.

### Witness fails to show at EC fraud inquiry By Tim Coone in Dublin

A KEY witness has failed to appear before an inquiry in Dublin into alleged fraud involving EC subsidies at Goodman International, largest beef Europe's

Mr Patrick McGuiness, a former accountant with Goodman was scheduled to testify before the Beef Industry Tribunal all this week regarding allegations he made on television this year against his former employers.

He and others employed by Goodman International have claimed that systematic fraud was carried out at Goodman meatpacking plants, through the forging of documents, the use of bogus grading stamps, and the reboxing of substandard meat, which was then sold into EC intervention stocks and received EC subsidy

As a result of the allegations, a public inquiry was set up last June, but has suffered delays as lawyers acting for Goodman international made appeals through the Dublin High Court and Supreme Court, to try to limit the scope of the inquiry. They have argued that allegations made in a public tribunal would prejudice a fair trial if directors of the company were subsequently charged. The appeals were

The tribunal is expected to continue until the end of the year, and may have serious political implications, as it is expected to investigate allegations of political favouritism and inadequate government supervision of processing procedures for beef sold into EC intervention through the Goodman plants.

Mr McGuiness lives in Canada, and a lawyer acting for him told the tribunal chairman, Mr Liam Hamilton, that "difficulties" had arisen for his client shortly before his departure last Friday "and these must be resolved before he can travel to Dublin to give

Good vintage may freshen up grim year for growers

## French look to Beaujolais Nouveau to rejuvenate sales

By Alice Rawsthom in Paris

AT midnight tonight corks will pop in the bars and brasseries of the Beaujolais region of France as the first bottles of this year's Beautolais Nouveau wine are opened.

The same ritual will be repeated from Berlin to Bangkok as soon as the 1991 Nouveau arrives. The launch of the Beaujolais Nouveau, trumpeted by the familiar flurry of publicity, on the third Thursday of November is now established as one of the most important events in the French wine industry's year industry's year.

This year's launch is more important than usual. So far 1991 has been a grim year for France's vineyards. Sharp frosts in early spring devas-tated the Bordeaux grapes, and Burgundy prices have fallen sharply because of the poor quality of this year's crop. The economic slowdown has taken a toll on demand for fine wines and champagnes. French wine exports fell by nearly 3 per cent to FFr12.5bn (£1.26bn) in

the first half of 1991: the first

fall for 15 years.

Luckily, the 1991 Beaujolals
Nouveau promises to spread a
little light amid the gloom. The
frosty spring may have been
too chilly for the grape growers
of Bordeaux, but the long, hot summer could scarcely have been better for the Beaujolais

The 1991 Nouveau, says the Union Professionelle des Vins du Beaujolais, will be a "deep ruby red with glints of violet", light and fruity to taste, just as it is supposed to be.

The vineyards of Beaujolais badly need a successful season. Historically the region was one of the poorest in France. Its hilly terrain and sandy soil was fit for little but grapes and the product of those grapes was dismissed as a poor man's drink. But the success of Beauiolais Nouveau has transformed the local economy. The vineyards started selling their primeur wines - those drunk little more than a month

nearby Lyons more than 100 years ago. The custom spread to Paris in the 1950s and since the 1960s it has been exported all over the world. The Japanese, who eagerly added Beau-jolais nouveau to their long list of western crazes, are prepared to pay as much as FFr400 (£40.40) for a bottle which would cost FFr60 in a Paris restaurant. The Beaujolais winemakers now depend on Nouveau for a third of the 180m bottles they sell a year, most of it exported.

After decades of growth, the has matured and sales have remained stubbornly stable for the past three or four years. The vineyards clearly hope that the high quality of the 1991 vintage will stimulate sales again.

They won't have long to wait. Most of the 60m bottles of Beaujolais Nouveau sold every year are bought within the first week of its launch.

## Italians face road, air and rail chaos

By Robert Graham in Rome

TRAVELLERS in Italy face disruption after petrol station owners and railway and airport workers called strikes this

Petrol station owners closed down on Monday evening and are to strike until Saturday. Meanwhile the union representing Italian airport workers called an eight-hour stoppage

for Saturday to protest against working conditions. The strike is expected to paralyse air traffic all over the country. And a rebel union of railway workers, dissatisfied with a new contract agreed with the government, has also called a day-long stoppage for Decem-

Motorists faced with life without petrol were advised to avoid revving engines, keep out of low gears and use the car only when absolutely nec-

The shutdown could be prolonged until the following Tuesday unless the petrol station operators obtain satisfaction from the government and the oil companies on a complex range of demands.

Before the protest began there were long queues at petrol stations in major cities but yesterday in Rome there were few users in the normally busy

Some 32,000 of Italy's 34,000 petrol stations are affected by the action, which is aimed mainly at obtaining tax rebates promised, but only partially provided, by the government. The shutdown, however, reflects the changing nature of petrol distribution in Italy where up to a fifth of the stations have become uneco-

nomic. The prospect of 7,000

petrol stations closing has

alarmed the operators.

# On the Pulse of the German Economy

The F.A.Z. Economic Indicator

Frankfurter Allgemeine Zeitung provides Germany's mainstream of top decision-makers with unmatched coverage of political, economic and financial developments - so vital in planning for the future. And F.A.Z. is a reliable source of an array of other services they need to make both business and investment decisions profitably. For example, the F.A.Z. Economic Indicator.

**Monthly Summary of Key Data** 

Published monthly since 1989, the F.A.Z. Economic Indicator is recognized as an essential reference for understanding and forecasting changes in the German economy. A review of previous years – as far back as 1975 – reveals that the method of calculation used to compile the Indicator correctly predicted industrial production. And pointed to major changes well before they occurred.

The F.A.Z. Economic Indicator is derived from six statistical components which themselves predict economic cycles and serve as important indicators of the economy.

F.A.Z. Indices - Monitoring the German Economy

The F.A.Z. Economic Indicator is just one of the many decision-making tools made available by Germany's leading daily and business newspaper. Others include the renowned F.A.Z. Share Index as well as the F.A.Z. Bond Yield Index.

# Zimbabwe close to accord on \$400m IMF loan

By Tony Hawkins in Harare ZIMBABWE is close to an agreement with the International Monetary Fund for a three-year \$400m (£226m) loan to support its structural adjust-

ment programme.
It has applied for the concessional Enhanced Structural Adjustment Facility (ESAF), for which it is now eligible having been downgraded from middle-income to low income status, following the steep devaluation of the Zimbabwe dollar. But because ESAF funds are limited, Zimbabwe may have to settle for the nonconcessional Extended Fund Facility (EFF) or, more probably, a blend of the two

Zimbabwe had hoped to avoid seeking IMF funding but with the marked deterioration of the balance of payments largely as a result of trade liberalisation - it has been forced to turn to the Fund.

The current account external payments deficit is estimated to have doubled this year from \$400m in 1990 to approximately \$900m - more than 10 per cent of gross domestic product. Even with buoyant tobacco prices and a 25 per cent increase in the crop, export earnings will be only modestly higher this year than last. But imports have risen steeply as more than a fifth of total imports are now on open general import licence (OGIL).

Furthermore, the balance of

payments will come under

fresh strain from the suspen-

sion of beef and dairy exports

following a new outbreak of

foot-and-mouth disease and the

need to import \$25m of maize from South Africa. Zimbabwe has been forced to borrow short-term funds abroad pushing up next year's debt-service ratio above 30 per cent from a targeted 20 per

#### **NEWS IN BRIEF**

## Moi sacks minister after murder probe

KENYAN President Daniel arap Moi yesterday sacked Mr Nicholas Biwott, the energy minister, named by a British detective as a "prime suspect" in the murder 20 months ago of foreign minister Robert Ouko, Reuter reports from Nairobi.

State television said that Mr Biwott, a close aide of Mr Moi, had been sacked from the cabinet but gave no further details. Mr Moi's government, under pressure from pro-democracy campaigners at home and aid donors abroad, has been rocked in recent weeks by allegations of high-level corruption emerging from a judicial inquiry into Mr Ouko's murder.

#### Mogadishu gets medical aid

The Red Cross and the French aid organisation Médecins sans capital of Somalia, yesterday for the first time since the latest round of fighting erupted between factions of the United Somali Congress that ousted President Siad Barre last January, Our 1992 fiscal programme because of the failure of the country's Foreign Staff writes. Heavy shelling reverberated around the bombed-out city yesterday as troops loyal to General Mohamed Farah Aideed tightened their control, diplomats said.

#### Thai constitution altered

without having to resign.

Controversial provisions in Thailand's draft contstitution were diluted yesterday as tens of thousands gathered to protest at what they said were military intentions to stay in power after elections next year, Peter Ungphakorn reports from Bangkok. The assembly's amendments committee cut the proposed number of appointed senators from up to 360 - the same as the total of elected lower-house MPs - to 270. Also withdrawn was a clause with the Fund last February to

to allow serving military and civil officials to join the cabinet

Japan's money supply slowdown Japanese money supply grew by just 2.1 per cent in October, compared with that month last year - the lowest figure on

record. Our Foreign Staff writes. The decline reflects the severity of the squeeze on credit imposed over the last two years by the Bank of Japan to suppress inflation and drive speculative fever out of the markets. Money supply growth has fallen from a peak last year of 13.2 per cent.

## Benefits of | Ghost of E Timor starts to haunt Canberra Kevin Brown analyses the events behind a rising tide of public opinion in Australia

HERE HAVE have been angry demonstrations in Canberra and other Australian cities this week as details have slowly emerged of an Indonesian massacre of civilians in Dili, capital of the former Portuguese colony of East Timor.

The demonstrations are aimed at the Indonesian régime of President Suharto, which invaded East Timor in 1975 after the Portuguese with drew in the wake of a demo-

cratic revolution. But they also raise awkward questions about the direction and consistency of Australia's approach to its Asian neighbours, with whom it shares a geographical location and little

Indonesia declared East Timor its 27th province in 1976. ignoring widespread condemnation of the invasion. It has since had little trouble in suppressing the small and badly armed Fretilin independence Jakarta. which

announced an inquiry into the massacre, blames Fretilin for provoking a confrontation between its troops and the mourners at a funeral last

Indonesia admits that at least 19 people were killed, but foreign witnesses say dozens may have died, and Fretilin claims 80 prisoners were machine-gunned three days

The massacre poses a dilemma for Australia, which bas been trying for several years to "enmesh" itself in the Asia/Pacific region, which Canberra once saw as a military and economic threat but now views as an opportunity. In trade terms, the policy has paid dividends - Asia buys more than 55 per cent of Australian exports – and Can-

berra's efforts are now directed

towards tapping future growth in the region. Australia has also increased its role in regional affairs, including helping to negotiate the recent UN settlement in Cambodia and to establish the Asia Pacific Economic

Co-operation (Apec) group.
However, Canberra has
found it difficult to reconcile the robust openness of Austra-lian society with the more restrained cultures of many of its neighbours.

The gulf was illustrated recently by a lengthy row with Malaysia over the television soap opera "Embassy," which deals with the adventures of a group of Australian diplomats in a fictional South East Asian

The programme provoked

strident protests from Dr Mahathir Mohamad, Prime Minister of Malaysia, who was incensed by references in the credits and storylines which he believed were based on historical events in Malaysia. The dispute was eventually. solved by an Australian acknowledgement that offence

tations of Malaysia. But the rapprochement with Dr Mahathir was gained at the

cost of domestic criticism that

had been caused, together with

an assurance that the govern-

ment would dissociate itself in

future from inaccurate presen-

PACIFIC OCEAN

the government had "grov-elled" to a country which does not permit editorial freedom to

its own media. There is also a contrast between Australia's forceful response to anti-democratic activity in other regions and its restrained reaction to similar events close to home. For example, Australia was eager to help defend far-away Kuwait from aggression by a larger neighbour, and was one of the first countries to offer assistance to the US-led allied

forces. Tet Canberra has never sought either military or diplomatic action to remove Indonesia from East Timor, which lies less than 400 km north-east of Darwin across the Timor Sea. Mr Bob Hawke, the Prime Minister, cried when China's Communist leaders smashed the country's pro-democracy movement, but, when told of

the Dili massacre, said it was

to reconcile the 700,000 Timorese to Indonesian control. Senator Gareth Evans, the

Australian Foreign Minister. rejects suggestions that Australia has soft-pedalled on criticism of Indonesia's human rights record and claims Canberra has been a restraining Yet the interests of the Timorese appeared to be far

from the Australian government's mind last year when it concluded a treaty with Indonesia that allows the two countries to develop oil fields in the Timor Sea. The deal was signed by Sena-

tor Evans and Mr Ali Alatas. his Indonesian counterpart and friend, in a Champagne ceremony held on board an aeroplane flying over the oilfields. East Timor was not mentioned. Mr Sabam Siagian, the ebullient former newspaper editor recently appointed Indonesian

ambassador in Canberra, says

Jakarta's relationship with Australia has been strength. ened in recent years by grow. ing trade, now worth around A\$1.5bn (£667m) a year.

The increased trade, together with military co-operation, has done much to reduce tensions which had their roots in the confrontational policies of President Sukarno, who led Indonesia to independence from The Netherlands after World War Two.

Mr Singian even felt able to refer to a series of Indonesian military visits to Canberra as an "invasion" in a recent conversation with Mr Hawke.

The Prime Minister, whose predecessors were kept awake by nightmares of invasion from the north, was sufficiently relaxed to share the joke. The exchange reflects Australia's perception of itself as a role model for Asian countries struggling towards democracy. free speech and respect for human rights.

Nevertheless, there is a great deal of private nervousness in Canberra about Jakarta's likely response if growing public anger forces the government to react more strongly to the events in Dili.

So far. Mr Hawke has not considered cancelling a planned trip to Jakarta next year. But the massacre adds a further complication to an already volatile relationship. It also puts a question mark over Senator Evans' recent claim that "there is every reason to believe that we are on the way to becoming the odd man in [in Asia], rather than

## Foreign funds wary of Delhi reforms

By David Housego In New Delhi

INDIAN officials are revising downwards expectations of a significant increase in foreign investment as a result of the government's new liberalisation programme.

Their disappointment is in line with doubts being expressed by foreign industrialists in New Delhi for a series of investment conferences as to whether India's liberalisation programme is sufficiently radical to attract substantial fresh flows of foreign capital.

"If there is one recommendation to the [Indian] government I have to make, it is to privatise and to create free market conditions as soon as possible in a very large area," said Mr Jürgen Möllemann, the German economics minister

In an implicit criticism of approval under new automatic

Prime Minister Narasimha Rao's defence of cautious change to avoid labour unrest. Mr Möllemann said Germany had privatised 4.000 companies in a year with unemployment in eastern Germany rising to 15-20 per cent.

Most newly announced foreign investment projects have been proposals that were awaiting clearance when the new government came to power in June. The total new foreign equity participation since then is less than \$50m

According to recent government figures, 15 new projects involving a foreign equity capital of Rs 500m (£11.2m) have been licensed since the new government took power: 70 involving fresh foreign equity of Rs800m have received

approval procedures: and two (IBM and Ford) involving a foreign equity of Rs270m have been approved by the newly established foreign investment board which has been set up to clear large projects by multina-

ionals. The board is still considering six other proposals for joint ventures where the foreign partners include Coca Cola, General Electric and General Motors.

Asked at the World Economic Forum meeting in Delhi - where foreign participation was thin - whether he was satisfied with the level of foreign investment, Mr P.Chidambaran, the Minister of Commerce said he was "not unhappy". He added: "I can't

very large amount."

next month he expected 12-15 projects involving large groups which would climb to 25-30 by March. By he said that by then there would also be an additional 100 projects from medium sized foreign groups.

Meanwhile, the government confirmed yesterday that it would allow foreign companies already established in India to raise their equity holding in joint ventures to 51 per cent from an existing celling of 40 per cent, in line with the recent deregulation of foreign investment.

However, companies increasing their equity holding will have to pay market prices for the additional shares. This is likely to deter most foreign groups from taking advantage the move because the believe current share prices

are at a speculative peak.

of services from fund manage ment to insurance. The venture seems to have the full backing of North Korea's hardline leadership. Pyongyang is seeking to widen international trade relations to revive its stagnating econ-

omy and replace crumbling trade with the Soviet Union its main economic partner. Mr Oei Hong Leong, who controls Indonesia's Sinar Mas conglomerate, is using his small Hong Kong company

Ruby Holdings to provide 51 per cent of the new bank's initial capital of \$30m (£16.8m). Mr Oel said the venture was part of a strategy to invest in "overseas markets with substantial growth potential." The Hong Kong stock exchange is less impressed and may demand additional reporting requirements from Ruby.

## Chinese praise for Burma's Nobel laureate

By Yvonne Preston in Beijing

AN OFFICIAL Chinese newspaper has lavished praise on the winner of this year's Nobel peace prize, Ms Aung San Sun Kyl, who is held under house arrest by Burma's military leaders, now among Beijing's closest allies.

The report compares her with Mahatma Gandhi and says she is known in Burma as "the bright light in the dark night, the nation's hope". The description, published in the government-controlled Farmers' Daily, is likely to anger China's Communist leaders, especially given its implied criticism of Beijing. Beijing's suppression of the

pro-democracy movement in

June 1989 matched the Burmese military's onslaught on a similar movement led by Ms Aung San Suu Kyi in Burma. Hundreds of students were killed in Rangoon when soldiers fired on pro-democracy demonstrators in August and

September 1988. Ms Aung San Suu Kyi has been detained since July 1989. Her party won an overwhelming victory in elections in May 1990, but this was nullified by the military junta ruling as the State Law and Order Restoration Council (SLORC).

The Farmers Daily article paints a portrait of her as a selfless, patriotic martyr. The account contrasted with the

brief mention of the Nobel award in the Communist Party-controlled newspaper, People's Daily, which commented that the award of the peace prize was often a matter of con-The paper's detailed report

stemmed from her returning to Burma in 1988 to visit her sick mother when she became caught up in the anti-government student movement. In the years since Burma's military government turned the army on the people, China and Burma have stepped up bilateral relations. Support from China is crucial for the

survival of the isolated SLORC.

said that her present plight

The failed Moscow coup increased China's co-operation with Burma. The SLORC depends on China for military supplies, with planned and fulfilled Chinese weapons ship-ments to date reaching a total value of \$1.4bn. While it is one of China's most significant arms markets, Burma's depen-dence on its northern neighbour extends beyond arms supplies and trade. The Burmese reportedly rely on China for diplomatic advice and for belp in responding to criticism of human rights abuses.

# So far the company has mainly been involved in running Chi-

nese restaurants.

# Israel's Labour party goes down fighting — itself

Hugh Carnegy reports on attempts to rescue a political movement many fear to be in terminal decline

AS ALREADY ANNOUNCED, NOTES OF THE TYPE SHOWN ABOVE CEASE TO BE LEGAL TENDER AFTER 29 NOVEMBER

You are urged to pay any such notes into your bank account or to exchange them for current notes no later than

29 November. After that date they can be exchanged only at the Bank of England.

Labour party, once the great pillar of political power in the country, opened a policy-making convention in Jerusalem yesterday embroiled in a bitter internal dispute over how to rescue the movefrom traditionalists. ment from what many fear A recent opinion poll showed may be terminal decline.

The ironies surrounding the convention are acute. It comes as Israel is embarking on a Middle East peace process in which the Arab world, the US. the Soviet Union, the European Community, and, according to opinion polls, a majority of the Israeli electorate, regard territorial concessions by Israel as a vital ingredient.

Labour has long espoused the "land for peace" formula; the governing Likud party and its right wing allies reject it. Yet it is Labour which is fighting with itself over peace policy, not the government par-ties; and it is Labour which faces tumbling public support. while the right is gaining strength.

A key battleground in the next election, due in November 1992 at the latest, will be the votes of hundreds of thousands of new Soviet Jewish immigrants. With unemployment and economic hardship rife among them, the government should be vulnerable.

But Labour's socialist trap-

pings are deeply antithetical to

T SRAEL'S opposition the vast majority of newcomers. So far, efforts by party reformists to shed its historical baggage, such as its close alliance with the powerful Histadrut trade union federation, have met with stiff resistance

clearly how far Labour's confusing message has alienated voters. Taken just after the Madrid peace conference, the survey showed support for Labour sliding to 22 per cent from the 31.5 per cent it achieved in the 1988 general election. The Likud, meanwhile, which baldly states that Israel can have land, peace and free-market prosperity, had moved up to 37 per cent from 34 per cent.

Some Labour support has leaked to the three smaller left-wing parties, the Citizens Rights Movement, Shinui and Mapam. Nevertheless, when support for them and Labour is added together and matched against the total for Likud and its three far-right satellites, the picture remains the same. Right-wing support has advanced to 46.5 per cent from 42 per cent in 1988, while the left has slumped to 33.5 per cent from 40 per cent.

One move which this week's convention will make to try to break the spiral is to set in train a party-wide process for electing a leader some time

Rivals for party leadership: incumbent Shimon Peres (left) and Yitzhak Rabin

early next year. This will almost certainly boil down to a for premier, is likely to unseat battle between Mr Shimon Peres, the incumbent, and his longtime rival, Mr Yitzhak Rabin, a former prime minister and defence minister. Mr Rabin, the only figure in

Labour who evinces strong

Mr Peres, who consistently polls dismally. But a group of young Labour leaders, dubbed the doves, is insisting that the party must also adopt radical policy reforms this week if it is to have any hope of recovering

public support as a candidate

electorally. Not the least of Labour's dilemmas is that Mr Rabin is the champion of those who are opposing hig changes. The doves want Labour to adopt a more clear-cut peace policy, embracing acceptance of Palestinian self-determination in the occupied West Bank

and Gaza Strip, dropping objec-tions to negotiating with the Palestine Liberation Organisation and accepting territorial concessions to Syria in the Golan Heights. To date, while committed in broad terms to some trading of land for peace, the party has

opposed Palestinian independence and relinquishing control of the Golan. The doves also want to distance Labour from the Histad rut, drop socialist emblems such as the red flag (the sing ing of the Internationale has

already been dropped from this

week's convention) and commit the party to more liberal economic policies. A compromise is likely, leaving Labour not far from its present positions - and having only further confused voters in the process about what it really stands for, In that case, a few MPs may defect to the smaller parties who are already committed to putting

at the next election: This electoral alliance, under Israel's proportional representation system, will probably strengthen its representation in the Knesset from 16 seats at present (out of 120) to at least 14 or 15, making it the third largest party after Liked and Labour. But its gains would almost certainly be at Labour's expense, not the right's.

up a common list of candidates

FINANCIAL TIMES WEDNESDAY NOVEMBER 20 1991

Joe Matsau, Managing Director of the Lesotho Electrical Company, is bringing energy to the villages of his country.

Joe Matsau is bringing

The de-forestation of some parts of Africa has been a matter of survival, not profit. In the mountainous kingdom of Lesotho, generations of villagers have had to live off the land for fuel to cook and heat their homes.

Joe Matsau of the Lesotho Electrical Company has a promising alternative. He is directing a longterm rural electrification programme which will make his country energy self-sufficient.

"The Kingdom in the Sky".

Hydro-electric power is the key, with transmission lines reaching up to over 2,000 meters into the "Kingdom in the Sky", as it is known locally. Village by village, Lesotho is switching dependency from the earth's fragile

resources to the fruits of man's ingenuity.

"We still have a long way to go", says Mr. Matsau, "but the programme would never have seen the light of day without ABB's help - not just their technology, but their skill in identifying crucial aid and loan sources for us."

"The world is changing fast. To catch up, we have to change even faster. And, thanks to ABB, we're doing just that."

A hundred years of expertise in

- Power Generation, Transmission and Distribution
- Industrial Automation Transportation
- Environmental Systems

makes ABB the world leader in electrical engineering.

# IMF blessing is highpoint of Menem's US trip

By John Barham in Buenos Aires

ARGENTINA'S President Carlos Menem arrives back in Buenos Aires today after a successful seven-day visit to the

The high point of the visit came on Monday, when Mr Michel Camdessus, the International Monetary Fund managing director, said Argentina should have a new mediumterm IMF loan in place by

in a glowing endorsement of Mr Menem's policies, Mr Camdessus said: "Inflation has declined sharply, confidence is being restored and economic activity has picked up." He said Argentina should be able to convert its present \$1.04bn one-year standby loan into a three-year extended fund facility loan (EFF) by the end of next March, adding that this would help "the re-establishment of Argentina's relations with the international finan-

cial community". An EFF would enable Argentina to begin restructuring its \$61bn foreign debt, the last important obstacle to economic stability after initiating sweeping free-market reforms in 1989. Mr Menem said negotiations with private banks,

"The IMF was leaned on by the Americans to come up with something for Menem to show for his trip to the US." one diplomat said. However, he conceded that Mr Camdessus has confirmed for the first time that Argentina now stands a good chance of drawing down the first tranche of an expected

which at the end of 1990 were

owed \$35bn, are to begin in

\$3bn EFF loan early in 1992. Although fund officials are encouraged by Argentina's economic reforms, they are critical of Mr Domingo Cavallo, the economy minister, for his failure to meet tax revenue targets set in last July's standby agreement. The EFF is conditional on full compliance with the stand-by loan conditions.

Argentina is expected to overshoot its \$890m primary budget surplus target for the fourth quarter, but thanks to larger than expected privatisation receipts, rather than taxes. The IMF insists that Argentina covers its current spending with current revenues rather than with capital

#### Forty-three killed in Colombian conflict

AT LEAST 43 people have died in a flare-up of Colombia's guerrilla war scarcely a week after the end of peace talks which had offered hope of a breakthrough in the decadesold conflict, Reuter reports from Bogota.

Twenty-seven guerrillas, 12 policemen and four soldiers died in the last two days in rebel ambushes and army operations across the country, officials reported yesterday The Bogota daily El Espectador said that Monday had been one of the bloodiest days of combat between security forces and left-wing guerrillas who have been fighting the

government since the 1950s.

**Each side blamed the other** for the upsurge in violence, which began a week after the government and three rebel groups ended five months of peace talks in neighbouring Venezuela without agreement. The increase in violence could jeopardise an agreement to resume the peace talks by February I next year.

In the worst attack, rebels of the Marxist Colombian Revolutionary Armed Forces ambushed a police patrol returning from an anti-drugs operation in the south-western province of Putumayo, killing 10 policemen.

Home again: Haitian boat people in Port-au-Prince after returning from the US on board a Coast Guard cutter. They were

## White House attacked over Haitian refugees

THE US administration has run into criticism from Congress over its efforts to deter Haitian refugees from seeking asylum in the US by sending them back to their country, writes George Graham in Washington.

Led by senators and congressmen from Florida, where most refugees have tried to land, both Republicans and Democrats have attacked the repatriation plan as inhumane, discriminatory and morally wrong. Republican Senator Connie Mack said US policy allowed refugees from Cuba to enter and become US citizens after one year, and complained that it was unthinkable not to apply the same treatment to Hai-

"This is the worst possible scenario. It is an outrage to send innocent people back to a country led by a violent illegal military dictatorship," he said. The US has picked up nearly 1,800 Haitians who have fled their country since a military coup overthrew President Jean-Bertrand Aristide on September 30. These are mostly being held on Coast Guard vessels or at the US naval

base at Guantanamo, in Cuba. Only around 50 have been accepted for political asylum. The State Department said it did not believe the others would be persecuted on their return to Halti. The flood of Haitian boat people has apparently increased in recent days because of growing economic difficulties faced by the island as a result of the embargo imposed by the US and

American States. The US had tried to find Caribbean countries which would accept Haitian

other members of the Organisation of

refugees in temporary safe havens. On Monday, however, the State Department said the safe haven plan would not be sufficient to deal with the problem, and that the Coast Guard had therefore been directed to repairlate most of the Haitians.

The State Department said it hoped the return of boat people to Haiti would deter others from risking their lives by taking to the sea in unseaworthy boats. But congressional aldes said the action appeared to be prompted mostly by "bureaucratic convenience".

5 On or after 9th June 1992 stock may be exchanged into bonds to bearer which will be available in denominations of £100, £200, £500, £1,000. £5,000, £10,000 and £50,000. Bonds will be free of stamp duty.

6 Stock will be interchangeable with bonds without payment of any fee 7 Interest will be payable half-yearly on 12th January and 12th July Interest will accrue from Thursday. 28th November 1991 and the first interest payment will be made as on 12th July 1992 at the rate of £5 3014 per £100 of the Loan. Warrants for interest on stock will be transmitted by post, income. ray will be deducted from payments of more than £5 per annum. Interest on tioneds to bearer, less income tax, will be paid by coupon.

8 Stock and bonds of this issue and the interest payable thereon will be evernot from all United Kingdom taxation, present or future, so long as it is shown that the stock or bonds are in the beneficial ownership of persons who are neither domiciled not ordinarily resident in the United Kingdom of Great Britain and Northern Ireland

9 Further, the interest payable on stock or bonds of this issue will be e-empt from United hingdom income tax, present or luture, so long as it is shown that the stock or bonds are in the beneficial ownership of persons who are not ordinarily resident in the United Kingdom of Great Britain and

10 For the purposes of the preceding paragraphs, persons are not ordinarily. resident in the United Engdom if they are regarded as not ordinarly resident for the purposes of United Ringdom income lax. 11 Applications for exemption from United Kingdom income tax should, in:

the case of interest on stock, be made in such form as may be required by the Commissioners of Inland Revenue Bearer bond coupons will be paid without deduction of United Kingdom income tax if accompanied by a declaration of awnership in such form as may be required by the Commissioners of Inland Revenue. The appropriate forms may be obtained from the Inspector of Foreign Dividends, Inland Revenue, Lynwood Road, Thames Oitton, Surrey, 1.7.7 ODP. 12 These exemptions will not entitle a person to claim repayment of tax

deducted from interest unless the claim to such repayment is made within the time limit provided for such claims under income (at law, under the provisions of the Taxes Management Act 1970, Section 43 (1), no such claim will be outside this time limit if its made within six years from the data on which the interest is payable. In addition, these examptions will not apply so as to exclude the interest from any computation for taxation purposes of the profits of any trade or business carried on in the United Kingdom Moreover, the allowance of the exemptions is subject to the provisions of any law present or tuture, of the United Kingdom directed to preventing avoidance of (asation by persons domiciled, resident or ordinarily resident in the United Eingdom, and, in particular, the interest will not be exempt from income tal where, under any such provision, it falls to be treated for the purpose of the income Tax Acts as income of any person resident of ordinarily resident in the United Kinadom Method of Application

13 Bids may be made on either a competitive or a non-competitive basis. as set out below, and must be submitted on the application form published with this prospectus. Each application form must comprise either one competitive hid or one non-competitive bid. Separate arrangements have been made under which gilt-edged market makers may make competitive bids by telephone to the Bank of England not later than 10,00 aim on Wednesday, 27th November 1991 14 Application forms must be sent to the Bank of England, New Issues, PO

Box 444. Gloudester, GL1 1NP to arrive not later than 10.00 A.M. ON WEONESDAY, 27TH NOVEMBER 1991, or lodged by hand at the Central Gilts Office, Bank of England, Bank Buildings, 19 Old Jowry, London not later than 10.00 A.M. ON WEDNESDAY, 27TH NOVEMBER 1991, or lodged by hand at any of the Branches or Agencies of the Bank of England not later than 3.30 P.M. ON TUESDAY, 26TH NOVEMBER 1991. Beds will not be revocable between 10 00 a.m. on Wednesday, 27th November

1991 and 10 00 a milion Monday. 2nd December 1991 15. Each bid must be for a minimum amount and in a multiple of the Loan

Multiple Amount of the Loan suched for Competitive bids (minimum £500,000) £500,000-£1,000,000 £10 £1,000,000 £1,000,000 or greater Non-competitive bids (minimum £1,000) £1,000-£10,000 £1,000 £10,000-£50,000 £5,000 £50,000-£500,000 £25,000

16 COMPETITIVE BIDS (i) Each competitive bid must be for one amount and at one price expressed as a multiple of 1/32nd of £1 and must be for a minimum of £500,000

nominal of the Loan (iii) Unless the applicant is a member of the CGO Service, a separate cheque representing the DEPOSIT DUE, i.e. THE PRICE BID LESS £60 FOR EVERY £100 NOMINAL OF THE LOAN BID FOR, must accompany each competitive bid. Chaques must be drawn on a branch or office, situated within the Town Cleaning area, of a settlement member of

CHAPS and Town Clearing Company Limited

(iii) Her Majesty's Treasury reserve the right to reject any competitive bid or part of any competitive bid. Competitive bids will be ranked in descending order of price and allotments will be made to applicants whose

competitive bids are at or above the lowest price at which Her Majesty's freasury decide that any competitive bid should be accepted (the lowest accepted price). APPLICANTS WHOSE COMPETITIVE BIDS ARE ACCEPTED WILL BE ALLOTTED AMOUNTS OF THE LOAN AT THE PRICES WHICH THEY BID: competitive bids which are accepted and which are made at prices above the lowest accepted price will be allotted in full; competitive bids which are accepted and which are made at the lowest accepted price may be allotted in full or in part only.

competitive bids are at or above the lowest price at which Her Majesty's

17 NON-COMPETITIVE BIDS (i) A non-competitive bid must be for not less than £1,000 nominal and not more than £500,000 nominal of the Loan, and must be in one of

the multiples described in paragraph 15 above (ii) Only one non-competitive bid may be submitted for the benefit of any one person. Multiple applications or suspected multiple applications are

Unless the applicant is a member of the CGO Service, a separate cheque representing a DEPOSIT AT THE RATE OF £40 FOR EVERY £100 NOMINAL OF THE LOAN APPLIED FOR must accompany each non-competitive bid, cheques must be drawn on a bank in, and be payable in, the United Kingdom, the Channel Islands or the isle of Man.

(iv) Her Majesty's Treasury reserve the right to reject any non-competitive bid All allotments which are made to non-competitive applicants will be made in full AT A PRICE (the non-competitive allotment price) EQUAL TO THE AVERAGE OF THE PRICES AT WHICH COMPETITIVE BIDS HAVE BEEN ACCEPTED, the average being weighted by reference to the amount accepted at each price and ROUNDED DOWN TO THE NEAREST MULTIPLE OF 1/32ND OF

If the non-competitive allotment price is less than £100 per cent, the amount by which the amount paid as deposit exceeds the non-competitive allotment pace less £60 per cent will be refunded by cheque despatched by post at the risk of the applicant

(vi) If the non-competitive allotment page is greater than £100 per cent applicants whose non-competitive bids are accepted may be required £ 100 for every £ 100 nominal of the Loan allocated to them. An applicant from whom a further deposit is required will be notified by letter by the Bank of England of the amount of the Loan allocated to him and of the further deposit due, but such notification will confer no right on the applicant to transfer the amount of the Loan so allocated. The despatch of allotment letters to applicants from whom a further deposit is required will be delayed until such further deposit has been made

18. Her Majesty's Treasury may allot to applicants less than the full amount of the Loan Any balance of the Loan not allotted to applicants will be allotted it the lowest accepted price to the Governor and Company of the Bank of England, Issue Department

19. Letters of allotment in respect of the amount of the Loan allotted, being the only form in which the Loan (other than amounts held in the CGO Service for the account of members) may be transferred prior to registration, will be despatched by post at the risk of the applicant, but the despatch of any letter of allotment, and any refund of the balance of the amount paid as deposit, may at the discretion of the Bank of England be withheld until the applicant will be cheque has been paid. In the event of such withholding, the applicant will be notified by letter by the Bank of England of the acceptance of his application and of the amount of the Loan allocated to him, subject in each case to the payment of his cheque, but such notification will confer no right on the applicant to transfer the amount of the Loan so allocated

20. No allotment will be made for a less amount than £1,000 of the Loan In the event of partial allotment, the balance of the amount paid as deposit will, when refunded, be remitted by cheque despatched by post at the nsk of the applicant, if no allotment is made the amount paid as deposit will be returned likewise. Payment in hill may be made at any time after allotment. but no discount will be allowed on such payment. Interest may be charged on a day-to-day basis on any overdue amount which may be accepted at a rate equal to the London Inter-Bank Offered Rate for seven day deposits in sterling ("LIBOR") plus 1 per cent per annum. Such rare will be determined by the Bank of England by reference to market quotations, on the due date for such payment, for LIBOR obtained from such source or sources as the Bank of England shall consider appropriate. Default in due payment of amount in respect of the Loan will render the allotment of such amount of the Loan liable to cancellation and any amount previously paid liable to

21 Letters of allotment may be split into denominations of multiples of £100 on written request to the Bank of England, New Issues. Southgate House, Southgate Street, Gloucester, GL1 1 UW received not later than 16th December 1991. Such requests must be signed and must be accompanied by the letters of alloument

22 Subject to the provisions governing membership of the CGO Service, a member of that Service may, by completing Section D of the application form, request that any amount of the Loan allotted to him be credited direct to his account in the CGO on Thursday, 28th November 1991 by means of a member to-member delivery from an account in the name of the Governor and Company of the Bank of England, Now Issues Account. Failure to accept such delivery by the deadline for member to member deliveres under the nules of the CGO Service on 28th November 1991 shall for the purposes of this prospectus constitute default in due payment of the deposit payable in respect of the relevant amount of the Loan. A member of the CGO Service may also, subject to the provisions governing membership of that Sarvice, surrender a partly-paid letter of allotment to the CGO for cancellation and for the amount of the Loan comprised therein to be credited to the member's account. The member who is shown by the accounts of the CGO as being entitled to any amount of the Loan shall, to the exclusion of all persons previously entitled to such amount of the Loan and any person claiming any entitlement thereto, both be treated as entitled to such amount of the Loan as it that member were the holder of a letter of allotment and be liable for the payment of any amount due in respect of such amount of the Loan. A member will be entitled at any time prior to registration to withdraw, in multiples of £100, amounts of the Loan credited to the number's account and to obtain a partly paid letter of allotment composing such arrount of the Loan, and such member shall be liable for the payment of all amounts becoming due thereafter in respect of such amount of the Loan unless and until that letter of allotment is surrendered to the CGO for cancellation as aforesaid.

23 Letters of allotment must be surrendered for registration, accompanied by a completed registration form, when the balance of the purchase money is paid, unless payment in full has been made before the due date, in which case they must be surrendered for registration not later than 18th December [991; such payments must be sent to the Bank of England, New Issues Southgate House, Southgate Street, Gloucester, GL 1 10W Registration of amounts of the Loan held for the acrount of immbers of the CGQ Service. will be elfected under separate arrangements.

24 Until the close of business on 9th June 1992, stock issued in accordance with this prospectus will be known as 9 per cent Conversion Loan, 2011 "B" The interest due on 12th July 1992 will be paid separately on holdings of the existing 9 per cent Conversion Loan, 2011 and on holdings of "B" stock registered at the close of business on 9th June 1992, consequently interest mandates, authorities for income tax exemption and other notifications recorded in respect of holdings of existing stock will not be applied to the payment of interest due on 12th July 1992 on holdings of "B" stock

25. Transfers of 9 per cent Conversion Loan, 2011 1781 may be lodged at the Bank of England for registration in that form up to 5th June 1992. After this date, for purposes of certification, the "B" stock will not be distinguished from the existing 9 per cent Conversion Loan, 2011. From the opening of business on 10th June 1992, the "B" stock will be amalgamated on the register with 9 per cent Conversion Loan, 2011. CGO account balances will have been amalgamated from the opening of business on 8th June 1992.

26 Application forms and copies of this prospectus may be obtained by post from the Bank of England, New Issues, Southgate House, Southgate Street. Gloucestor, GL1 TUW, at the Central Gilts Office, Bank of England 1 Bank Buildings, Princes Street, London, EC2R SEU or at any of the Branches or Agencies of the Bank of England; at the Bank of Ireland, Moyne Buildings, 1st Floor, 20 Callendor Street, Belfast, BT1 5BN, or at any office of The International Stock Exchange in the United Kingdom

## to peace built on hatred and distrust Damian Fraser on critical talks 7 HILE El Salvador's

El Salvador looks

brutal and bloody civil war appears to be drawing to a close after 12 years, few people in the tiny country have any illusions about the difficulties ahead. Negotiations between the government and its left-wing

guerrilla opponents, the FMLN, reached a critical stage last week when the latter unilaterally announced an end to offensive action. One of the five guerrilla comondontes. Shafik Handel, all but declared that the war was over.

President Alfredo Cristiani was more cautious, but welcomed the announcement and hinted that government forces would soon stop their offensive

Mr Alvaro de Soto, the chief UN mediator, said that a formal peace treaty could well be ready before the end of the year. According to the provisional agreement reached in New York in September, the treaty will, among other • give the rebels land which

they control; • require that the army be purged of its worst humanrights violators and reduced in

• require that the guerrillas be re-incorporated into society and form a part (still unspecified) of a new national police "By themselves, these are

sufficient to generate a great deal of instability," says Dr Fidel Chavez Mena, leader of the centrist opposition Christian Democratic party. However, Salvadorean rightwingers still balk at such

demands, and could act to prevent them being implemented. The criteria under which the FMLN would enter the police force is proving the most difficult part of the negotiations under way in Mexico City. leading guerrilla

comandante, German Serrano, declared only last weekend that the guerrillas would "certainly not" lay down their weapons after peace, and that the FMLN would be converted into the national police force. On the other hand, Mr Armando Calderón Sol, leader of the ruling Arena party and

the man whom many consider as a successor to President Cristiani, said last week there was "absolutely no right for the FMLN to enter the high ranks of the police force". He was also adamant that there should be no purge of the army. "We have to have an amnesty, a forgetting of actions," he said. Some 75,000 Salvadoreans have been killed in the war.

wing death squads linked to the army. The armed forces, the main beneficiaries of the war thanks to more than \$1bn (£500m) in US military aid over the years, may well have the power to

tens of thousands by right-

torpedo any agreement. Moreover, the murder of six Jesuit priests and two women in November 1989, for which an army colonel was recently convicted, indicates the depths to which the army is willing to descend to protect its power. New circumstancial evidence, revealed in a US Congressional report at the weekend has linked the murders to senior members of El Salvador's defence establishment "Cristiani is not in a position

to go against the army," says

The El Salvador government has put two of the country's largest banks up for sale, in the country's first privatisation since the right-wing

Cristiani came to power in June 1989, writes Damian Fraser. Banco Agricola Comercial de El Salvador and Banco Cuscatlan went on sale last Monday. By the end of the first week, 10m colones (\$1.2m) of shares had heen sold. Mr Cristiani described

this as "above expectations"

government of President

The two banks to be sold are valued at \$22m (£12.4m) and \$26m (£14.6m) respectively. Small investors those with less than \$12,000 to spend in the privatisation have been given first rights on the equity. Larger investors will be able to bid on shares not taken up from March 10 next year.

The widespread corruption that occurred when the banks were in state hands has been used to justify the banks' privatisation.

one European diplomat. "The party will side with the army out of fear of handing over the country to the FMLN police". The two sides also have yet to reach agreement on the mechanisms by which peasants in rebel-controlled areas would be given ownership of land they now till; nor have the peace talks touched on economic and social reforms. Even so, despite bitter oppo-

sition, negotiations have made progress, due in part to rising international pressure. The US, bored with financing a conflict that now serves little military purpose, has started to press the government. After some doubts, it has backed the UN, whose skilful mediation has helped to bring the sides so close. The rebels have in turn been pressed by

Latin American friends.

nature of the conflict has also changed. The FMLN has radically altered its stance, coming to accept that the only path to power is through elections. The accommodation is due not so much to military weakness but to the continued insurgency losing political support. The FMLN is betting that

a broad alliance of left-wing

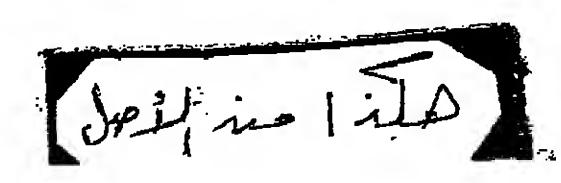

Inside El Salvador, the

forces can win the 1994 presidential election. On the right, Mr Cristiani has helped the negotiations by being been much more dogged than many imagined possible. He has received crucial support from Major Roberto D'Abuisson, the extreme rightwing founder of Arena who, in the early 1980s, was repeatedly linked to murders by death

souads. Maj D'Abuisson, who is dying of cancer, has become more conciliatory, ensuring Arena support for the presi-

dent's efforts. However, if the coalition unravels on the major's death, then support for peace could slip away. Likewise, the prospect of a left-wing victory in the presidential election could lead to resumed political vio-

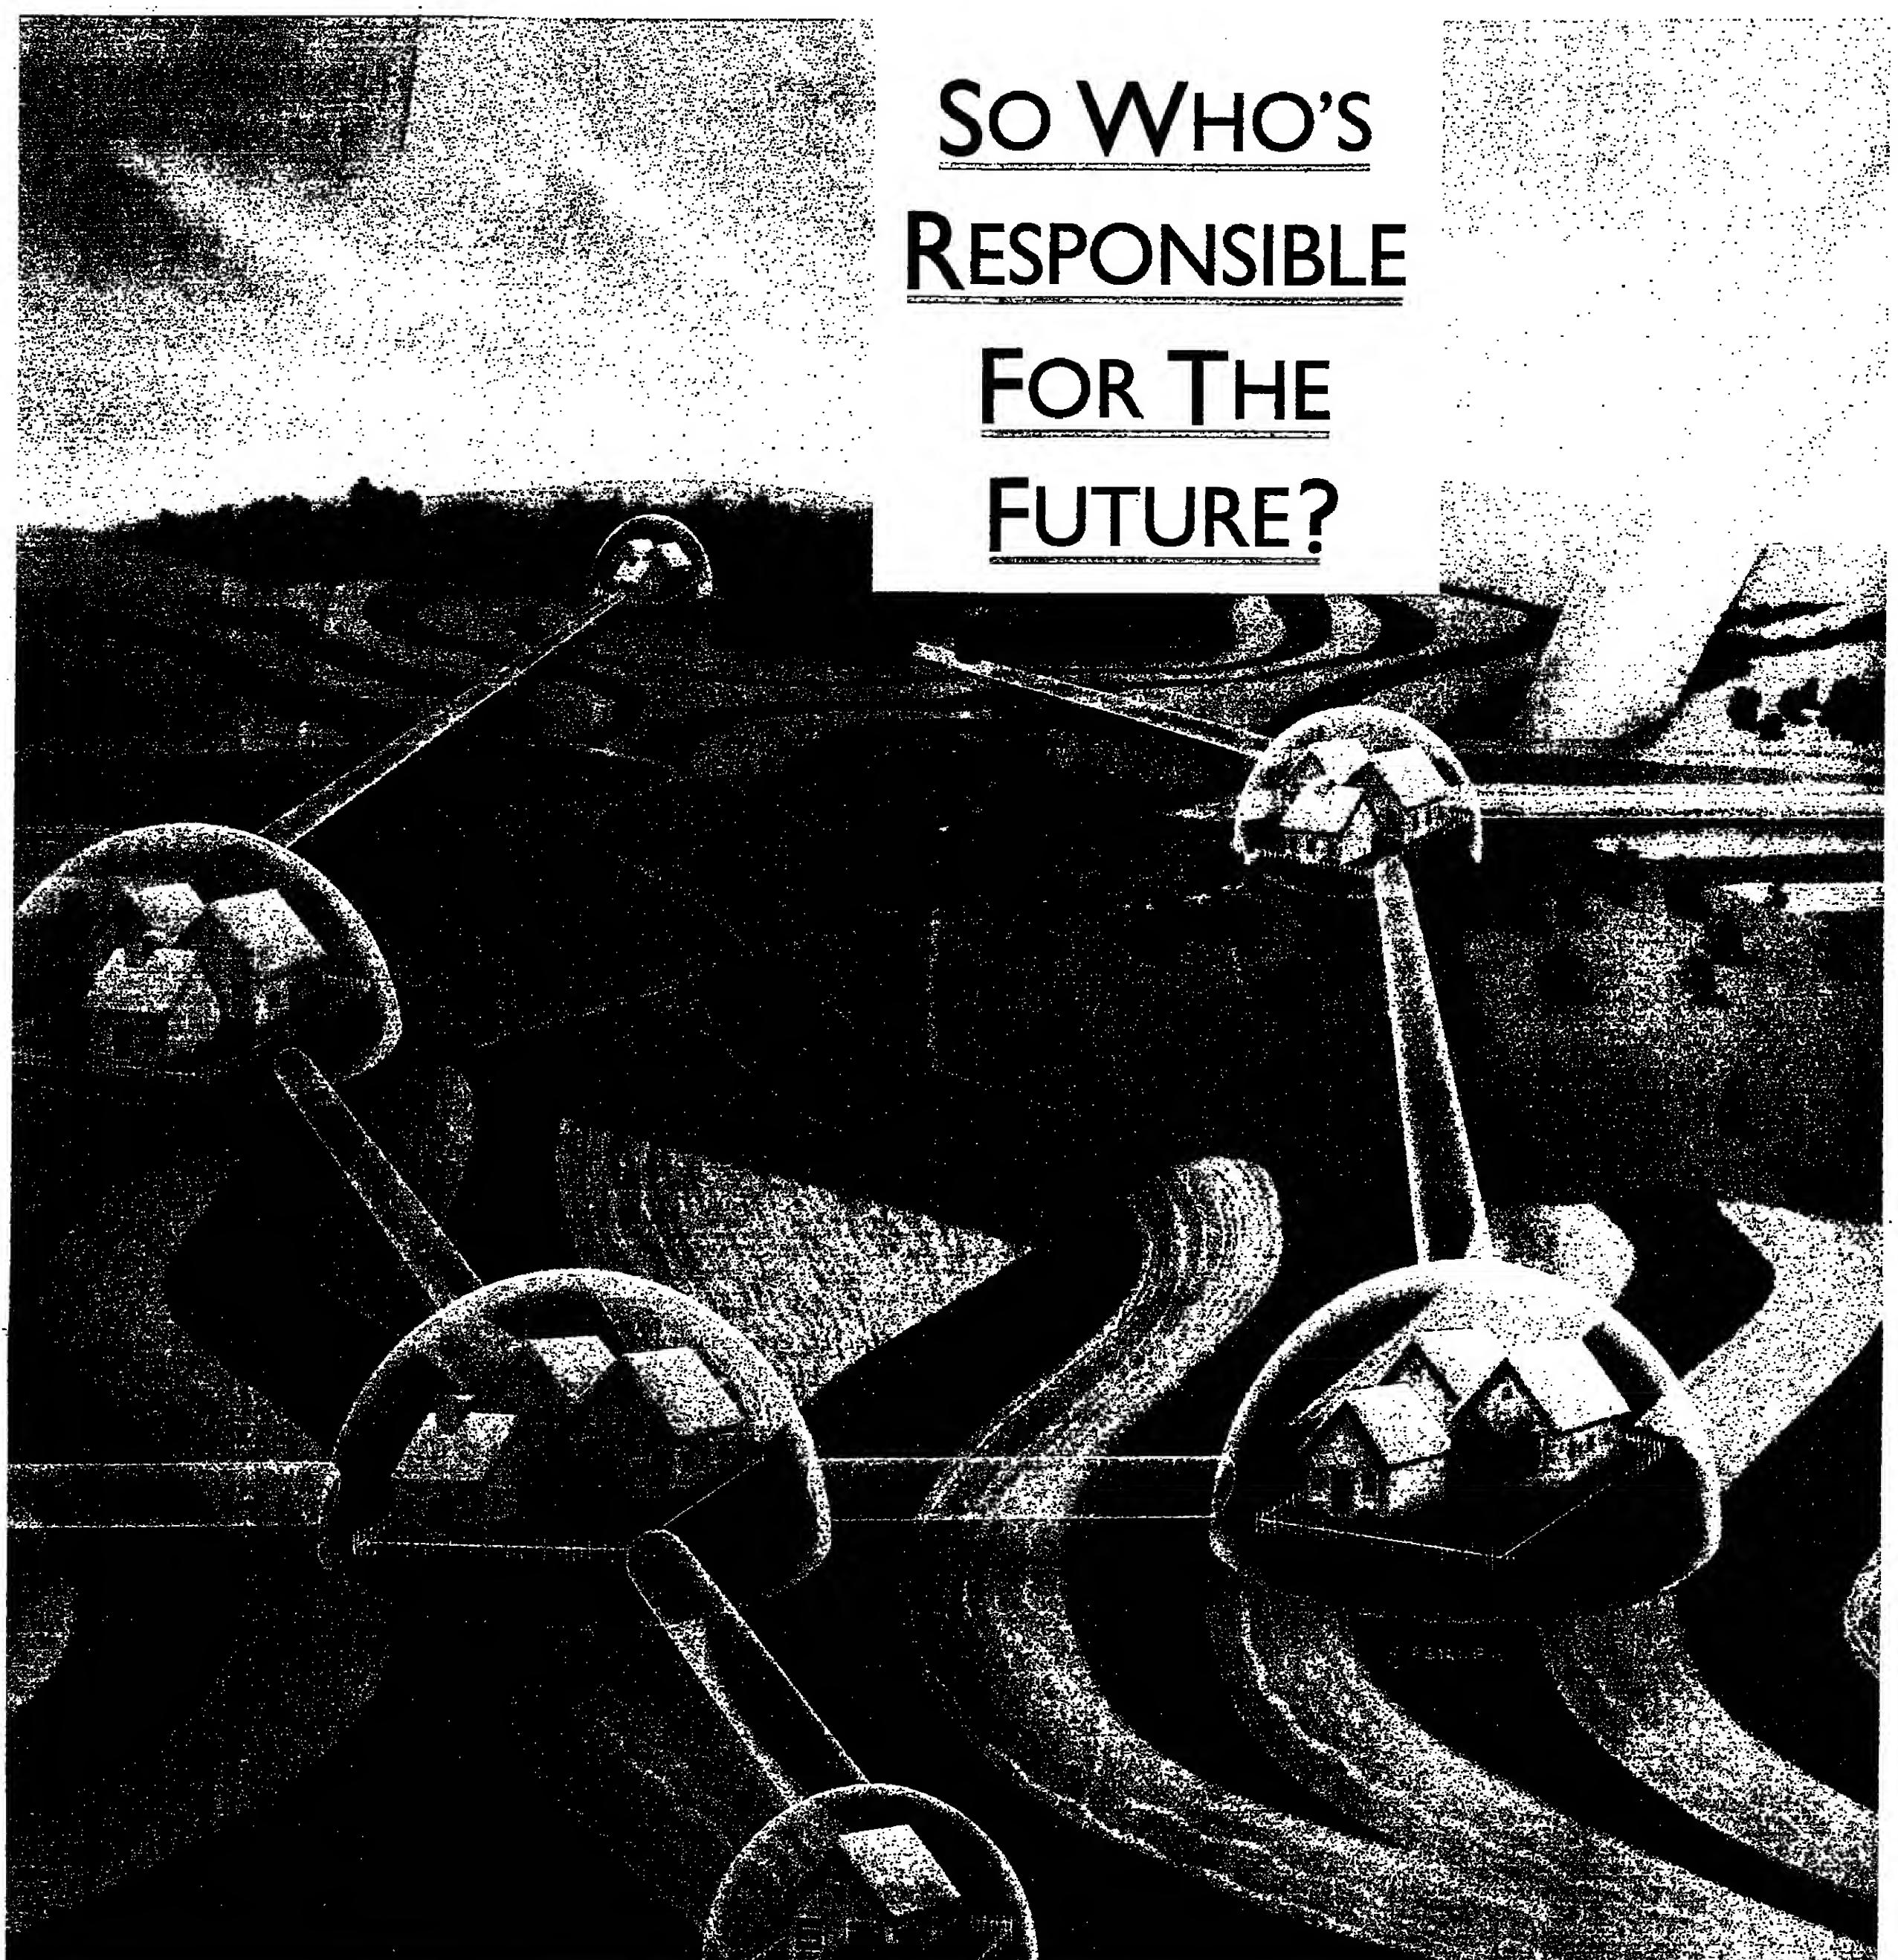

Besides, hatred and distrust will remain. The guerrilla strongholds, which suffered the brunt of the death squads. ae unlikely ever to embrace 2 Christian Democratic or Arena government.

# Peru opens up economy with deluge of laws

By Sally Bowen in Lima

A 10-DAY deluge of 126 laws, more than half of them intended to stimulate private investment, has brought about the most radical reorientation in the Peruvian state for more than 20 years.

If a country can decree its way into modern times, then Peru has gone some way to doing so economically.

State monopolies have been eliminated, private individuals and companies may now compete directly with the state in such varied areas as telecommunications, the generation and transmission of electricity, and the provision of postal and railway services.

They may apply for concessions to administer stateowned hospitals, airports and even schools.

There is what ministers call an "aggressive plan" to sell off public companies, which have drained the Pernyian exchequer of up to \$2.5bn annually. Mining and oil companies Cen-tromin, Hierroperu and Petroperu, plus the state airline Aeroperu, top the privatisation

"There is no longer any such thing as a strategic enterprise." said the economy minister Carlos Bolona.

He expects privatisation both to increase efficiency and ease the government's cash flow crisis which has held public sector salaries below \$40 a month for all this year. "But it has to be quick - we can't afford the luxury of privatising over six or seven years, like Chile or England," said Mr

State subsidies, paternalism and systems of special exonerations which Peru has relied on for more than 20 years have demonstrably failed to work. "I am a pragmatist and I look for ideas which do work. The world is seeking efficiency and market forces can bring us

More specifically. Peru is

that." Mr Bolona said

poured forth at home, President Alberto Fujimori has been visiting Thailand, Singapore, Malaysia and Hong Kong, addressing business organisations on opportunities for immediate investment in Peru.

East Asian "tigers".

As part of the new emphasis on economic diplomacy embassies are to be established in Thailand, Singapore and Malaysia by early 1992 to strengthen trade links.

seeking to emulate the South-

While legislative decrees

During the presidential visit. co-operation treaty was signed with Malaysia for develcoment of Peru's potentially huge palm oil industry (also a viable substitute crop in the coca-growing areas of the Peruvian jungle).

In Thailand, talks centred on joint ventures to exploit plentiful Peruvian fishing stocks; while Singapore investors are thought to be attracted principally by Peru's mining and tex-

Through links such as these, Peru hopes to increase substantially last year's paltry \$20m in foreign investment. The government admits, however, that settlement of three outstanding disputes with transnational companies already operating in Peru - Southern Peru Copper Corporation, Occidental Petroleum and Belco - will be a prerequisite for attracting fresh short-term foreign investment from abroad

The government is playing down the continuing problem of terrorism, however. According to Mr Alfonso de

los Heros, the newly appointed prime minister: "Security is not the major concern for foreign investors.

"Much more important is an adequate legal framework. If these decrees survive. then investment, both national and foreign, will come." he said.

# Canada to end curbs on foreign control in energy

The government drive to keep the oil and gas sectors in local hands has failed, writes Bernard Simon

Canada's industrial policy in the late 1970s and early 1980s was the creation of a strong domestic energy industry. Through a combination of tax incentives, foreign investment curbs and nationalisation. Ottawa hoped to spawn a collection of healthy locally controlled oil and gas producers which would put Canada's interests

The abject failure of that policy will be underlined soon. with the expected abolition of most remaining restrictions on foreign investment in the oil and gas industry.

above those of some faraway

multinational

Far from discouraging foreign participation, the hardpressed oil and gas industry now wants to open the door as wide as possible to outside capital. In particular, it wants to broaden the range of potential buyers for the large number of exploration and producing properties up for sale.

"It's been a buyer's market, so anything that encourages more buyers has to be to the benefit of sellers," says Mr

Foreign investment in Canada On the other hand, foreign interest in buying Canadian

Sayer Securities of Calgary. The Alberta-based oil industry has still not fully recovered from the nationalistic policies of a decade ago, when Ottawa encouraged Canadian-owned companies to run up big debts

weak oil and natural gas markets. The biggest sellers have included Petro-Canada, which was formed in 1975 to give Ottawa a "window" on the energy industry, and Amoco Canada which in 1967 bought Dome Petroleum, the most heavily indebted of all the Canadian

energy assets has seldom been higher. Mitsubishi of Japan is in the process of buying a 5 per cent interest in the Syncrude tar-sands project in Alberta from Petro-Canada. Morrison Petroleums, a junior company, raised C\$130m (\$99m) last year from a group of US pension funds and other institutions for investments in gas processing plants and pipelines.

Ironically, one of the companies now sniffing around for acquisitions is Petrofina, the Belgian group which had a and folded into Petro-Canada.

before it was bought out by the government in the early 1980s Current policy prohibits foreign takeovers of healthy Canadian oil and gas compa-

in financial difficulty or where one foreign shareholder is selling to another, buyers are required to commit themselves to future investment and greater Canadian participation. All foreign takeovers of

energy companies with book values of more than CS5m must still be reviewed by Investment Canada, the government's investment watchdog. The oil and gas sector was excluded from the relaxation of review thresholds for US investors which were included in the 1989 US-Canada free-trade

in the Arctic or off the East cent Canadian participation. Mr Hans Maciej, vice-president of the Canadian Petroleum Association, says these rules have kept many investors away. Others have had to operinstance. UK-based Lasmo is allowed to own 54 per cent of the shares of its Canadian subsidiary, but has only one-third of the votes and nominates

only two out of 10 directors.

"They do chafe a little bit." says Mr Verne Johnson, president of Lasmo Canada. The growing strains on the

policy are illustrated by the case of Calgary-based Husky Oil one of the country's biggest independent producers. Ottawa refused to allow Mr Li Kashing, the Hong Kong mag-nate, to buy outright control of Husky in 1986. Mr Li's direct shareholding was limited to 43 per cent, with another 9 per cent owned by his son (who is a Canadian citizen) and 5 per cent by Canadian Imperial Bank of Commerce.

to provide the financial support it badly needs. Husky's other large shareholder, debtburdened Nova Corp Alberta, has decilned to invest more equity in the company and has put its 43 per cent - play by the same rules as 100 stake on the block

Mr Li recently made an offer for Nova's shares. There is little doubt that this time Ottawa will have few qualms about allowing him to buy full con-

trol Sayer Securities estimates that a total of at least C\$4.1bn of energy assets are up for sale: almost half the 136 companies it polled said they have proper-

ties on the block. Toronto's Reichmann brothers, who are seeking to ratse cash to cushion them against the slump in their realestate business, are looking for buyers for their controlling stakes in Home Oil and Interprovincial Pipe Line. Another Reichmann-controlled company, Gulf Canada Resources, is keen to sell some of its interests. Petro-Canada said recently that it is seeking offers for parts of its holdings off the coasts of Newfoundland

and Nova Scotia. The government now clearly appreciates that these companies have the best chance of getting a fair price and keeping themselves on an even keel il foreign bidders are allowed to

A senior energy department official says that recommendations on easing the present curbs will be submitted to the cabinet "fairly soon".

#### Cuba cracks down on its black marketeers

CUBA'S communist authorities are cracking down on black marketeers who operate on Havana's Malecon seafront, holding swift, "exemplary" trials and sentencing offenders to jail for up to one year, Reuter reports from Havana. The Communist Party news-

paper, Granma, said in a report yesterday that 12 black marketeers received prison sentences of between four months and one year last Saturday after being tried, "a few metres from the scene of their crimes", almost immediately after their arrest.

The trials, described by Granma as "very summary", were held during the night in an improvised courtroom set up in a canteen for construction workers who are building a five-star hotel, the Cohiba, on

the seafront. Granma described the seafront black market as "a sordid coming and going of individuals who propose the illegal sale at inflated prices of items which are in short supply in our market: cigarettes, rum, food products, soaps".
Most of the offenders sen-

tenced were charged under Article 230 of Cuba's penal code which penalises hoarding and speculation. Their goods were confiscated and they were banned from the seafront for an unspecified period. As a result of disruptions to

vital supplies from the Soviet Union, many of the island's more than 10m people seek to supplement their tight monthly food ration by buying on the black market, where most goods are available but at inflationary prices.

#### Trinidad calls early election

By Canute James in Kingston

MR Arthur Robinson, the prime minister of Trinidad and Tobago, has called general elections for December 16, two months before they are constitutionally due.

Mr Robinson was apparently encouraged by opinion polls which indicated that his ruling National Alliance for Reconstruction, which won a handsome victory in elections in 1987, was ahead in popular support for the first time in the past two years.

Elections are also scheduled for the same day in neighbouring Guyana, but there is a possibility the poll will be put back because of a row over errors in the voters roll.

# Panama envoy tells of Noriega-Medellin link

By Henry Hamman in Miami

Panamanian diplomat turned drug smuggler and money launderer that General Manuel Antonio Noriega received \$10m in pay-offs has tightened the link between the former Panamanian leader and the Medellin cocaine cartel.

The former diplomat, Mr Ricardo Belonick, made the claim in detailed testimony on Monday at Gen Noriega's drugtrafficking trial, now in its third month in Miami Federal District Court.

According to Mr Belonick, who has admitted purchasing a Panamanian freight airline, Inair, on behalf of the Medellin cartel, Gen Noriega was paid \$500,000 for each of 19 drug flights from Panama to the US. Mr Belonick said the general also received an extra \$500,000 for helping to retrieve another drug cargo which had been seized mistakenly by Panama-

nian customs agents. However, under cross-examination, Mr Belonick acknowledged he had never actually seen any of the money pass into Gen Norlega's hands. Mr Belonick, 44, is a lawyer and served as Panama's ambassador at large in Washington But, according to his own testimony, in the early 1980s he

launderer for the Medellin car-At first, he said, he collected suitcases of cash in Miami and

flew with the money to Pan-

established himself as a money

But he and his Colombian clients eventually decided that owning their own airline would be a better method of moving the volume.

Starting in November 1982, Mr Belonick said, he began flying drug cash on Inair aircraft. Eventually, the airline was carrying \$60m a week in drug money for deposit in Panama-

On arrival in Panama, Mr Belonick said, officers of the Panama Defence Forces intelligence branch, of which the then Colonel Noriega was the chief, met the aircraft.

nian banks.

The first shipment of cocaine from Panama on Inair took place in December 1982, Mr Belonick said, and the flights

Norlega: now in the third menth of his drogs trial

The US is allowing a key prosecution witness to keep his \$3.9m drug profits

continued until 1984, when cocaine was discovered in the Inair cargo warehouse at Miami International Airport. The airline ceased operation thereafter. All told, the flights brought in 20,000 kg of cocaine

into the US. Mr. Belonick also said that he and his cartel partners considered shipping cocaine to the US via Nicaragua.

He said cartel leaders told him that they had reached an understanding with the top leadership of the then Sandinista regime to allow the

But those flights apparently never took place Mr Belonick's testimony made clear the large sums which could be earned from the drug trade. Under cross examination, he

acknowledged that he was paid \$22m for his money laundering efforts and an additional \$25m for the drug flights. But he said his net worth

today was only \$3.9m, the rest of the money having been lost in poor business ventures. Mr Belonick, like many other witnesses against Gen Noriega, gave his testimony only after reaching a plea bargain with US government prosecutors. The bargain was struck only after 10 negotiating sessions in Panama, including face-to-face discussions with both the lead prosecutors in the case.

Under the agreement, the maximum sentence Mr Belonick could face for his drug activities was reduced from 60 years imprisonment to 10 years, with a government promise to intervene on his behalf to seek an even lower

In addition, Mr Belonick has been granted immunity-from further prosecution and a pledge that the US will seek to block foreign prosecutions.

Mr Belonick his wife and children and their maid have also been promised government support if they chose to emigrate to the US, and places in the federal witness protection programme if they wish. He is not required to forfeit any of his remaining assets despite acknowledgement that they were financed with drug

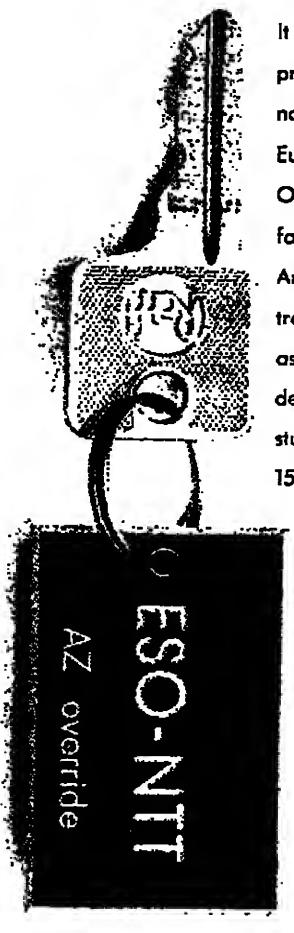

Mr Belonick's testimony has revitalised interest in Gen Noriega's trial, which had been languishing during the government's presentation of a suc-

cession of minor witnesses During some recent days of proceeedings, attendance at the trial has dwindled to the point that the courtroom has

been almost empty. The government is expected to call as one of its next witnesses Mr Carlos Lehder Rivas the highest ranking cartel leader in US custody, despite Mr Lehder's acknowledgement that he has never met Gen

Notiega. But in the publicity sweepstakes, the defence team's announced intention to bring in Colonel Oliver North to testify, and Col North's apparent willingness to appear, means that the battle of courtroom one-upmanship is far from

## This is the key to the world's finest Risk Management Services.

Financial Managers face two challenges: managing risk and managing returns. For both challenges, the key to controlling results is the effective application of derivative products. Recent history has shown that the value of financial assets fluctuates not only in response to economic news but also to political events. World markets have seldom been as volatile as they are today, and the need for soundly engineered risk hedging never more obvious. This is the principal reason why Swiss Bank Corporation and the O'Connor Partnerships have agreed to form a global strategic alliance. O'Connor has the world's most sophisticated derivatives expertise and risk management technology. Swiss Bank Corporation combines these techniques to offer its clients creative solutions and competitive pricing in both traditional and customised overthe-counter risk and return management products. If you are a Financial Manager considering foreign currency options, options on interest rate products and debt securities or Japanese and European equity derivatives, then turn to Swiss Bank Corporation for the key to the management of your risk and returns.

# in energy Support for MacSharry in farm talks

By David Gardner in Brussela

At a closed dinner here on Monday night, ministers took the view that the US was mov-

the view that the US was moving closer to the EC's position, which it had rejected last December at the failed summit in the Uruguay Round.

There was broad acceptance for the compromise, which Mr MacSharry and Mr Madigan are exploring, of a reduction in export subsidies of 35 per cent over five years.

The US had wanted a 90 per cent cut over 10 years, against the EC's offer of a 30 per cent cut over 10 years, counting from 1986 so as to include credit for cuts already made. Ministers nevertheless

insisted that • The US would have to meet the EC's "rebalancing" concerns, allowing the Community to increase protection against imports of cheap cereals substitutes in exchange for the EC cut in cereals exports. The Commission is seeking to resolve this by negotiating a freeze on imports at current

US "deficiency ayments"

- giving farmers he difference between dorestic and world prices - shuld not be allowed into the latt "green box" for production-neutral subsidies, since may distort

EUROPEAN Community farm ministers have given Mr Ray MacSharry, the EC agriculture commissioner, a clear endorse ment for the negotiating stance he is now taking with the US in an attempt to unblock the Uruguay Round impasse over farm subsidies.

This "united front", as the Dutch presidency of the EC has described it, greatly strengthens Mr MacSharry's hand before a further round of talks he is due to hold with Mr Edward Madigan, the US agriculture secretary, which may come this weekend.

Only then on it deliver to The Commission is less likely to insist on his, because of the way it has constructed its own farm return plan. It wants the direct payments which it plans or farmers in compensation fc big price cuts under the refum to be put Only then on it deliver the internal reform which will make possibe an improved

offer regarding the Gatt. The US arees not to use its rade legislation to act unilat-cally against the EC, instead redging to settle any disputes nultilaterally through the The Commission is equally

alamant on this "peace cluse", and sees it as a major stiking point for the US. There shall be no quantita-tic restrictions on cereals express as the US is seeking. the US agrees to Mr M Sharry's compromise th being a mixture of volume retaint and subsidy cuts, pro-vid that the US accepts a re onable reference year to caulate the base from which th cuts must be made - the Ecouncil is likely to go along

lone of the ministers puted [Mr MacSharry] any fuher than he wanted to go." a nior Commission official

#### WORLD TRADE NEWS

# Back into the thicket of subsidies

William Dullforce analyses the issues as EC and US farm negotiators resume their talks today

from the European Community and the US will resume in Geneva today their efforts to fashion a firm understanding on how to cut agricultural subsidies.

The five-year-old Uruguay Round trade talks, which need a breakthrough on agriculture to succeed, are again entering a critical two-to-three-day passage.

sage.
No substance has yet been given to the hopes raised at the EC-US summit in The Hague on November 9, at which President George Bush scaled down US targets for reductions in farm subsidies. Mr Ray MacSharry, EC agriculture commissioner, and Mr Edward Madigan, US agriculture secretary, were unable to fill in the detail at subsequent talks in detail at subsequent talks in

Since the Hague meeting, EC officials have been signalling that a farm deal with the US is within reach. Mr Jacques Delors, president of the EC Commission, said at the week-end that an accord could be struck by the end of the week. In private, US officials are much more cautious in forecasting the outcome of this week's meeting of Mr Richard Crowder, US agriculture undersecretary, and Mr Guy Legras, EC director-general for agriculture. The EC "has not yet demonstrated the across-the-board

flexibility need to close the gaps," one official said.

Both sides agree that Mr
Bush's intervention broke the log-jam over agriculture that has thwarted the international trade talks for years.

The return of the key negoti-ators to Geneva is seen as a good sign. But EC and US officials read the import of the Hague summit differently. The president moved the US away from its demand for cuts

Ploughing towards a trans-Atlantic accord: Raymond MacSharry (left), the EC agriculture commissioner, and Edward Madigan, the US agriculture secretary

of 90 per cent in export subsidies and 75 per cent in border protection and domestic supports to farmers over 10 years. It was agreed to talk of 35 and 30 per cent reductions over five years in the three areas. but the impact of the percentages in real terms on output and trade depends on the other factors built into an agreement. On these factors, there are at least a dozen points at which the negotiators diverge.
US officials claim that, under
Brussels' interpretation of how
to effect a 35 per cent cut in
subsidies, the EC's annual

export of subsidised cereals would be some 6m tonnes larger at the end of five years than under the US interpretation. The US target is to cut EC subsidised cereals exports to 10m tonnes, which would be equivalent to a reduction of more than half from the level

the EC is expected to reach because they do not distort trade. The US complains that Factors affecting the out-come are the choice of the base the Community proposes to put into the box all the comperiod from which calculations are made, the date for implepensatory payments it would make to farmmentation and whether the cuts should be applied to buders under the MacSharry plan to reform

getary allocations or to export tonnages. The US sticks to a 1986-88 base period; the EC, whose subsidies rose sharply from that period, originally wanted a 1988-91 base but has agricultural Washington says it would proposed a compromise.

Another point of contention is Brussels' demand that it be subject its own deficiency payallowed to run down existing surplus stocks before the reductions are counted - a demand that would particu-larly affect beef, in which the

reductions, if they were proved to distort trade, but would expect the EC to do the same for the comparable compensatory payments.
In dismantling border protection, Washington's call for full international tariffication the conversion of all import barriers into tariffs and their

**ADVERTISEMENT** 

FUTURE BUSINESS STRATEGIES IN SOUTHERN AFRICA

subsequent reduction - poses problems. Differences persist over how to calculate the tariff equivalents, the formula for reducing them, how to ensure minimum market access and, most markedly, over the "safe-guard" mechanisms which countries could apply to dampen the effect of unex-

pected surges in imports.

EC farm ministers are again insisting on the right to "rebalance" or to impose tariffs on imports of animal feedstuffs and oilseeds which now enter the Community duty-free in return for concessions in other areas. For the US, rebalancing is out of question.

Trade officials say it would be possible to unravel this bilateral tangle, if the political will voiced at The Hague is maintained. But an EC-US accord would be only a first, albeit crucial, step. The EC-US

talks have moved to Geneva this week so that they can be fused with the non-stop negoti-ating in all areas of the Round launched by Mr Arthur Dunkel, Gatt director-general, in an attempt to complete the trade

The Uruguay Round remains on a knife-edge. If, over the next two days, the EC and US negotiators cannot resolve their differences over farm reform, there will have to be a time-consuming referral to ministers or even heads of government. On the other hand, a definitive unblocking of the EC-US dispute over farm subsidies would be a shot in the arm for all the other negotiations and open a reasonable prospect of meeting the year-end dead-line for drafting the final texts of a series of new international trade agreements.

## Congress fears unacceptable deal

By Nancy Dunne in Washington

CONCERN is growing in the US Congress that the State Department will put pressure on American trade negotiators in the Uruguay Round to secure a final deal that Congress will not accept.
"It won't work," said Mr George Weise, staff director of the House of Representatives

sub-committee on trade. Any final deal must attract broad support from the business lobby to counteract the tendency to protectionism in economic hard times.

a briefing on the Round yeerday, Mr Sam Gibbons, chrman of the sub-committe said a Congressional vote on Uruguay Round package is kely early next summer.
"I hope the edomy is better then than it is ow," he said. "When memhe are very pessimistic, they tel to be more protectionist." e said the North American In Trade Agreement package od be introduced after the

presidential election and

notion fits that of the Adminis tration; there is no appetite to fight the controversial battle before the election, particularly if the economy fails to improve and jobs continue a matter of concern.

There will be attempts to attach to a Uruguay Round package an extension of the Super 301 legislation which, with its retaliationy threat, calls for managed trade. This contradicts European calls for the US to agree not to use unilateral action in trade disputes.

EC has built massive stocks.

In domestic farm supports,

disagreement stems from the

"green box", the measures

which would be permitted

#### Price Forbes looks forward to making friends in Africa

Paul Heinamann, Managing Director of the Price Forbes Group talks to John Spira, Finance Editor of Johannesburg's Sunday Star.

Spira: The Price Forbes Group has many divergent facets. What are the main thrusts of the business?

Heinamann: Price Forbes has four main pillars: \* PFV Insurance Brokers, which strives to offer its clients

the most cost-effective and beneficial solutions to their riskrelated problems. A specific division called Corporate Risk Management (Pry) Ltd provides many of the specialist skills. \* Alexander Forbes Consultants & Actuaries, which aims to provide its clients with the highest quality of employee benefit consultancy, actuarial services, administration and financial

planning advice. \* Forbes Reinsurance Broking Services, which provides services in the field of reinsurance administration, protection

and coverage. \* Medicaid Administrators, which provides medical scheme administration and health care management services. The group employs more than 2 450 people in 24 offices situated in most of South Africa's principal towns and cities and is active abroad through its associations with foreign

companies. Our clients, which include more than 80 of the country's largest 100 stock exchange listed companies, extend from industry and commerce through to the agricultural, mining

and parastatal sectors and to the individual. We're South Africa's largest insurance brokers, risk management consultants and consulting actuaries. Group retained brokerage and fees exceeds an annual R260

million. That ranks us among the larger firms of our type in the world excluding the mega Alphabet-Brokers. Price Forbes is a South African company with South African shareholders, principally Federale and Absa groups. Our staff owns 13 percent of the equity. No single shareholder has control, which gives us complete operating independence.

Spira: What is the group's broad philosophy?

Heinamann: We aim to reduce risk, to adequately protect assets and to provide a range of consultancy services. Size in itself is not important. Our commitment is to use our size to invest in and develop appropriate technology, efficient systems and competent caring staff, in the process providing for our clients a faster, more efficient and personal service.

to manage the group as a series of small companies rather than one institution. It is a strategy which has been the secret of our success to date. To stay ahead of our clients' changing needs, we employ qualified experts in our technical services and research divisions

Our policy is to divide our companies into small units and

- people whose expertise is critical to the levels of advice and service that our clients expect. Each of our companies is an important and powerful player in its own right. Each has its own character. The Price Forbes Group encourages this individuality, allowing each operating company to focus its skills in an innovative and entrepreneurial

We've found that if something is going wrong in your business, it's because you're putting your own interests ahead engaged in a service industry.

Spira: You mentioned your associations with foreign companies. Does this include Africa?

Heinamann: Yes, though only with certain neighbouring countries at the moment. It's been difficult to do business with Africa. However, I anticipate that our contacts with other African countries will blossom in a way that will meet both their needs and ours.

I recently received an invitation to visit the chairman of a state-owned African insurance organisation. It's the sort of approach that we haven't had in years and I am looking forward to accepting the invitation. The potential for us to become involved in insurance throughout Africa is significant.

We've been getting visitors from Africa - people who want to see how we do things here. A lot of very useful personal relationships are developing. They're people who want to do business with us. We're going to have to find our how that's going to be possible.

Spira: Apart from your international associations, do you have any overseas offices?

Heinamann: We recently opened PFV London, which acts as a small reinsurance broker. It also gives us a base to be part of what's going on in Europe. We feel we need our own representative office there to keep in touch with what's happening in Europe.

We are already doing consultancy work in the United Kingdom and our own London office will give us a base to expand further.

We see a lot of future in collaboration between Europe and South Africa, since there's a considerable amount of understanding of South Africa in Europe. A large portion of our client base emanated from European investments. I believe we'll get a fair amount of new European investment in South Africa in the next few years so we'd like to be positioned in a way that major companies which want to invest in South Africa believe that when they need the best consultancy advice, they'll only think of one name when they come here. Sure, we have competitors; but there aren't any other companies

which can provide the same wide range of services under one

Certain people in Europe have said that if we open a business in London they'd support us on the basis that they know how we operate, because they have South African subsidiaries. I find that quite interesting. And right now we're finding that they are keeping to their word. It certainly belps when one is starting a new operation in a foreign country.

Spira: How did sanctions impact on your business?

Heinamann: To the extent that the South African economy hasn't grown as rapidly as it would otherwise have done. On the other hand, we did derive some benefit from sanctions in the sense that when disinvestments took place, multinational insurance programmes disappeared and Price Forbes and others filled the gap. Overall, however, I don't think we benefited, as a growing economy would have provided more opportunities though we cannot measure the loss of these opportunities. With sanctions having virtually gone, there'll be more competition. But we're right here and I'm therefore confident that we'll more than hold our own. I'm happy that once foreign investment begins to flow again it'll be good for us, providing as it will additional opportunities.

Spira: How do you see your role in a changed South Africa?

Heinamann: Price Forbes is totally committed to South Africa. And that doesn't mean white South Africa. We have a lot to offer. There's a view that big business is bad and I suppose we are a big business. But I'm confident we will be able to show that we've always acted in the best interests of our clients, our staff and the environment. And we'll continue to do so. We're not put off by that view, although there will be certain difficulties. We have several black controlled businesses as clients but we don't see it that way. We see those businesses as being people controlled. We have clients from all sides of the political spectrum. I personally believe that most of the people who work for Price Forbes are perfectly happy with the way that South Africa is changing and the direction that it is taking. I am personally excited about the changes in South Africa and look forward to making new friends in Africa. There isn't another organisation like ours elsewhere on this continent.

Spira: Could you outline your affirmative action

Heinamann: We aren't a major corporation, so we have to cut our cloth accordingly. We've tended to focus on education. mainly sponsoring disadvantaged pupils. In our own business, we've spent a lot of money in creating

bursaries. Our group training budget for 1991 exceeds R2,5

million. We've encouraged universities to open chairs of insurance. We pioneered this move in South Africa and in so doing provided opportunities and career paths for young South Africans from all sections of the community.

Outside of education, we've done a lot for nature conservation

Paul Heinamann

which in its wider term embraces meeting the needs of local

Very often we've supported projects where a major corporation has asked us to contribute portion of a larger sum. We're currently looking at helping disadvantaged communities in the area of health care — a clinic project out of which we won't make any money.

Spira: Short term insurance has been a cut-throat business in recent years. What is the outlook?

Heinamann: Yes, the industry in South Africa has certainly experienced problems, although in world terms it's been relatively stable. We believe that you need competition but you also need a stable market place. It's a fine balance and we like to think we play our part in helping achieve that balance -

in our clients' interests. At the same time, you should appreciate that the difficult soft insurance market hasn't had a major impact on Price Forbes, since we decided some years ago that we would endeavour to immunise ourselves from the cyclical nature of the short term insurance business by becoming more fee based. Accordingly, a major part of our earnings depend on the amount of work we do and not on commissions. This gives

us a stable earnings situation in which the volatility of the industry in which we operate isn't totally reflected in our results. Thus, in 1990 our revenues grew by 28 percent following growth of 21 percent in 1989 and 13,5 percent in 1988.

Spira: Any thoughts of going public?

Heinamann: No. The stock market doesn't understand service companies in South Africa. Our assets are our people and investors here tend to place a heavy premium on assets shown in the balance sheet.

Spira: What is the current state of the reinsurance market?

Heinamann: Here one has to talk worldwide. It's uncertain but is trying to harden itself. It's trying to put its house in order and this will flow through to the direct insurance market and through to the consumer. This hasn't happened yet. It'll become more expensive and in some cases more difficult to get. South Africa hasn't been paying a premium on reinsurance. The attraction of South African business has been our devaluing currency. This has meant that the value of claims has devalued - an obvious attraction to the foreign reinsurer.

Spira: Over and above what you've already said, what can Price Forbes offer a company planning to invest in South

Heinamann: I believe we are at least as competent and as professional as any of our colleagues in Europe. We're well positioned to help anyone who is prepared to invest here. We aren't short of innovation, new ideas and professional expertise. I genuinely believe that foreign companies - particularly those in the UK -know us for our professionalism. We get young men sent here for training and we're proud of that. And we're going to go on doing our best to maintain our standards in a changing environment.

industry's problems were:

• Integrate crackers with downstream units. This, according to Mr Akitt at Exxon, could reduce costs by as much as \$50m a year. • Restructure the industry More co-operation agreements, alliances, plant operating agreements and share investments are needed, as well as the cancellation of pro-

remained clear, said Mr Campbell at BP. But the days when it was possible for a single company to build world-scale facilities on its own were gone. Joint-ventures of some kind were clearly the answer. It was clear there was still

too many companies in some sectors, said Mr Campbell. He pointed out that, in oil, the top 15 companies account for 60 per cent of the industry's turnover, while in chemicals the top 15 represent only 25 per In the meantime, Mr Camp-

bell said he did not expect the effect of an economic recovery - if it had started - to work through to the petrochemical industry for at least a year and possibly not until 1993. An upturn for the European sector was unlikely to be export-led, given the increased capacity in the Far East.

## Increasing oil output underpins growth in economy

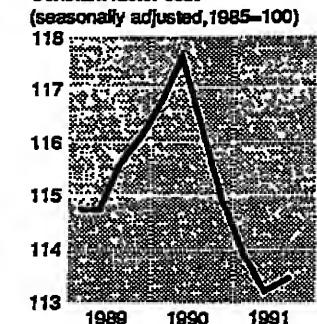

By Rachel Johnson, **Economics Staff** 

BIGHER OIL production caused the output of the UK economy to grow in the third quarter of the year, according to data which the government welcomed as consistent with forecasts of a modest secondhalf recovery.

Third-quarter gross domes-tic product increased by 0.3 per cent over the second quarter after four successive quarterly falls, the Central Statistical Office said.

But City expectations were for a 0.5 per cent rise between quarters, and the data cast doubts on the government's forecast that GDP would rise 0.6 per cent between the first and second halves of the year. A sectoral breakdown of the data showed that the output of

**UK GDP output** Constant factor cost

both the services and manufacturing sectors was flat between the second and third quarters.

Within services, the output of hotels, distribution and catering rose 1/2 per cent, while the production industries' output rose 1 per cent. The only substantial rise was in the energy sector, where output rose 4 per cent following the resumption of

full North Sea oil production. Stripping out energy and gas extraction, the data showed a decline of 0.3 per cent, revealing - contrary to government clams of recovery that the recession continued in the non-oil economy in the

third quarter. Mr Norman Lamont, the chancellor, released a statement welcoming the rise in output but acknowledging that "clearly, some sectors of the economy are coming out of recession more quickly than others".

The Confederation of British Industry said that outside the oil sector, the figures showed output flattening out at best. Mr John Smith, Labour's treasury spokesman, said the fig-ures showed "that the British economy is still bumping along at the bottom of a damaging recession".

After the weaker-than-expected figures, output in the fourth quarter will have to grow strongly if Mr Lamont is to achieve the GDP forecast

for the second half. According to economists at Greenwell Montagu, GDP will have to rise by a 1.3 per cent between the third and fourth quarters to attain the forecast 0.6 rise between the first and second halves of the year.

Stockbuilding figures, how-ever, raised the prospect that the expenditure measure of GDP could rise more than the output measure. The CSO announced a seasonally-adjusted third-quarter rise of £128m in stockbuilding (1985 prices) after a £1.6bn fall in the previous quarter.

# Remaining hostages to 'be freed by Christmas'

By Neil Buckley at RAF Lyneham

THE remaining western hostages in Beirut will be free by Christmas, according to Mr Terry Waite, the Church of England envoy who returned to Britain yesterday after five years in captivity.

Freedom for the kidnap victims, held in the Lebanese capital by extremist Islamic groups, will mark the end of a prolonged campaign in which European and American citizens have been held captive in reprisal for the Israeli-backed occupation of south Lebanon. Mr Waite, who was flown to

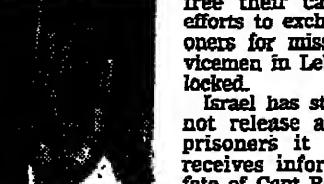

an RAF base west of London from Cyprus, where he was taken on Monday after he was handed over to British officials in Damascus, said he had been assured by his captors that Mr Terry Anderson, the US hostage, would be freed by the end of the month Mr Anderson, chief Middle

East correspondent of the Associated Press, was kidnapped in March 1985 and has been held longer than any other hostage. Mr Waite also had assurances that the other American hostages, Mr Joseph Cicippio and Mr Alann Steen, would be released in the next

## BRIEF

#### Insurers face £80m payout on hangar fire

Insurers are one of their heaviest ever property losses following a tre at a British Altways aircast hangar at Gatwick airport, south Lon-don, earlier the month. The total ayout could

amount to £80m Royal Insurance will pay some £18m, although this wil be substanance recoveries The fire affected an aircraft hangar at the airport where pares were stored. Property damage amounted to £60m with a busi ness interruption clam contri buting a further £20%.

#### Challenge to legal aid reform

Reform of civil legal aid wold deprive even more peopleof representation in court, ae National Consumer Courtl has warned. The main elemnt of the proposals, published n June by Lord Mackay, the lad Chancellor, was a "safety et scheme" under which litigats would pay costs up to a perinally assessed "spending lift" before becoming eligible or

legal aid. The NCC says the safety et scheme is likely to leadto delays and uncertainy. Whether a client received kal aid would depend on a compar means test and then wheer the Legal Aid Board juded their case as meriting finarial assistance.

Data'collection to be improved

Changes to the organisations the Central Statistical Ofce to enable the Treasury to in have been announced. CSO, the mate White organisation for collecting of nomic data, is to improve its surveys of industrial consumer activity to provid more data about econonic change.

#### Jobless figures: comes to end jump 62,000

Employment. Long-term unerployment increased by 146,00 in the year to October andis higher in all parts of the coutry than 12 months ago. Te biggest rises were in the souh west and the south east.

Merger talks collapse

Merger talks between th Union of Democratic Mine workers and the EETPU elec tricians - two of the most sig nificant employee groups outside the Trades Union Congress — have broken down. The failure of negotiations will improve the chances of an

electricians and the AEU engineers' union, a development of considerably more importance from the point of view of employers.

#### Traffic strategy planned

Local authorities in the west Midlands of England want to spend £2.5bn over the next 20 years to ease growing urban congestion through a public transport strategy. The West Midlands Passenger Transport Authority warns that without a balanced package of transport spending congestion in the region could cost industry \$2bn annually by 2012.

#### Unions urge

one-day strike Britain's two largest Civil Service unions are urging their London members to stage a one-day strike as they and other unions step up a camweighting payments for working in the capital.

The proposed action follows the Treasury's refusal to increase London weighting payments for three years. The government says reforms in civil servants' pay have made rises in regional weighting unnecessary.

#### **Onshore oil** blocks awarded

Three onshore oil exploration blocks have been awarded by the Department of Energy as part of its fourth landward licensing round. Hillfarm Coal has been awarded acreage in the Strathclyde, Fife and Tayside regions of Scotland Hamilton Oil has a license for Merseyside and the Mersey Estuary and Brabant Petroleum received a block on the Isle of Wight.

#### Honda union seeks talks

The AEU engineering union is to press for recognition at the Swindon car-manufacturing plant of Honda, after securing a single-union deal at Toyota's proposed UK plants. Mr Bill Jordan, AEU president, said his union would be writing to the company asking for talks. a more accurate view of fine. They may be prepared to look ations in the the economical at their [homenion] policy in light of the fact that their two principle competitors have seen the competitive advantages of a partnership with the AEU." Nissan also has an agreement with the union.

## Liverpool action

Seven months of strife between Liverpool City Council and The numbers out of work for trade unions will end today year or longer jumped y when 760 striking white-collar 62,000 in the three months is Naigo members from the trea-October to 654,000 - the biggst sury and housing departments rise for more than eight yeas, return to work. The action was according to the Department part of a series of strikes and overtime bans by all the council's unions against redundandes. The GMB and TGWU general unions - representing the council's manual and transport Forkers - gave up in August.

#### Production of eer down

per production for the year eding in September was 4.45m barrels, a decrease of 25 per cent on the previous months. Production in Septuber was \$m barrels, 2.2 per cut higher than the same muth last year, but the Brew-Society said the underlytrend "continues to show market depressed."

# Labour details strategy for Europe union

unaccounted for.

By Ivo Dawnay, Political Correspondent

THE opposition Labour Party yesterday set out its battleground for today's House of Commons debate on Europe by challenging the government to clarif its positions on the key issues at the forthcoming European Community heads of government summit at Maas-

Mr John Smith, the party's treasury spokesman, alleged that the government's strategy was aimed at the management of its internal party conflicts "rather than by negotiating positively

to secure British interests" Outlining the goals Labour would seek in the negotiations, he insisted that the public had a right to know

what the government hoped to achieve at the summif.

Mr Smith said key objectives should be an agreement on the Social Charter of employment rights, more democratic controls over EC institutions and specific criteria over how to bring member states' economies together before a single currency is introduced.

Highlighting the talks on economic union he said that the government's position on a single currency remained "a mystery" as did its views on how to make the administration of such a currency politically accountable.

"We do not know what, if anything, the British government proposed on

this crucial area of monetary policy." Mr Gerald Kaufman, the spokesman on foreign affairs, took up the same theme when specifying Labour's goals on political union questions as an enlarged community subject to more democratic controls.

While the party accepted the government's position on the foreign policy and defence issues under debate, it was explicit in its readiness to see more powers for the European Parliament, he

The government, however, had not even mentioned the Parliament in the motion it had tabled for the Commons debate. "Our complaint against the gov-

ernment is that it goes to Maastricht and other summits with no specific policy proposals whatever," he added. Questioned on whether Labour could accept a federal Community, Mr Kaufman insisted that the word was unhelpful as in Britain it conjured more central control, as in the US, while on the continent it was taken as decentralisa-

"We said absolutely specifically that we are against a supra-national state."

Labour's vision of the community's future was laid out in its amendment to the government's motion, whereas the government had no clear objectives.

## use credit insurance

Companies fail to

By David Dodwell, World Trade Editor

MORE than half of UK companies are likely to be unprotected against default by their customers, according to banks responsible for the Britain's leading trade insurance broker.

This is despite the fact that the deepening recession has raised fears over bad debts. widened the experience of default, and increased prob-lems in getting paid by custom-ers, says the Credit Insurance

The survey of 100 companies with turnover of more than £50m a year, conducted in the second half of October, showed that 56 per cent of companies operated their sales ledgers on

unsecured terms. They did not take out credit

thought premiums would be too expensive. Companies who had not considered taking out credit insur-ance said they took legal action, made bad debt provisions, were careful in vetting customers, took bank references, or used debt collection services, to protect against loss

by customer default.

CIA also found 82 per cent of companies were more worried about bad debts than they were three years ago. One fifth of respondents said around half of their customers were failing to pay bills within the agreed credit period. Almost two thirds said they had more bad debts than three years ago. with small companies exper-

recession has now ended By Rachel Johnson, Economics Staff

THE TREASURY team yesterday clutched at the first overall sign of an economic recovery. It took just one quarterly rise in the gross domestic product (GDP) for Mr Norman Lamont, the chancellor of the exchequer, to say that the figure was "consistent with my forecast of a modest recovery in the second half of this year". To Treasury insiders, the news brought even stronger claims than the chancellor's: Technically, we are seeing the end of the recession," said one, commenting on the third quarter rise of 0.3 per cent in output-based GDP, which was the first quarterly increase since the second quarter of last year.
When the UK economy began to turn down last, summer the Treasury relied on the technical definition that there was not a recession until there had been two successive quarters of negative growth. Although Mr John Major, who was then chancellor, spoke of an "economic slowdown" in the summer, he waited until October to use the "R-word". According to the standard definition, the recession was not statistically official until the fourth quarter GDP figures

Lamont: expecting upturn were released in February. No such prevarication was shown yesterday. "We're not going to play games about how many quarters of positive growth constitute a recovery," said one Treasury official. In this, the Treasury has vagueness on its side. There is no "standard" definition of recovery. "Unfortunately, it's a judgment thing that gives politicians freedom to manoeuvre," said Mr Peter Spencer, economist at Shearson Lehman. While the textbooks will not

contradict the Treasury's talk of recovery yesterday, it seems there are plenty of economists who will. Some already argue that data more recent than the third quarter figures, such as October's retail sales figures, suggest a lapse back into negative growth in the fourth quarter – a double-dip recession.
"The chancellor's predictions of imminent recovery are already starting to lose their

credibility," says an economist at UBS Phillips and Drew. There are three commonly used definitions of recovery none of which is likely to apply to the 0.3 per cent GDP rise, accompanied by a 0.3 per cent fall in the non-oil economy. • very weak: quarter-on-quarter growth resumes

medium: a return to trend growth rates of 21/2 per cent - 3 per cent strong: a period of above trend growth so that the output lost in the recession is

"recovered". While yesterday's figures may indicate that the recession is bottoming out, they do not indicate, given the flatness of consumer spending, the housing market and factory output. that the recovery has begun.

#### into action. He has just spotted an elderly couple buying two cans of branded vegetables in one of Shaw's Massachusetts supermarkets. Wouldn't they prefer an own-label product, for a saving of 11 cents per

The lady peers at the tins and hesitates. "I'm a little bit leery of Shaw's," she confesses. Only the intervention of her less pernickety husband persuades her to make the swap. This is at the heart of what

Sainsbury is about in the States. At face value, it would seem simple to take an effi-cient UK food retailing opera-tion and implant some of those skills - such as a strong "own label" emphasis - into a US industry where profit margins are substantially lower. In reality, matters are more complex. Reasons why the British grocery chain should want to try are clear. The UK supermarket industry is concentrated; regional chains have been absorbed, and the three stron-

gest players - Sainsbury

Tesco and Argyll - control

about half the market. Sains-

bury has some room for geo-

graphical expansion, but the

process cannot go on forever. Superficially, it seems there is everything to be gained from transatlantic expansion. Last year, Sainsbury's operating margin was more than 7 per cent. while at A&P, a comparable US supermarket group, it was less than 3 per cent. Surely this presents opportunities? In truth, as David Sainsbury, deputy chairman, points out, this "profits" gap is misconceived. Costs of establishing supermarkets in the US are lower, and hence it is the return on investment which

# Shaw's, the New England supermarket chain owned by 's J. Sainsbury, whirls From High Road to Main Street

New Hampshire, Rhode Island

and its home state. Sainsbury

bought a minority stake in

1983, raised this in 1986 and

finally took full control in 1987.

between the groups is twofold.

There is a six-man J. Sainsbury

(US) board which takes "strate-

gic" decisions, which Lord

Sainsbury chairs. Then there is

a operating board, largely com-

posed of Shaw's people. Publicly, both David Sainsbury

and David Jenkins, who has

run the US business before and

after Sainsbury's involvement,

The formal relationship

ence between the US and the lets averaging around 28,000 UK is less marked, although Britain still has an edge. But there are plenty reasons for caution, too. Foreign retailers have suffered mixed experiences on US soil - ranging from the apparent success of Ikea, the Swedish furniture retailer, to the miserable ordeal of Gateway with its Hermans sportwear shops. The US supermarket industry, moreover, is flush with leveraged

lenged from the discount store sector. As a result, price-competition is fierce. This may partly explain Sainsbury's "softly-softly" approach. It was nearly a decade ago when the UK company alighted on Shaw's, an

buyout companies and chal-

describe a hands-off relationold-established, family-owned But scratch behind the business. Based in Massachu-English good manners and it

square feet, slightly larger sive than this suggests. than the typical Sainsbury Many of the changes have store, spread round Maine,

occured backstage. Both groups, for example, concede that Shaw's has been putting more emphasis on "category management" - a organisational structure that divides responsibility along product lines, and breaks down traditional relationships with suppliers.

In terms of internal computer systems Sainsbury has been quick to "loan" its own experts to Shaw's, accelerating development of the US company's new programmes. David Jenkins cites this as the area in which the UK parentage has been most beneficial, and claims that a year's development work has been cut out. Distribution has also tilted

really matters. Here, the differ-setts, it takes in some 70 out-would seem that the UK par-towards a UK-style pattern. dised design - are given many ent's influence is more perva- Perishable products have been of the prime spots. The aim is water warehouse, and the fresh produce distribution contracted out to National Freight

Corporation, another UK

The most noticeable change at store level is the attempt to push "own-label" produce. In the UK, where more than 40 per cent of sales are own-label. this is a key part of the group's success, tying in suppliers and giving the chain the benefits of bulk buying. In the US, own-label - usually called private label - is less significant, and 15 per cent of sales would be

Nevertheless, Sainsbury/Shaw's is trying. Walk round the stores and Shaw's products - fairly stylishly packaged in a clean, standar-

to get around 800 own label lines in the stores by year-end. In some areas, like dry groceries and dairy, the hope is

that one-fifth of sales will be

"own label". Getting to this position has not been straightforward. For a start. Shaw's, like many US supermarket groups, already sold a "private label" line of products. These were supplied by Topco, an old-established Illinois-based co-operative owned by some 35 store chains and wholesalers. Topco declines to comment on the situation, but some of its products have clearly been sup-

planted - although in lines which do not compete with an own-label product, the co-operative remains a supplier. As for the big US "brand"

noted an upturn in its own private label sales recently, attributes this to the economic environment, and is dubious about the long-term potential. On other fronts, the degree of interaction between Sains-

West Coast retailer which has

bury and Shaw's has been mixed. Matters like store lay-out have been subjected to Sainsbury analysis Shaw's views on the local market clearly dominate.

Some store managers adher to the relatively cluttered, promotion-driven aisles, familiar to US customers. Sainsbury, it seems, tends to prefer a

cleaner look. Common purchasing, which seems an obvious synergy, can be problematic, too. US buyers want waxed apples, whereas British consumers spurn such immaculate, polished fruit.

Sainsbury admits that some cost inefficiencies are simply the problem of doing business in the US - from the much lengthier store opening hours to the larger range of goods which a US supermarket is

required to carry. All this is being played out against the difficult New England economy - a factor which has pluses and minuses. There are the obvious profit pressures: Shaw's recently reported an 11 per cent fall in interim operating profits to \$25.6m (£14.4m). However, recession seems to have encouraged a swing to private/

own label nationwide. As for the future, David Sainsbury claims that Shaw's expansion so far has been selffunding. "There may come a time when we'll want to put more money into Shaw's," he predicts. And what might be a catalyst? A cessation of opportunties in the UK, he suggests, turning the discussion full cir-

he Shakers and the Tuners might sound like pop groups from the 1960s, but for Brian Small they are two contrasting types in a neglected group of executives in British manufacturing

industry.

Small, managing director of UK consultancy Ingersoll Engineers, believes British manufacturing suffers from too many tuners and not enough shakers among managing directors of operating companies within large industrial groups. Shakers are people who are not satisfied merely with tinkering when they believe their organisa-

tion needs to undergo fundamental change. By contrast, tuners are happy to stick with incremental improvements.

# Nowhere near enough shaking going on

Andrew Baxter complains that operational managers are too timid in their approach to change

For every chairman of a big plc there are perhaps 50 operating company MDs responsible for the design, manufacture, sale and service of products. More shakers are needed at this level in the 1990s. says Small.

Last week Ingersoll published a survey\* of attitudes towards change among operating company MDs which produces encouraging and disturbing findings in roughly equal measure. First the good

news. Questioned on what drives them to make changes, the 150 respondents said financial performance was paramount. But customer expectations, quality and new product introductions came next, and all three were forecast to become more important in the next

As for the key factors to make change successful, "soft issues" such as clear communication, and commitment at all levels, scored

much more heavily than obvious "hard issues" such as detailed initial planning. Ingersoll concludes that MDs are developing clear, even visionary views of what will make their companies competitive. However, when questioned on

the benefits sought from change, there was a far greater emphasis on short-term financial control than on medium-term growth. And there seemed to be a shortfall between effort and achievement: 86 per cent

of MDs said their companies had undergone important organisational change in the last two years but only 40 per cent rated their organisation as good at meeting

customer needs. Small believes the problem lies in the approach to implementing change. Two-thirds of respondents took a cautious approach, preferring incremental change to major reorganisation, and some of the comments picked up by the survey

indicate why. "Until the company has been

sold, it's difficult to be more than short-term focused," said one MD. Over the past five years, a third of the operating companies had changed hands, and nearly threequarters of MDs had changed jobs. Little wonder that MDs leave change to their successors. Small believes that clear method-

ology is required to make shakers

out of tuners. Given that many Free.

clout and have fought "own

pockets of resistance," con-

Talk to suppliers and it is

clear Sainsbury has used some

pressure. But Tom Carvin, who

runs Keebler, the US snacks

and cookies arm of United Bis-

cuits, will not give ground:

"The big reason not to do 'own

label' is that you make less

money and put something in

From a customer viewpoint,

"own label" is a gamble.

Americans have been down

this road before, and perceive

house brands as lower-quality.

Sainsbury is quick to stress its

supplier specifications, and

hopes that once a customer

starts buying he will be

hooked. But other supermarket

chains are sceptical; Safeway, a

competition with yourself."

cedes David Sainsbury.

MDs arrive in their jobs from a more functional role, he would like to see an "MDs' club" and specific business school courses which could help new MDs take a less cartious attitude to change.

Ingersoll's straw polls suggest that retaining what President Bush once called "this vision thing" is considered more important by French and Italian MDs than by their British counterparts. "There is more pressure in the UK for an MD to be cost-driven, partly because that's what the boss tells him to do," says Small.

# Good news for the telephobic. From November 27th you can pick up a prospectus by hand.

So, some of you couldn't bring yourselves to call up.

Well now you can call in instead. Because starting from Wednesday November 27th you can collect a prospectus at most High Street Banks. (Each one contains an application form too.)

But if you did register earlier, you will be sent a prospectus and application form over the next few days. So you can relax.

Not for long though. Because either way, if you want to apply for shares you'll need to complete an application form. Then you'll have to return it, carefully following the instructions on the form. Most banks will need the form before 3.30pm, Tuesday December 3rd. Otherwise the final deadline is 10am, Wednesday December 4th.

Which is one message that we hope all telephobics will be You could buy a bit of BT. receiving loud and clear.

#### Dido and Aeneas THEATRE DES

CHAMPS-ELYSEES

The British mezzo Della Jones has just been enjoying a season in Paris. At the Palais Garnier she sang Handel's Agripping on November 18, with John Eliot Gardiner and the English Baroque Soloists, and on November 25 she will give a recital at the Théatre du Châtelet. Earlier I caught two of the four performances she gave of Purcell's Dido and Aeneas at the Champs-Elysées. Marc Minkowski conducted; Les Musiciens du Louvre provided the vocal and period-instrumental ensemble.

Jones has recently recorded Purcell's Dido. Here, however, she was also singing the opera's anti-Dido, the Sorceress. (She has performed this double-act already in Poland, and will repeat it next month in Bath.) Always vehement, commanding, forthright, she has the voice to show the correspondences and differences between the two roles. The same virtues illumine either role: firmness of line, sure diction, eloquent chest register and thrillingly precise divisions. As the Sorceress, she adds a brilliant upward flourish to the line "to storm the lover on the ocean." Next, as Dido, she adds an equally scorching embellishment in her final dismissal of Aeneas. Then she returns to the noble, long-lined simplicity with which she had began Dido, lighting with words "no trouble" with wonderfully tender

Jones was singing both roles from the pit, while Mark Morris was dancing both onstage. I reported on Morris's Dido here when it was new in Brussels in March 1989, since when it has also triumphed in Boston and New York. The central idea, of Morris himself taking the two female lead roles, is still marvellous. He doesn't fine down or prettify his behaviour in some stilted notion of femininity; he gives both roles massive power and

authority. But this Dido is an ensemble, not just a star vehicle, Dido is never alone. She involves Belinda and her courtiers in both her first air and the Lament; and they continually address her. The coven of witches perform horror-comedy visions of hell at the Sorceress's behest, and their mocking versions of lovein-death, though hilarious, are the most chilling moments in the piece (you kiss your lover, then slit his or her throat). The multi-layered musicality with which all this is achieved is awesome. Morris has provided a great deal of sign language throughout, and he fits it to the music in gorgeously

sculpted phrases. I did not greatly admire Minkowski's account of the score. The overture, played at great speed by an instrumen-tal ensemble with little bass sound, sounded like an LP being played at 45rpm. He then kept decelerating until the mourning lambs and trochees of the final chorus sounded mannered. But these Paris performances were warmly applauded; and it was good to see how Della Jones and Mark Morris both blew each other kisses in their final

Dido and L'Allegro, il Penseroso ed il Moderato are Morris's two most British works by virtue of their scores - and it is sad that they have triumphed elsewhere but have not yet been seen in Britain. There are hopes, however, that Dido may be brought to the 1992 Edinburgh Festival.

Alastair Macaulay

**TELEVISION** 

# New programmes for winter nights

nd still they come, the new series for this autumn well, all right, winter L season. Almost every night during the past week has produced one, two, or three new series, and that means genuinely new, not merely the latest batch of some dog-eared programme, running since the year dot, which has the word "New" tagged on, like a packet of Omo, every time it reappears. The programmes reviewed here really

Wednesday: Snapshots is a Channel 4 series which "takes famous people back to meaningful places from their past". Cartoonist Ralph Steadman was the first subject, the town he returned to was Salcombe, and his reason for being there 35 years previously had been National Service. Steadman served on a radar station, took a correspondence course in drawing to relieve the tedium, and laid the foundations of a life quite different, by the sound of it, from what might otherwise have been. Channel 4 deserves our gratitude for ignoring the obsession with 45 and 60 minute slots and regularly producing short documentaries: the 12 minutes or so at the disposal of producers Josh Hall and Eric Harwood was enough to let Steadman make his points and there was never a chance of boredom. In tonight's programme Bob Geldof goes back to Dublin and next week Christine Keeler returns after an absence of 30 years to Wraysbury.

Thursday: Though it starts with the advantage of starring Dawn French, BBC2's Murder Most Horrid is neither as funny as it thinks it is, nor as funny as it should be. There are occasional good lines. When police woman Dawn says on the phone "Mother, I am not going to lock up your neighbour because he has stone cladding" that is a nice English joke. But, as with an awful lot of British television comedy, it is difficult to avoid the feeling that this one could have been improved by hard work. We would surely have laughed a lot more if only the writers had been told to go away and

polish and revise with the dedication of their American counterparts, or John Cleese and Connie Booth when endlessly re-writing Fawity Towers.
That applies doubled in spades to

the BBC1 series An Actor's Life For Me in which John Gordon Sinclair stars as an inept and over ambitious actor. The belief seems to be widespread in British television that if a sight gag is funny the first time it will be twice as funny the second time, and so on. Thus in this opening episode we saw the actor's cupboard full of Doberman cosmetics. sent as a "residual" each time some awful commercial was repeated, not once, not twice, but three times, and each time the embarrassingly badly manipulated laughter track was turned up louder - sure sign of an anxious producer

In the opening episode of Secret

History (also C4) Jeremy Brickhill investigated an attempt to kill him some years ago in Zimbabwe and uncovered stories of all sorts of weird and shady plots, mostly hatched with South Africans, supposedly involving everything from poisoned underpants to a set of exploding floodlights which were meant to assassinate Prince Charles at the time of independence. All quite credible, of course, when you remember the American plan to kill Fidel Castro with an exploding cigar. But although it was a matter of life or death to Mr Brickhill it seemed less crucial to the rest of us. Tomorrow's programme is about mass murder in the Ukraine

Friday: Cats on BBC2 opened with pictures of a cat playing with a mouse, behaviour which I believe has never been properly explained (tenderising the meat, teaching kittens to hunt, and all the other theories have been discredited - sheer cruelty seems the likeliest answer) and which was never referred to in the programme. The opening words asserted that "The cat is a creature beyond compare, no animal has a character more complex" which made you wonder whether they had ever come across men, dolphins, or apes. The presenter, Roger Tabor,

who appears to be attempting an impression of Michael Wood imitating David Attenborough on speed, then declared "This is Madison Square Garden" presumably in order to sell the series to the Americans because, five seconds later, he went to Egypt and we heard not a word about the US for the rest of the pro-

Tabor will probably be declared a TV natural like other show-offs such as Magnus Pike and David Bellamy, which means that many of us will be so irritated by his antics that we shall not watch programmes which we otherwise might. For me the voice delivering the commentary on the new C4 series Nature Perfected about the origins of the garden, falls into the same category.

Saturday: remains, generally speaking, as much a wasteland for the moderately intelligent viewer as it ever was, though last Saturday we did get five hours on homosexuality from BBC2 in Saturday Night Out. The historical summary at the start of the evening had some good tongue in cheek juxtapositions and jokes ("Only room for one queen at palace" said the caption over the news clip of Commander Testrail leaving) and of course The Naked Civil Serpant is a superb piece of work, but it is 16 years old. There are no new series of note on Saturdays.

Sunday: At first it seemed that the boom shadows on virtually every face in the Biteback studio must be some sort of in-joke, but since Julian Petiffer never referred to them you had to conclude it was sheer lack of expertise. Much the same applied to the programme in general. Those who have always believed that television is a good place for television criticism will be disappointed at this new afternoon programme once a month on BBC1. Much in television demands attention: the effects of the ITV franchise debacle on programmes, the review of the BBC charter, the perpetual attacks on "bias". But rather than sink its teeth into one of these the first Biteback went for a series of flea bites: an

epileptics' pressure group which dis-

likes the portrayal of epilepsy on Casualty, the police specials who dislike the portrayal of specials on Specials. Surprise, surprise: no special interest group ever liked its portrayal on television. Worse, the programme ended with one of those pointless studio shout-ins, this one featuring political activists who reckon the BBC is biased and BBC people who disagree. "Oh yes you are" and "Oh no we're not" is no substitute for a rigorous investigation of the ethics of television journalism.

The consistently high standard of BBC1's family serials at teatime on Sundays is remarkable. Episode 1 of Merlin Of The Crystal Cave had peculiarly copious quantities of soft focus, so that it looked as though it (maybe that was the idea) but it had bags of narrative, good locations. and a child actor, Thomas Lambert, playing the young Merlin with whom younger viewers could readily identify. This looks like the acceptable face of sword and sorcery.

The more adult drama. Ashenden. on the same channel later in the evening is yet another of those ever so carefully produced period pieces with steam trains and black toques which challenge you to spot the anachronisms, in this instance bright green 1991 peas and a miniature bottle of Perrier during the First World War. With another good performance from Harriet Walter. as the exotic dancer whose lover the British secret service want to lure across Lake Geneva, it was entertaining enough, though too often you found yourself remembering what a splendid storyteller Maugham was. Better really to have thought what splendid television you were watching.

Monday: Lifesense on BBC1 is another of those wildlife series in which you are so struck by the technical wizardry (how do they train house flies to make home videos. and who makes the teeny weeny camcorders?...) that you tend to miss a lot of the content. This is not too important, however, because

An impression of Michael Wood imitating David Attenborough on speed: Roger Tabor, presenter of 'Cats'

these days such series rarely rise above the "Just Fancy That" level of the old Tit Bits approach to journalism. There is never more than a snippet of one thing - clothes moths, vultures, house dust mites -

before we are on to another. Technically it is astounding, but its assumptions about your mind are deeply irritating.

#### Belfry

**BUSH THEATRE** 

I have never been to the Irish town of Wexford, even for the festival. It seems a sadder, but also less artificial place than the festival reports suggest. At any rate, it now has additional reason for being on the

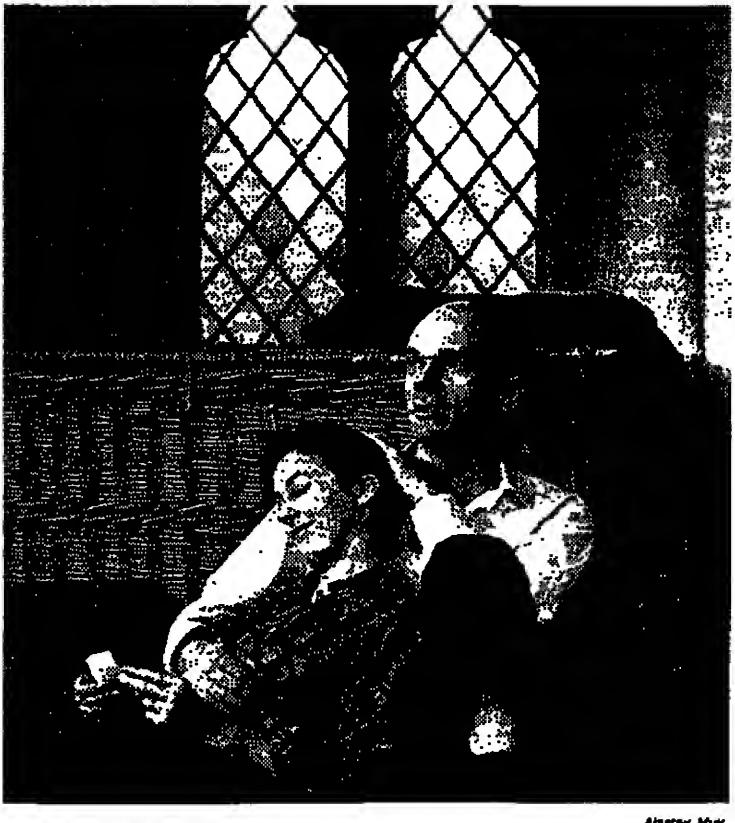

Billy Roche's Belfry completes his Wexford trilogy. The first play, A Handful of Stars, was set in a snooker hall: the second. Poor Beast in the Rain, in a betting shop. Belfry is set in part of a parish church. I have read and admired the first two. but not seen them. But Belfry requires no prior knowledge and can stand in its own right.

The piece is a wry love story that is by no means sentimental. Artie, the sacristan and chief bell-ringer in the church, recounts his love for the married woman. Angela, who came to help with such matters as the flowers on the altar. The play moves backwards and forwards in time as the affair is re-enacted.

It is not in the Eloisa and Abelard vein, since a sacristan is not ordained. Nevertheless, this is a very catholic place. Wexford indeed seems full of people living together who are not married. It is also full of stories of those who have left in disgrace. Catholic repression seems to have bred its own set of sins.

The town is very gossipy: there is a woman in the church who is said to be praying daily for more information: i.e. more tittle-tattle. And from the window of the belfry, which looks down on the town, a great deal can be seen.

The church is also a sanctuary. A young altar boy, Dominic, who has been thrown out of home, is allowed to shelter there. For a while Angela's husband is unaware of his wife's affair. It is Artie's unseen mother who gives the secret away, though

Ingrid Craigie and Des McAleer

the blame is attached to Dominic on the grounds that he must be lealous. By the end Artie is beginning an affair with somebody else and tells us about it. So is Angela, but we do not know with whom. That is the final twist. How can she manage it in such a small society and what is her motivation? Nobody knows. The whole story is beautifully told and not without jokes. Roche has favourite themes for his background.

like sport and pop music. Artie tells of his prowess at snooker and Dominic plays "I can't get no satisfaction" on the church bells.

Some of the acting is outstanding: notably Ingrid Craigle as Angela and Des McAleer as Artie. The direction is by Robin Lefevre, whose staging of the belfry is a triumph.

Malcolm Rutherford

in a new choreography by William

## The Liverpool Oratorio

CARNEGIE HALL, NEW YORK

The Liverpool Oratorio by Paul McCartney and Carl Davis had its New York premiere in Carnegie Hall on Monday. The place was packed; security was tight; and at the close the ushers tried in vain to enforce the house rule against unauthorized photography: the hall was glittering with flash as if under a Fourth of July fireworks display.

The oratorio has had a rough ride from music critics, but in New York I found its honest, easy communicativeness more emoyable, and more moving, than most of the new music dully laborious or conscientiously ingratiating - that the month has brought. McCartney - does it need saying? - can write good tunes, and he sets words well. Davis in his easy

eclectic way is a very skilful composer and orchestrator. So long as the oratorio sticks to narrative it works well - Paul's birth in Nazibombed Liverpool, his childhood, his schooldays (at the Liverpool Institute, whose motto Non nobis solum sed toti mundo nati. "Not for ourselves alone but for the whole world are we born", set to chorale phrases. runs as a motto through the composition), and his marriage and his marriage problems. But the closing movements - "God is good, And He wili be our saviour" - turn mawkish, and Davis's ready recourse to brasses and bells starts to pall. The choirs were local the Boys

Choir of Harlem and the Collegiate

Chorale. The Royal Liverpool Phil-

of the Liverpool premiere, with the exception of the soprano: Barbara Bonney took over from Dame Kiri, and she was more direct, less mannered. Jeremy Budd's trebie rang out strongly and truly. Sally Burgess and Willard White - Britain's latest Fricka and Wotan - were acclaimed. (Mr. White had not been heard here since he left the City Opera 16 years ago.) As the protagonist, Jerry Hadley gives the performance of his life with his free, verbally sensitive delivery.

## BBC Symphony Orchestra

**ROYAL FESTIVAL HALL/RADIO 3** 

It would be interesting to know where the BBC Symphony Orchestra features in the South Bank's design for the future. This is still the orchestra that puts together the most adventurous programmes and yet it does so often to paltry audiences, of which Monday's third of a house full was probably some way from being the worst. The concert was an all-Russian

one, with no obvious crowd-puller. The BBC has done as much as any body to introduce us to the new composers emerging in the Soviet Union, such as Firsova and Smirnov. Another is Nikolay Korndorf, whose music is said to sink its roots deep in old orthodox liturgy and Russian folk song, although some listeners may sense a different connection in

> performances of this revival of Harold Pinter's play, directed by

Gordon Edelstein and starring

Lindsay Crouse and Roy Dotrice.

Closes on Sun (Criterion Theater,

his Humn III. written last year. On the quiet I suspect Korndorf is a signed-up member of the Minimalist Tendency. Even Philip Glass would hardly dare to write a 40-minute piece with as little activity in it as Hymn III. A solo trumpet intones a chant-like melody, followed by a wordless soprano voice. The phrases overlap in the orchestra until the single event of the work is reached: there is a change of key. Then the music fades away, leaving the singer to declaim a few lines from The Revelation of St. John. It is all mystic and tranquil nothingness.

From whatever source Korndorf takes his inspiration, it is not the Russian romantics who filled the rest of the programme. The Third Symphony of Rakhmaninov has

never really won the hearts of audiences and Alexander Lazarev's performance showed little in the way of affection for it. only a few red-blooded climaxes. The BBC strings are unlovely in this reper-

Nor is Skryabin's Piano Concerto, a tuneful and appealing work, heard that often. Although Artur Pizarro and Lazarev did not always hold it together convincingly, Pizarro has the naturally big tone and rhapsodic style for this pre-Rakhmaninov concerto, while also catching the delicacy in the piano writing, which is one of its most attractive features. hope more people were listening at home than were in the hall.

# Parliament seeks a deal

BRITAIN is a willing and fully paid-up member of the European Community. It. will conconstant evolution. That is Mr John Major's view, and there is no reason to doubt it. The debate that begins in parliament today should serve to demonstrate that there is overwhelming support for the prime minister's approach to the EC, although headlines and Labour attacks may give a different impression.

The truth is that all three national political parties agree that Britain's place is at the heart of Europe. They all favour constructive negotiation of the proposed new treaties on economic and political union, with the overriding objective of reaching agreement at Maastricht next month. The motions to be debated today and tomorrow illustrate this. The Liberal Democrats use the most federalist language. Labour's phraseology is more enthusiastic than the government's. There are important differences between the two larger parties: Labour favours qualified majority voting on social affairs while the government seeks a deal that "avoids intrusive Community measures in social areas which are matters for national decision". Yet seen from a broad historical perspective the three positions are remarkably similar. Maastricht is regarded by most of Britain's elected representatives as an opportunity, not a threat.

#### Bipartisan tribute

That this should be so is a tribute to both Mr Major and the Labour leader. Mr Neil Kinnock. (The Liberals have long favoured the EC: Mr Paddy Ashdown did not need to bring his party round.) As to Mr Kinnock, whatever doubts may be held about his motives, he deserves credit for leading his party away from the mindless anti-Europeanism of just three years ago. Today Labour appears to be wholly involved in continental European affairs. It is as least as much the "party of Europe" as the Tories ever were.

Thanks to Mr Major, the opportunity to become unequivocally associated with

Europe once again. When he became prime minister almost exactly a year ago they were more at odds with themselves than they are today. The out-going prime minister, Mrs Mar-garet Thatcher, was on the wrong side of the divide. Britain really was isolated within the EC.

#### Good relations

that. One of his first declarations on taking office was to the effect that Britain wanted to come in from the cold. He has established good personal relations with a number of other EC heads of government. He has sought to heal the wounds in his party by consulting his own cabinet, and the whips, at every stage of the run-up to Maastricht. Faced with the task of addressing three audiences (the other 11. his own party, the country) at once, he has assembled a list of objections to the current draft of the proposed political union treaty that should attract the widest possible support, while not being so narrow as to deny him room for manoeuvre.

Some of his points are pure politics, such as the emphasis on the word "federal"; others such as insisting on a continuing role for Nato, or opposing unnecessary extensions of EC competence, are perfectly defensible positions of principle. It is not anti-European to say that what is wanted is an agreement, while declining to submit to this or that particular addition to the powers of the European Commission. It is not European at all simply to accept everything in every draft laid down by others. There is likely to be an elec-

tion before any treaty agreed at Maastricht is signed, and another before Britain must make a final decision on joining a single-currency union, if there is one. Anyone who disagrees may stand as an anti-federalist or whatever in either of these elections. This week opponents of the EC will be able to present their arguments in the Commons. although, barring accidents. their numbers are likely to be kept low. That should settle the matter. There is no case for a referendum. Parliament will have had its say; the people

will soon have theirs.

Britain's problems. Even on the dissident left, many passionate enemies of the "rich man's club" have seen their objections collapse as dramatically as the Berlin wall. Mr Tony Banks, the MP for Newham north-west, for example, now says the prospect of an enlarged Community embracing the east makes a federalist goal not only feasible, but desirable.

# Trim or treat

U-turn. Like Mr Douglas Hurd, the foreign secretary, they continue to claim that the turnabout is mere opportunistic "candy floss", targeted at the coming election.

But some less partisan critics – both Labour and Tory – argue differently.

They say, instead, that Labour's problem is that its actual differences with the Tories will end up, to borrow Mrs Thatcher's description of Sir Geoffrey Howe, as "more of style than of substance" To deflect attention from its

similarities with the Tories Labour repeatedly stresses the contrast in tone between its wholeheartedly pro-EC approach and the half-hearted language of the government. Last week, Mr Kinnock used a lunch with EC ambassadors to stress this point, but also felt obliged to include his commitment to fight for national interests. "We would not be a walkover, but we would be good partners in Europe, negotiators, not spectators," he said.
It is this difficulty in building a credible bridge between the national and the Community audience that is the central quandary for both main parties in today's debate.

tance of the need for a "social

dimension" to the single mar-

ket. By supporting qualified

majority voting in the Council

Labour believes its trump card lies in its warm accep-

of Ministers not just for trading and farm issues, but also for social policy-making, it is taking a mainstream European position while clearing the path for a new regime of employees' rights that is unacceptable to the Tories.

Labour also goes marginally further than the government to address what it describes as "the democratic deficit" in Community institutions. Mr Kinnock has no difficulty in allowing the European Parliament some rights to initiate laws and substantially greater oversight of the Commission.

On economic and monetary union, Labour's support for a single currency is markedly more explicit than the government's public equivocation. Yet the leadership also takes care to hedge it with worthy, if not wholly credible, conditions for "real convergence" between the EC economies. In place of Tory budgetary criteria, Labour's provisos relate to levelling unemployment rates, aided by big increases in regional funds and wholesale reform of the Common Agricultural Policy.

More revealing, perhaps, are the points where the views of the two main parties converge. With an eye on public opinion at home, Labour shares the Tories' determination to keep Brussels bureaucrats away from defence, foreign and security policy and from meddling

with Britain's right to enforce its own immigration controls.

Its caution is also evident in what it will not say. Pressed to reveal whether the party would join the Tories in demanding an "opt-out" clause on a single currency or would sign the proposed "solemn declaration" binding it to that goal, Mr John Smith, the shadow chancellor, is evasive. He points out that the option not to go ahead is already implicit in the rights of national parliaments to vote on the question at a later date.

Similarly, Mr Gerald Kaufman, the shadow foreign secretary, waves away the controversy over the "F-word" - an explicit statement in the treaty text on political union that would define a federal goal for the Community. "Most of our continental colleagues define federalism as decentralisation," his deputy, Mr Robertson, says. "That is how we see it."

If these policy areas are deliberately fuzzy, Labour's overall strategy is clear. Its cal. decade ago, the figure was 55 culation is that if Mr John Major fails to sign at Maastricht, the prime minister can be castigated for jeopardising the country's future with the same obstructionism that characterised his predecessor. If he does strike a deal, he will be attacked for squandering goodwill for the UK in ultimately fruitless argument.

Mr Major's obvious defence that he fought for the best deal for Britain - will be disparaged as the claim of a man who put party unity before the country's best interests.

For the moment at least. problems of party discipline do not afflict Labour. A meeting last week of the hard-left Campaign Group suggested that fewer than 20 of his colleagues agree with Mr Peter Shore, a former cabinet minister, that EC exchange rate constraints will prevent Labour having the option of devaluing sterling to finance its economic recovery programme.

Most shadow cabinet members dismiss this concern. Some senior figures want more public emphasis on Labour's conditions for accepting a single European currency. Recent opinion polls, they say, seem to indicate that the public continues to express more confidence in the cautious, nit-picking Tories on EC affairs.

Public opinion abroad is more favourable. Mr Peter Schultz, London director of Germany's Friedrich Ebert Foundation, which has close ties to Germany's SPD opposition, concedes that German social democrats are now convinced of the "irreversibility" of their British comrades' change of heart. But he warns that their approach still falls far short of federalism.

The greatest concern of Labour's foreign friends is that: the party's grassroots supporters now believe that the EC will finance all their dreams of enhanced public services and lower unemployment. Labour's leaders deny the charge, claiming the party has an awareness that a place in Europe's first division depends on homegrown economic strength.

The critical change is that it now believes this must be achieved in collaboration with, not opposition to, the EC. For Labour's current leaders, at least, the option of an anti-Eu-

ropean posture has now been

# Lotta bottle, little rivalry

Tony Jackson on the lessons of a proposed UK milk market deal

ast week's proposed £350m purchase of Northern Foods has a special significance for students of UK competition policy. The milk market, one of the most bizarrely complex and regu-lated in the UK, is showing signs of loosening up. The big dairy companies are flexing their muscles accordingly.
If the Northern/Express deal terday's milk used to be some-

goes through, the UK's five biggest dairy companies will have 70 per cent of the milk market between them. A nor cent Much has hannened to the market in that time: falling consumption, the decline of the milkman, better distribution and so forth. But much of that has resulted from the weakening of governmental control. The government, therefore, bears a special responsibility for the result. the UK is still in the hands of

The supply of raw milk in a producers' monopoly, the Milk Marketing Board. The restrictive practices of the board are under fire from several directions, notably Brussels. But the pace of change has proved slow; so slow, indeed, that Mr Charles Runge, the board's reforming chief executive, resigned last week in protest.

In normal commercial terms, the system operated by the board is restrictive to the point of absurdity. The price it charges depends on what the milk is going to be made into, which is arguably none of its business. The price is also sustained ultimately by the European Community, based on a floor price for butter. Perhaps worst of all for the board's big customers, there is no discount for volume. Buy one gallon or a million, the price is the same.

Historically, the dairy companies were compensated for this by a further absurdity. Until 1984, the UK government sat down every year or so and fixed the price which the public paid for a pint. There were no discounts here either. The dairy companies charged the same for a million pints dellyered to Sainsbury as they did for a single pint delivered to the doorsten.

When that system was aban-

doned, the big retailers were

instantly able to increase their hold on the milk market by demanding and passing on price reductions. Ten years ago, 90 per cent of the milk drunk in England and Wales was sold by the dairy companies themselves through their own milkmen. The figure is now 65 per cent and falling. For the dairy companies, getting bigger through merger has been a natural response. Nor has pricing been the only pressure. In the old days, the fragmentation of the dairy industry was based largely on the fact that milk could not sensibly be delivered over a radius of more than 50 miles

from the dairy. That has changed as well. A dairy executive explains: "Milk keeps better than it used. to, because it's better pastenrised and we've reduced the bacteria count at the farm. Besides that, from the point where it leaves the cow it probably doesn't come out of the chill chain until you take it out of the Tesco fridge. Yes-

thing you didn't want to

drink. Now it's OK four or five days later." For the dairy company, this also means cost. A new hygienic milk-cartoning plant on the scale demanded by the supermarkets costs some £25m. The head of one of the big processors says: "For me. the whole process of amalgamation is all about the decilne in doorstep delivery and the fact that you end up with dairies half empty. A small independent dairyman with an old dairy is looking at the cost of a new bottling plant. Frankly, he doesn't do it."

The process of change has certainly further to go. The next big step might be for the Milk Marketing Board to grant normal commercial discounts. The board is adamant that this will not happen. Whether it can hold out is a deeply complex question: but the dairy industry, at least, assumes that change must ultimately

COMP. Similarly, the force of the board's cartel rests on the support provided for the milk price by Brussels. The prospects for reform here are equally contentions: but rising resentment worldwide against agricultural subsidies argues for eventual change.

Given that mergers in the dairy industry are therefore likely to continue, the government needs to keep a sharp eye on the consequences. In the brewing industry, recent intervention to promote competition has resulted not only in a wave of amalgemation but in a sharp jump in the real price of beer.

So far, that has not happened in the dairy trade. Since the price of a pint was deregulated in June 1984, the real price of a pint on the doorster that is, from the dairy companies themselves - has gone up by 5 per cent. But there has been a powerful control in the form of the supermarkets. Their price since deregulation has fallen in real terms by 10 per cent.

It might, therefore, be argued that concentration among the milk suppliers is not a problem, since the supermarkets are there to ensure competition. Whether the government ought to rely on a retailing oligopoly in this way is an open question. It is also perverse and faintly worrying that when the government acts to remove barriers to competition, the result should once again be a fall in the number of competitors.

## Japan's rising trade troubles

ONE MONTH'S rise in Japan's trade surplus may send chills down the spines of Japanese government officials; but three consecutive monthly rises in its surplus with the US are enough to cool US-Japanese economic relations. Yet this mutual obsession with Japan's surplus makes no sense. The US may well be correct when it says that foreign producers are prevented from competing fairly in Japan's domestic mar-kets. Yet US officials who cite the surplus as evidence of these barriers only expose their economic illiteracy.

Of course, the trade surplus is an obvious political target. The value of Japanese exports exceeds the value of its imports; foreign exporters believe they are discriminated against in the Japanese market; ergo, Japan's trade surplus is evidence of this unfairness. The argument is simple - but flawed. The trade surplus

measures the difference between export and import values, which, in a world of internationally mobile capital, is determined by the difference between national savings and domestic investment. The deficit does not indicate

whether imports are high or low as a percentage of gross national product, compared to other countries. In fact, Japan does have a lower share than the US of both imports and exports in total GNP. But this may reflect differences of location and endowments as much as obstacles to competition.

#### Real barriers

The low level of Japanese intra-industry trade and the fact that import penetration is lower in those industries where informal links between companies are most common do suggest that barriers exist. The Japanese government has taken steps to improve the access of foreign companies to its markets in recent years. It has liberalised the retail distribution system and made competition for government procurement contracts more open. Yet, the OECD argues in its latest survey of Japan, it has still not gone far enough. It should apply competition policy more vigorously and ease Japan's restrictive land zoning laws which raise lands prices while deterring foreign invest-

All the same, the government's failure to push deregulation far enough is unrelated to the re-emergence of a rising trade surplus this year. Japan continues to run a trade surplus because it saves more than it invests. The difference is exported to make up the shortfall in saving in the US and now in Germany too.

#### Domestic investment

The fall in Japan's current account surplus, from 4.5 per cent of GNP in 1986 to 1.2 per cent in 1990, occurred because the US demand for foreign savings fell while Japanese savings were soaked up by a rise in domestic investment. The consequent appreciation of the Yen made imports cheaper and reduced exports. Between 1985 and 1990, Japan had faster import growth and slower export growth than the US and Germany.

Japan's surplus is rising once more. The OECD forecasts that it will reach 2 per cent of GNP in 1992. Japan's economic slowdown has depressed capital spending and re-opened the gap between domestic savings and investment. Slower growth has also reduced import spending.

The rise in Japan's surplus has mitigated the rise in world real interest rates provoked by the increase in both the US and German budget deficits. The US has been the most vocal in its calls for lower real interest rates to ease this capital shortage. It makes no sense for it, simultaneously, to complain about Japan's surplus.

Yet complain it does. Consequently, the pressure on Japan to reduce its surplus is building once more. But Japan should not repeat the mistake of easing monetary policy by more than is domestically justified. The current slowdown arose because it did just that in the late 1980s. If the surplus is politically embarrassing, it would be better to liberalise the land zoning laws, in order to ease the pressure on private individuals to save to buy a house, and to increase government spending on improved public infrastructure. Measures like this would reduce savings and raise imports, while not risking a renewed bout of asset price inflation.

■ When you see record companies like Chrysalis selling out to big business, you don't need wrinkles to feel old. A pioneer of the independent labels, Chrysalis was founded by 23-year-old Chris Wright because the establishment giants were not recording his type of music. Remember My

boy lollipop, The lonely bull, and Jethro Tull...? Wright

was one of the first to exploit British rock in the 1970s. Today, nearly 25 years on and having made much money, he is selling to Thorn EML one of the giants he danced rings round. He will remain nonexecutive chairman for a while, and the old company

will go on conducting a medley of music-related activities. But the "indie" record business is nowhere near the fun it was. Chrysalis Records is losing money. And having sold it profitably, Wright is likely to follow Richard Branson and Andrew Lloyd Webber by taking his group private.

So what went wrong Certainly Wright knows good music when he hears it, unlike his fellow beardie Branson whose cloth ear ensures that his colleagues keep him away from Virgin Music. But he lacks Branson's organisational flair, and financial pressures have made him bow to the giants' policy of buying up small rivals and the kids' ears with them.

Some day, perhaps, independent labels will wax again. But by then even Wright, already 47, may be too old to re-stage his 1970s performance.

#### Sum hopes

■ From red to green. Two Russians, met by UK nuclear scientist John Gittus on a visit to Moscow, excitedly told him that they and their fellow citizens would be richer by 6.000 roubles apiece from the change to a market economy.

## **OBSERVER**

The government had totted up the worth of all the state assets, the two explained, and the combined values when divided by the population came to no less than 6,000 roubles a head. What's more, they added, "by some calculations, which work out what the assets would be worth to replace with Western assets. we will all get even more."

Although loth to disillusion them, Gittus remarked that Britain had trod the same path beforehand under Margaret Thatcher, starting with the sale of the telecommunications industry.

"And how much did you get?" the Russians asked. "Nothing," said the scientist. There followed a long silence, after which one of the pair sighed: "Oh dear. When they hear about that method here, they'll be sure to introduce it."

Back to normal A deathly hush as Brian Quinn, head of banking super-vision at the Bank of England, rises to address a London conference on "Risk in Banking Recognition and Control<sup>®</sup>. Was he about to spill the beans on how to recognise and con-

trol the risks of another BCCI? Alas, no such message, open or in code. "My lips are sealed at least until the Bingham inquiry is complete," said Quinn. Note the "at least": don't hold your breath.

Staying put ■ The clue that led Sherlock Holmes to the missing racehorse Silver Blaze was the dog that did not bark, Students of Finnish affairs are now pondering something similar: the central bank governor who did not resign. Although a strong opponent

of last week's devaluation of

~~~~ المثلث 3 77777 7777 3 BANX

#### "I drink Beaujolais to take my mind off Europe"

the markka, Rolf Kullberg aged 61 and governor since 1983 - has stood fast despite the resignations of two other opponents who were on the bank's board. Kullberg has said he volunteered to go, but was persuaded by President Mauno Koivisto to stay for the time being at least. Others who voiced

opposition to the 12.3 per cent devaluation against the ECU, only to refrain from resigning when it happened, include not just finance minister firo Vlinanen but Prime Minister Esko Aho's centre-right government in general. Indeed, its 61/2-month tenure was endorsed by a parliamentary confidence-vote at the

weekend. But analysts, doubting that there will be much beneficial effect on Finland's recession. do not expect the government to last for long. And if it falls, the story looks likely to have a Scandinavian twist to its tall.

When Sweden's voters jibbed against recession in September, they threw out the Social Democrats and brought in a right-wing coalition to

deal with the economy and take the country into the European Community. In Finland it will probably be the Social Democrats who're imported to do the same, with those to the right bowing out.

From Mr Jürgen Heitsch. Sir. If it were true that animals "feel no pain and suffer only a small degree of discom-fort", as maintained by the "Dr Clifford" of Peter Marsh's article (Putting the case for animal research". November 16), why not use human beings instead, to end all talk of moral justification? The answer is plain - it is a

And why condemn the Nazi holocaust, witch hunting, slavery if the victims, being in "our" power, like his animals, merely had the practical bad luck to "reflect reality"? We are to each other what animals, our co-creatures, are to

The medico-biological complex is not, however, alone in testifying to the hidden curse of science. Jürgen Heitsch, Zwinglistrasse 34

## CAA's explanation for From Mr Richard Needham airports' pricing formula

Mr Christopher Chalaway. Sir, Lex describes the Civil Aviation Authority's pricing formula for BAA's south-east airports as "astonishing in its generosity" ("BAA", November

The essential facts are that the Monopolies and Mergers Commission, which starts this particular review process, recommended a pricing formula in July based upon a projected current cost rate of return over the next quinquennium of 8 per cent. The CAA put forward for consultation a formula based upon 7 per cent. On July 10 the FT said "the CAA has stymied BAA's long-term investment plans" After extensive consultation

the CAA has now decided upon a formula, which is the equivalent of RPI minus 6 for each of London WC2B 6TE

#### A myopic view of reforms

From Mr C D Naish. Sir, I'm afraid Andrew Tyrie (Personal View, November 18) is being myopic in welcoming the Commission's proposed agricultural reforms. As UK farm business receipts are to be cut by £1.5bn, direct payments amounting to £300m-£350m fall a long way short of the full compensation claimed by Mr Tyrie.

A closer analysis of the reforms shows that there will be a permanent increase in the cost to UK taxpayers. This will be accompanied by substantial financial losses for British farmers. The benefit to consumers will be a once-and-forall reduction in retail food prices of less than 2 per cent. Hardly a net gain for Britain. C D Naish.

National Farmers' Union. Agriculture House. Knightsbridge, London SWI

#### An anti-European rhetoric in the UK that is becoming ever more difficult to understand

From Mr Thomas Martini. Sir, As the Maastricht summit approaches, I am perhaps not the only German with two British children who, after 15 years in the UK, finds the rhetoric of the anti-Europeans ever harder to understand. Whoever makes sterling an issue of sovereignty has not grasped that this insular attitude has been responsible for the pound's decline from DM7.50 in 1973 (when I first visited the UK) to less than DM2.90 now. This insularity (the wish to remain ignorant of all foreign matters) has also provided the back-ground for the fall in Britain's

since 1979 and for the huge productivity gap between Germany and the UK. As for the Little Englanders who find only fault with European institutions, one would wish for a little more honesty. Britain is now more centralised than most European states, and what is being sold as a defence of British democracy is, in several cases, rather a defence of English feudal

concepts. As long as the Brit-ish equivalent of the minister

share of world manufactures secretary successfully shelters behind his appointment by the Crown in order to avoid contempt of court proceedings, British law and politics remain indeed incompatible with the more democratic practices of continental Europe.

Why should the Europeans meeting at Maastricht offer any compromise to Britain when the latter has nothing to offer in terms of vision, economic performance or democratic development? Thomas Martini 18 Poplar Road, Merton Park,

#### Displaying a historical bias against Thatcherism

From Mr Stephen Barber. Sir, I cannot be the only reader who detected more than a hint of bias in your headline treatment of two very similar stories at the top of your front

page on November 7. The US discount rate cut is presented as a "bid to revive (the) economy". The UK spending increase is described as taking place "ahead of (the) poll". Yet a close reading of the related text makes it clear that the Fed cut the discount rate under "heavy pressure from

the White House" and evidence that "the weak economy could damage Mr Bush's re-election prospects". The UK article mentions Mr

Lamont's statement that the spending increase is to cope with "an expected 2 per cent drop in real gross national product". Both stimuli may be politically motivated; nevertheless, the economic case for stimulation is much stronger for the UK than the US. Why the difference? The headline treatment of the UK story.

repeated throughout the paper, reflects a historical bias against "Thatcherism" and the Conservatives which ill befits a newspaper which ought to be the flagship of capitalism. Stephen D Barber, 3-20-2 Ebisu, Shubuya ku, Tokyo, Japan

# From Vukovar to Maastricht

The EC must offer eastern

Europe an alternative to the

ians, the old hands, the "realists" are having a high old time of it. How easy it is, when contem-

ruins of Vukovar, to make fun of all us woolly-minded liberal idealists, who hoped to achieve "a just and lasting peaceful order in Europe accompanied by appropriate security guar-

antees". But that fine phrase, in case you'd forgotten, was officially adopted as "the ultimate political purpose of the Alliance" at a Nato ministerial meeting back in 1967, in a document known as the Harmel Report. If, like me, you are just too young to remember a time before Nato was, you can be forgiven for thinking of it as an association of cynical, hard-headed realists dedicated to preserving the Cold War order and stability of which it was so conspicuous a part. But in truth Nato never would have come about without a strong dose of liberal idealism originating mainly, of course, on the western side of the

You might also think remembering Mrs Margaret Thatcher's enthusiasm for it that Nato was a purely political alliance between sovereign states, all of which jealously guarded their sovereignty intact. You would be wrong. Nato involved, and still involves, a pooling of sovereignty in an area most people regard as far more central to the very idea of sovereignty than even the control of one's own currency: the armed forces that enable a state to defend itself. Sixteen countries put their armed forces under a joint command, not just for a specific war but on a permanent, peacetime basis. General Charles de Gaulle, who really did believe in a Hobbesian world of separate sovereign nation-states, realised the con-tradiction and withdrew French forces from the peace-time integrated command. But no-one else followed his example, least of all Britain under Mrs Thatcher. Yugoslavia is Hobbesian the-

as there was an unquestioned

each other. The success of Nato would be explicable only if one viewed it as an acceptance of American "sovereignty" over western Europe. Nato into account. That is how de Gaulle came to

If one occurred mainly in the EC. The transposes the model to international society, it means result has been a tension between the two, which was "just and lasting peaceful held in check as long as the order" unless and until a sin-Cold War lasted, but has now come into the open. The political sphere of the EC has widment is established. Short of that, all states are obliged to be ened to the point where it has to include a "common foreign and security policy". Any such permanently on guard against policy is bound to have a military dimension, and it is absurd to suppose that it can be worked out without taking

It is a historical accident that European defence integration has occurred almost exclusively in Nato, while economic integration has belonged to the EC

In reality, Nato was based on

saw any contradiction between Nato and the Europe he was trying to build. Both were based on the same principle. The only difference was a purely practical one: geographical proximity made possible a closer integration within Europe than could be achieved between the two sides of the Atlantic, But the European Defence Community, if the

French national assembly had

Charles de Gaulle died 21 years ago. His successors no longer think of French sovereignty as something absolute and indivisible, even in the military field. They are ready to construct a European Union (EU), based on the EC, in which they wish to include defence. They also proclaim themselves loyal members of the Atlantic alliance, and in Rome this month they declared their support for most of Nato's new strategic concept. They want to build up the existing Western European Union (WEU), all of whose members belong to both the EC and Nato, as the embryonic

The British government, for its part, has accepted (in the Anglo-Italian declaration of October 4) that European polit-

defence structure of this new

EU. Why then do they insist on

keeping WEU's structure sepa-

rate from that of a remodelled

ical union implies "the longerterm perspective of a common defence policy compatible with the common defence policy we already have with our allies in Nato", and that WEU should develop its role as "the defence component of the Union" as well as being "the means to strengthen the European pillar of the Alliance". Why should not these two roles be one and the same? Why does Britain jib at the Franco-German wording which would require the WEU to "act in conformity with the directives of the Union"? What sort of figure would Europe cut, if the WEU were to take actions that did not conform to directives adopted by a Union to which all of its members will belong, and of which it is supposed to be the defence component? Or, for that matter, if the Union were to adopt directives cutting across the policies of the Atlantic alliance, to which 11 of its 12 founder members will belong?

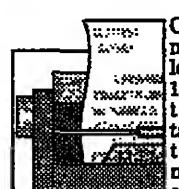

All this theology may seem a long way from Vukovar. One cannot say with confidence that a fully-fledged European Union would be able to stop the bloodshed in Yugoslavia no matter how closely integrated it was with Nato, or how effectively it had developed WEU into a real defence component. The same ques-tions would still confront it. and would be no easier to answer: are west European nations prepared to brand Serbia and the federal army as aggressors, and to risk their own young men's lives in defence of Croatia as they did in defence of Kuwait? If so, which Croatian borders will they defend? If not, how are they going to provide a neutral peacekeeping force so long as there are no agreed ceasefire lines and neither side seems able to impose discipline on its own troops?

Yet the Maastricht theology is important, to eastern as well as western Europe. The Treaty of Maastricht will define the liberal idealist model which western Europe can offer to eastern Europe, as an alternative to the Hobbesian model of Yugoslavia. It must be a mode of integration including defence forces; and its aim should be, not to replace or dismantle Nato, but to extend the benefits of Nato eastwards to the parts of Europe where they are most acutely needed.

#### PERSONAL VIEW

# Time to correct the economic policy failures of the 1980s

By Dieter Helm, Colin Mayer and Ken Mayhew

legacies of the 1980s has been the importance attached to micro-economic supply-In contrast to earlier years, the main goal of macro-economic policy in the 1980s was to deliver low inflation, leaving the supply side to deal with

real economic performance. In the UK, these supply-side policies took the form of promoting the operation of markets and increasing competition. They involved controlling government expenditure, privatising state enterprises and introducing market processes into what were previously regarded as largely non-market activities: education, health and local government. Competition was intensified by deregulation and restructuring of monopolies. Labour and housing markets were liberalised and more emphasis was placed on the individual at the

expense of collectives. in some areas these supplyside policies were successful. In others they were positively harmful. The dividing line between success and failure is essentially that between consumption and investment. Where little investment was required, policies of promoting competition were successful; where significant investment

was needed, performance fell. Services are the main area in which microeconomic policies have been successful. The performance of buses, coaches, opticians, financial services and telecommunications were largely improved by introduc-ing markets and greater competition. The main areas of poor performance have been in training, R&D and education.

Privatisations succeeded in transferring large segments of the public sector with apparent ease to the private sector. Where competition accompanied privatisation, performance appears to have improved, as in airlines. However, conflicts between efficiency and investment have become more evident recently in the high investment sectors, such as water and electricity.

There can be little doubt that reforms to the labour market - for example, the resolution of industrial disputes contributed with the recession of the early 1980s to an improvement in manufacturing labour productivity. However, the most serious problem fac-

ing the UK labour market -

investment in labour (training)

 has not been addressed. Financial reforms have reduced the cost of financial services and certain forms of credit. But hostile takeovers have exacerbated concerns about whether adequate incentives exist for companies to pursue long-term investments and strategies.

The reason for these conflicting experiences is the trade-off between promoting efficiency and investment. Competition typically diminishes incentives to invest. It makes it harder for companies to capture returns from their expenditures on investment, R&D and training. Without some market power, companies do not derive adequate benefits from their own investments: they therefore invest too little.

Likewise, mobility of labour helps to match supply and demand for labour but it is not conducive to investment in training. The resignation of

How have they done this? A central feature of these economies is the long-term relations that exist within the corporate sector: between companies and their financial institutions, and between companies and their employees. While UK policy has come increasingly to emphasise competition in product, capital and labour markets, other countries tolerate arrangements

Outside the UK and US, com-

that limit competition.

panies commonly hold each other's shares as cross-shareholdings. Companies are represented on each other's boards as suppliers, purchasers, providers of finance and competitors. They limit the control that outside investors can exert through dual classes of shares and voting right restrictions. There are serious impediments to outside investors dismissing either managers or employees. As a consequence, hostile takeovers are rare. These inter-company rela-

tions inevitably encourage collusion and discourage restructurings. But such arrangements encourage long-term investments by suppliers, purchasers, financial institutions and employees. Systems of perma-

The UK economy has a poor trade-off between competition and investment

employees comes at a high cost to a company that has invested in their training. Conversely, dismissal comes at the expense of the training that employees undertake which is of benefit only in their existing jobs.
This conflict between the

efficiency benefits of competi-tion and the investment advantages of monopoly characterised the economic policies of the 1980s. For one of the main architects of these policies, Friedrich von Hayek, monop-oly returns were the fruits of endeavour and perfect competition was a state in which competition had ceased to exist.

There is more to it than that. The UK appears to suffer from a worse trade-off between consumption and investment than many other countries. Germany and Japan have created ferocions competition in many industrial sectors while promoting high levels of investment.

nent employment appear to be more closely associated with high levels of investment in training than more active labour markets.

In sum, a policy of encouraging competition in product, labour, and capital markets may have discouraged the development of the long-term relations between companies. their employees and investors that are necessary for investment. Policy in the 1980s emphasised the wrong model of product, labour, and capital markets: it put too much emphasis on competition and too little on the development of these longer-term relations.

A similar preoccupation with the wrong model afflicted the public as well as the private sector. The Conservative government's approach to improv-ing performance in health and education was simply to introduce a variant of the competi-

tive market model. This is almost entirely inappropriate. Market failures abound in both health and education. In both cases, users (and frequently suppliers) are ill-informed about quality of services and there are large economies of scale in their provision. Regulation is required to limit the extent to which markets fail and abuses occur. Far from removing the role of government, the reforms are likely to replace the current system of largely self-regulation by members of the profession with more extensive state and other regulation.

The UK economy has an unusually poor trade-off between competition and investment because of the inappropriate structure of its markets. The switch between government intervention and private sector competition reflects continuing dissatisfaction with this trade-off but does little to solve it. We are witnessing a return to greater government involvement in investment (in health, education and transport), and this is likely to increase. This may be welcome, but it would be better to try to identify the features of other countries' markets which give them a better

trade-off than the UK's. Unfortunately, we are a long way from even addressing the right question. Such has been the influence of the principle of competition that it is now accepted almost without question by all political parties. Similar mistakes are afflict-

ing policy in eastern Europe. Reform is being directed towards the rapid introduction of competitive markets. Less attention is being given to the much slower process of creating structures that promote investment and growth as well as competition and efficiency.
Institutional design will be a
central concern of the 1990s.

grasp this and come up with practical alternatives to what the UK has now is likely to dominate economic policy debate into the next century. The authors edit the Oxford Review of Economic Policy, which today publishes a special issue on economic policy in the 1980s. Copies available from OUP, Southfield Road, Eynsham, Oxford OX8 IJJ.

Share prices on Wall Street fall sharply as fears of a 'double dip' recession increase

# Bush's faith in US economy backfires

By Michael Prowse in Washington

**EFFORTS** by President George Bush to restore confidence in the US economy and in the administration's economic policies appeared to backfire yes-

Share prices fell sharply on Wall Street following reports that Mr Bush judged the economy to be "basically sound" and had ruled out early measures to stimulate growth. Mr Bush said the economy

had "technically pulled out of sluggish. Mr Michael Boskin, his chief economist, said the White House was likely to revise down growth estimates for this quarter and early 1992. The administration interpreted a rise in the September

merchandise trade deficit as a signal that the economy was slowly recovering. The deficit rose to \$6.8bn compared with \$6.5bn in August and a trough of \$4.1bn in March.

Mr Robert Mosbacher, commerce secretary, said the rise reflected "a growing US economy, with strong purchases by Americans of consumer and capital goods and industrial supplies and materials".

Mr Bush and top advisers are continuing to debate wavs of stimulating faster growth. But a "growth package" involving cuts in capital gains taxes has been postponed until the president's State of the Union address at the end of

The White House believes that current uncertainty partly reflects public relations problems – the administration's inability to convince voters or markets that its policies are

The rise in the trade deficit. however, did not reassure financial markets, which appear worried by more recent signs of economic stagnation. In October, employment, retail sales and industrial production all failed to grow. The early signs for November are no more encouraging; car sales and consumer confidence fell sharply and claims for unemployment insurance rose, signalling that companies are not

yet ready to rehire.

Most forecasters sharply revised down estimates of growth in the fourth quarter - to about 1.5 per cent compared with 3 per cent a few months ago. Many believe the risk of a "double dip" recession with output falling again is increasingly more likely.

The rise in September's trade deficit reflected a larger increase in imports than exports. Imports rose by \$1.3bn to \$40.9bn while exports advanced \$1bn to \$34.4bn. For the year as a whole, the trade deficit is running at an annual rate of \$65.7bn, about a third lower than that of last

The trade deficit for the third quarter was \$19.3bn,

sharply higher than the \$13.1bn registered in the second quarter, when the recession apparently began to bottom out. The difference reflected stronger imports, which rose 4.5 per cent between the two periods - a sign of higher domestic

Despite the palpable air of nervousness in the UK equity market last night, it is worth

#### Japan's current account balance

As a percentage of GNP

## Japanese growth will fall to 2.5% says OECD

By Stefan Wagstyl in Tokyo JAPAN'S economic growth rate should slow from about 4.5 per cent this year to 2.5 per cent in 1992, largely because of the Bank of Japan's tight monctary policy, according to the

OECD. As a result, inflationary pressures should ease, the OECD says in its report published today. The rate of increase in consumer prices should fall from a forecast 3.2 per cent for 1991 to 2.4 per cent

"Business conditions, though less buoyant than at the height of the recent boom, remain consistent with sustained growth." says the OECD in a generally upbeat review of Japan's economic performance. The authors praise the Bank of Japan for "guiding the econ-

omy back to a sustainable

growth rate without bringing

the expansion to a halt". They acknowledge that central bank policies have produced a sharp fall in land and stock prices, which has caused bankruptcies among small- and medium-sized property and finance companies. But, the report says, the stock market's partial recovery and the take-up of banks' subordinated debt by other financial institutions "seem to have reduced, if not removed, the danger of a 'credit crunch' induced by the

fall in asset prices". The OECD forecasts a sharp rise in Japan's current account surplus from \$35.8bn last year to \$68bn in 1991 and \$77bn next year. The surplus is unlikely to fall again in the medium term, principally for macro-economic reasons; in the late 1980s the surplus fell because domestic investment rose faster than savings, creating extra demand which was met by an increase

The report says investment growth is tailing off but Japa-nese savings rates should remain high, which will limit the scope of a future drop in the external surplus. Nevertheless, the authors say, Japan still has barriers to imports and foreign investment, notably because companies in the keiretsu - the groupings which dominate Japanese industry - tend to import less than non-keiretsu companies. The OECD urges Japan to apply fair trading laws effectively in order to secure free market access for foreign companies. As in previous years, the report recommends further deregulation, including measures to promote better use of land to increase foreign companies' access and improve economic efficiency. # Sterling at the bottom of the class

Peter Norman charts a sharp reversal suffered by the UK currency

HAT a difference a that sterling's weakness has week makes. It is less created difficulties for the sterling's weakness has than a fortnight since UK financial markets were speculating on a possible cut in British bank base rates from their current 10.5 per cent in the wake of the government's autumn economic statement. But in recent days, sterling has fallen to the bottom of the tem, is no longer moving inside the 2.25 per cent fluctuation

exchange rate mechanism of the European Monetary Sysmargin of the "core " members of the EMS, and some market analysts are talking of a possible sterling crisis. Just as earlier hopes of lower UK interest rates were over-

done, so it may be premature to paint too apocalyptic a picture of the pound's position. With sterling hovering at about DM2.88 yesterday compared with its DM2.95 central rate. Mr Norman Lamont, chancellor of the exchequer, stressed that the government would do whatever was necessary to maintain sterling in its ERM margins. In line with this commitment, the Bank of England was understood to be intervening discreetly in trading yesterday. But there is also little doubt

ont, and many economists believe these will get worse as the next year's general election approaches.

Sterling's sudden vulnerability reflects a mixture of external and domestic factors. Externally, the pound was hit by last week's devaluation of the Finnish markka and the weakness of the dollar after Friday's sharp fall in share prices on Wall Street. Although the markka is not a member of the EMS or the

ERM, it is pegged to the European currency unit and its 12.3 per cent devaluation against the Ecu has cast doubt on the ability of other nations, both inside and outside the ERM, to avoid future currency realign-The weakness of the dollar has prompted a flow of funds into the D-Mark. Although

rency, it has fallen against the The market perception is that the Bundesbank could well increase German interest rates to stifle wage inflation in Germany. Monday's decision

by the Bank of France to raise

sterling has been relatively

strong against the US cur-

its intervention rate by half a percentage point was taken by some operators as a sign that a German move could come as soon as tomorrow's Bundesbank council meeting in Frank-

At the same time, the recent proliferation of lacklustre UK economic indicators and the growing doubts about the strength of the recovery in Britain have caused investors to take a more bearish view of the pound and the political circumstances surrounding the

The weakness of the recovery has hit the pound in two ways. It has made markets believe the government will seek a cut in interest rates at the earliest possible opportunity, thus giving investors little incentive to bid the currency higher.

It has also fostered doubts about the Conservative government's prospects, so raising uncertainty about the mediumterm outlook for sterling, particularly in the minds of foreign investors as the July 1992 election deadline approaches. On the international front, sterling's cushion already looks thin. The interest differ-

ential with Germany on three-

month money has shrunk to about 1 percentage point from about 7 points when Britain entered the ERM in October

Although the Bank of England believes that Britain can avoid following a German interest rate rise, providing it remains modest, this week's increase in French interest rates shows how governments have to accept unpalatable actions to maintain their credibility in the ERM. Sterling does have the

advantage of a 6 per cent fluctuation margin in the ERM and has so far stayed some 11/2 to 2 pfennigs above its effective EMS floor. This is because the Spanish peseta, which is the strongest EMS currency and which also enjoys the extra freedom of the 6 per cent margins, has also been losing ground to the strong D-Mark. But the ability of the pound to give ground gently to the German currency would be upset if the Spanish authorities matched any German monetary tightening. Then Mr Lamont could face a sterling crisis

ling is all too plain: it is not clear what good news there might be to offset it. and be forced to take unpleasgoats among Europe's currencles. Sterling is no longer simant decisions to "do whatever ply caught in the backwash of is necessary" to maintain the pound in the ERM. a rising D-Mark. The French

#### Thatcher expected to back government in European union debate

## Hurd optimistic for deal at Maastricht

By Philip Stephens, Political Editor, in London

A CAUTIOUSLY optimistic assessment of the prospects of a deal on European economic and political union at the Maastricht summit was offered yesterday by Mr Douglas Hurd, the UK foreign secretary, on the eve of an historic two-day debate in the House of Com-

Mr Hurd's comments came amid indications that Mrs Margaret Thatcher, the former prime minister, is preparing to back the motion setting out the government's negotiating position at the December summit. As Mr John Major, the prime minister, foreshadowed bis speech opening the debate this afternoon with a terse rejection of calls from some Tory MPs for a referendum. Mrs Thatcher was said to be ready to offer conditional support for

A rough headcount by officials of the ruling Conservative party suggested last night that perhaps only four or five Con-

her successor.

servative members of Parliament would defy the government line, with at most 10 more abstaining.

Mr Norman Tebbit, former cabinet minister and one of the most vocal critics of any agreement on a single currency, had a private meeting with Mr Major yesterday morning in what was thought to herald a temporary truce.

Mr Hurd's assessment, offered to a backbench committee and in an open letter to all Conservative MPs, emphasised

that it was "in our national interest to reach agreement on a treaty at Maastricht". He added that: "It is important we should be at the heart of the Community, not shouting from

the sidelines". As the opposition Labour party challenged the government to set out in the debate its positions on the key issues at the summit, Mr Hurd was careful to hedge his optimism. But colleagues said there were signs that Britain's partners were ready to trim their feder-

Mr Hurd made it clear that Britain would not sign any treaty which declared a "federal destination" but he was also at pains to emphasise that the structure of the draft treaty on political union does not give substance to that goal. "It is a wistful look forward rather than what is accepted in the text," he said. He also indicated that Britain's determination not to

vield ground in some areas notably the social charter was matched by flexibility in others. The government would accept a provision which would allow Community nationals living in Britain to vote in local and in European elections, arguing that it would add only 500,000 to an electorate of more than 40m people. It was also ready to consider a limited addition to the pow-

ers of the European parliament and consider some extension of the Community's competences. Mr Hurd stressed there were still objections to many of the provisions of the draft treaty but he sought to allay fears that the proposals would undercut Britain's freedom to act independently in foreign or defence policy.

## Soviet foreign debt agreement brings hope of full aid package

By Leyla Boulton in Moscow

NINE out of 12 republics yesterday reached tentative agreement on servicing the Soviet Union's foreign debt. If finalised in the next few days, this will clear the way for a package of western financial

The deal with the G7 leading industrialised nations fell short of its original objective since three republics - Ukraine, Azerbaijan and Uzbekistan dropped out of the process.

Republican representatives were due to work through the night to fine-tune a mechanism to ensure that money will be made available to a centralised fund for servicing the debt. They are due to hold a final meeting with the G7 representatives this afternoon.

G7 officials expect the financial package to be available within days but in return they expect the republics to make their own funds available quickly and to have in place an effective mechanism. Vneshekonombank, the bank

which services the foreign debt of \$60bn-\$80bn, has been on the brink of defaulting. The G7 package foresees a bridging loan of \$1bn from the

Bank for International Settlements, plus the deferral of principal payments owed to Paris Club creditor countries for the rest of 1991 and possibly the first quarter of 1992. The package - together with Soviet gold reserves as

collateral for the bridging loan

- amounts to more than \$2bn.

A default would ruin the Soviet Union's already shaky creditworthiness, and make it difficult for republics to obtain new credits. The nine republics are due to form an expert committee to divide up the former Soviet Union's assets, as well as its debt.

Mr Vitold Fokin, Ukrainian prime minister, had argued that the assets should first be divided among the republics before an agreement with the

 The US yesterday dangled the offer of between \$1.2bn and \$1.5bn of loan guarantees for food aid to the Soviet republics, saying an announcement was likely in the next three weeks, adds Lionel Barber in Washington.

## Survivors of Vukovar

Germany was widely blamed in the US for raising rates just ahead of the 1987 crash. It may be doubly reluctant to do so now. The D-Mark has already appreciated by 5 per cent against the The UK authorities would then be proved right in having

dollar over the past month. let sterling slip through DM2.8844, its theoretical floor under narrow bands. By delaying serious intervention till after a German rise had failed to materialise, the Bank of England would ensure that speculators burned their fingers - a classic central bank-

But even this outcome would scarcely solve the underlying problem. Expectations would remain of a German rate rise before the end of the year. The French rate increase is a gesture of machismo which threatens to leave the UK limping into the Maastricht summit. No participant with a currency in need of support could expect to be taken seriously there. President Mitterrand could thus be hoping to test Mr Major's readiness actually to raise rates if necessary. But if sterling did reach its floor as a result of a German rate increase, the UK's first line of defence would doubtless be to beg Spain to create more leeway by cutting peseta rates.

Anglian Water

Anglian Water has already thoroughly staked out its claim as a model utility. It takes no chances with the regulator. It alone in the sector has always had net debt and a rising interest charge. Further, yesterday's half-year results showed a performance still almost exactly in line with the infla-

tion-linked forecasts made-at flotation, even down to the 8.6 per cent interim dividend increase. How can a company like this be subject to the same risks as, say. Severn Trent or Welsh Water?

The answer is, all two easily If Anglian is a model, the obvious danger is that it will turn out to be like a farm left behind by an agricultural revolution. The more conservative water companies cannot ignore the antics of their siblings whether that means challenging Ofwat at every turn or diversifying away from water. Whether they should follow suit is another matter.

Anglian's shareholders have been served a version of this dilemma in the form of the company's comments on its pace of diversification. Management seems to have decided that, like it or not, it must go with the flow towards the faster growth of non-regulated earnings. But, as its rivals have discovered, the biggest hurdle is simply the lack of obvious takeover targets. The waste management industry has already shown itself less than foolproof. The more Ofwat turns the screw on the regulated water business, the more it risks driving comusinies on to dangerous ground Perhaps Anglian should re-consider the virtues of its model status after all.

#### Thorn EMI

On the basis of yesterday's interim figures, the case for Thorn EMI is easily made out. Here is a company with 40 per cent of its turnover in retailing of one kind or another, with a further £250m-plus of sales in the defence industry. Yet it is likely to maintain its profits roughly unchanged this year. If it can do this well in a recession, what might it not do in an upturn?

The converse case is that Thorn has managed to concentrate on two successful but rather dull businesses - music and TV reptal - while sticking with a ragbag of largely unprolitable left-overs from its industrial history. The company makes much of the fact that both rental and music publishing are strongly cashpositive businesses with the characteristics of an annuity. The resulting quality of earnings is undeniable; the question is rather where the growth is coming from. At yesterday's 767p, the shares are at the upper end of an historically narrow range relative to the market. There seems little reason for them to break out of it.

## FUTURE PERFECT

For those who depend on income from investments, bank and building society deposits are less than ideal. Not only do interest rates fluctuate, they offer no protection against the erosion of capital by inflation.

Dividends from shares, on the other hand, can provide a rising income with protection of real capital value. But it is not easy to identify the companies which are going to increase their profits and dividends over time.

With 120 fund managers and more than £40 billion under management, Mercury is well qualified to perform this complex task, Mercury seeks out companies which are industry leaders, with sound balance sheets and strong

positive cash flow. Factors. which determine a company's capacity to sustain rising dividends as well as growth in business.

Mercury's resources for researching large numbers of companies in detail are exceptional. This depth of resource is one of the factors that has led to Mercury being chosen to manage pension fund investments for over 500 companies and public bodies.

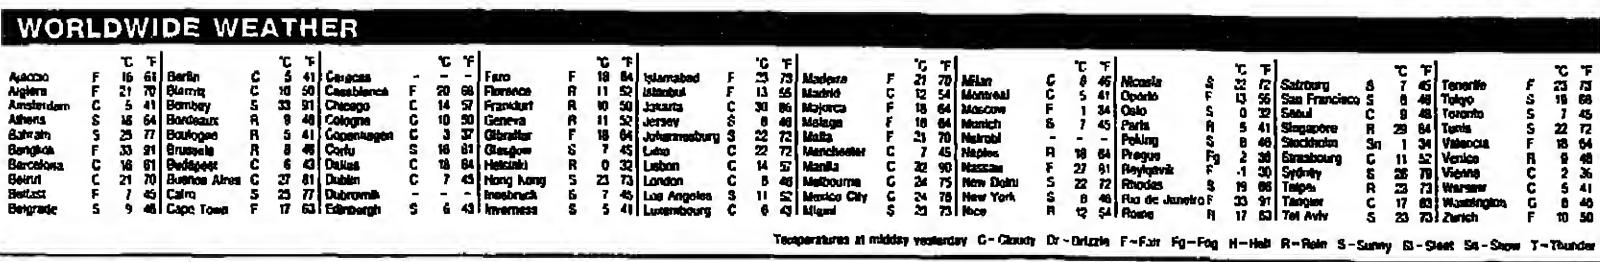

The record of Mercury Income Fund demonstrates Mercury's ability to deliver growing income. By 1st September 1991, investors at the launch in 1984 had seen both their annual. income and the value of their investment\* more than double\_

# Hoechst sees no upturn as profits fall

By Andrew Fisher in Frankfurt

profits for the first nine months to DM1.9bn (\$1.2bn) and held out little hope of an early improve-

Mr Wolfgang Hilger, chief executive, said the full year's profits would be down by a similar percentage. October, which usually brings an upturn in business after the holiday period, was disappointing. This year, the autumn month was not a "golden October" in profit terms. "We haven't registered any positive signals and the order inflow is sluggish," he said.

Third-quarter profits also fell 22 per cent to DM494m. This decline was less steep than in the second quarter when the pre-tax figure dropped 34 per cent to DM591m, but it was worse than the DM500m-DM550m expected by some analysts.

Hoechst operating results. excluding stakes in other companies and financia! earnings. showed a loss in August, Mr Hilger said. September, however, saw a return to the black. He hoped the fourth quarter would not be as bad as the third, "but the improvement will not be very impressive". Beyond that, he added, "our optimism is cau-"ausoit

BASF and Bayer report next week. In the second quarter, BASF profits rose 3.8 per cent and those of Bayer fell 1.4 per cent. Mr Kiran Bhojani, an analyst with M.M. Warburg Bank in Hamburg, said Hoechst's fourth-

HOECHST yesterday began the autumn results season of the German chemical groups by reporting a 22 per cent slide in pre-tax accounting factors usually make

this a strong quarter. Mr Hilger said the main sources of strength this year were the German and Asian markets, but even here demand showed signs of weakening in the third quarter. Other western European markets, such as the UK and Scandinavia, were weak and in eastern Europe, sales fell nearly 30 per cent

In spite of talk of a recovery in the US market. Hoechst had seen few siems of demand improving. "We must accept the fact that the economy in the US will only recover slowly," said Mr Hilger. Plastics, fine chemicals and dyes, fibres, and basic chemicals turned in worse results, but pharmaceuticals showed a strong improvement, spurred by rising

Group turnover rose 4.8 per cent to DM34.8bn in the first nine months, though only 3.3 per cent without additions such as the newly consolidated Celanese Mexicana. Sales volume was 1.8 per cent higher, with prices up 1.1 per cent while currency changes had little impact.

domestic demand.

Mr Hilger declined to make a dividend forecast, saying Hoechst had to weigh up the opposing factors of high German real interest. rates - which meant shareholders wanted a correspondingly high dividend return - and the profits setback. The company held its payment at DM13 last year, in spite of a 20 per cent drop in net income to DM1.7bn.

## Banks seek standstill on Maxwell family loans

By Robert Peston in London

NATIONAL Westminster Bank and Lloyds Bank are trying to persuade 20 banks to freeze principal repayments on £800m (\$1.4bn) of loans to the Maxwell family's private companies. freeze is described by bankers would be for six months, to give the Maxwell family time to draw

up a plan to repay the loans.
This attempt by NatWest and Lloyds, whose exposure to the family is about £150m and £80m respectively, to initiate a formal restructuring of the loans, underlines the severity of the crisis

faced by the Maxwell family, following the death a fortnight ago of Mr Robert Maxwell. Yesterday, shares in Maxwell Communications Corporation fell from 60p to 46p in London. The sure on Monday that the Serious Fraud Office had begun an inquiry into a £55m loan made by Swiss Bank Corporation (SBC), to Adviser (188), a private company

controlled by the Maxwells. That loan is now in default because SBC has not been able to obtain the shares it was promised as col-

British Airways and KLM, the Dutch airline, have had two alluring models in mind during their merger talks over the past month. Those role models are also Anglo-Dutch groups - Shell, the oil company. and Unilever, the consumer goods group - which are widely regarded as shining examples of how cross-border mergers can What are the chances that BA and KLM will be able to emulate in the airline business what Uni-

lever and Shell have achieved in consumers goods and oil? The forces which have brought

BA and KLM together are considerable. The savage downturn in the airline industry since the Gulf war has sliced through profits, forced companies into deep cost cutting and added urgency to searches for partners. European airlines are forming

larger groupings to prepare for the competition when the European air transport market is deregulated in 1993. These groups could pose a long-term threat to BA and KLM, which are the lowest cost and leading European long-haul carriers.

Lufthansa, the German carrier, is collaborating with Air France. which has consolidated its position within the French industry through its acquisition of UTA the independent long-haul carrier, and Air Inter, the domestic airline. Air France may also take a stake in Sabena, the Belgian carrier. Meanwhile SAS of Scandinavia is in talks with Swiss

One of the aims of these new groupings is to establish airports such as Charles de Gaulle in Paris and Berlin's Tegel, as competitors to Amsterdam's Schiphol and London's Heathrow to serve long-haul routes, particularly to north America.

The Europeans are also facing more competition from the US. can Airlines and United Airlines which dwarf the European airlines, are becoming increasingly competitive on the most profit-able transatlantic routes, particularly since they received greater access to BA's base at Heathrow. A merger between KLM and BA would help alleviate some of the pressures the two companies

## Charles Leadbeater looks at models for merger

# BA looks at going Dutch with KLM

face. A merged group would also be in range of matching its largest US competitors. In 1990 BA flew 66.8bn revenue passenger kilometres, a measure of how many passengers it carried multiplied by the distance covered,

while KLM flew 26.4bn. A BA/KLM group would match Delta, the third largest US carrier, which last year flew 94.9bn revenue passenger kilometres. but it would still be well behind American at 124bn and United at

The group would achieve con-

siderable economies of scale by cutting staff and the cost of computer systems. BA and KLM already jointly use Terminal Four at Heathrow and by joining forces with KLM, BA could escape congestion at Heathrow by gaining greater access to the expanding Schiphol airport. Neither airline has a large domestic base so both have had to expans into international markets. Together they would form a formidable force in long-haul ser-

vices, particularly to north America and the Far East. For BA, an that together they might draw in Northwest Airlines, the US group, in which KLM has a stake. In spite of the attractions, international airline mergers face huge political and regulatory obstacles. How might a BA and KLM deal, modelled on Shell or Unilever, overcome the obsta-

Unilever, formed in the 1930s. is based on two legally separate companies in the UK and the Netherlands, which have separate shareholders.

These companies separately own roughly equivalent assets, the British in the UK and the Commonwealth, and the Dutch in continental Europe and the rest of the world. The two companies are bound

by an equalisation agreement. under which the profits from the two national companies are pooled. Shareholders are paid dividends from this pooled profit. The national companies also guarantee one another's debts to reassure bankers. Unilever is run by a single management team because the boards of the two national companies are identical. The Unilever merger, however, was between two companies of about equal size. But BA, with a market capitalisation of about £1.6bn (\$2.8bn) is much larger than KLM, which is valued at

According to Mr John Campbell, an analyst at County Natstudied Unilever and Shell, the imbalance between airlines may make the Shell model more appli-Shell has two national parent

companies, the dominant Royal Dutch Shell and the British-based Shell Transport and Trading. Beneath them is a holding company which owns all Shell's

assets. The holding company. which is owned 60 per cent by the Dutch and 40 per cent by the British, pays dividends to the parents. Mr Campbell said: "This would allow BA and KLM to manage their assets and staff jointly to get economies of scale but they would retain separate national identities, which would

help politically." This could help avoid an obstacle which would block a full-scale merger or takeover. Airlines are granted routes bilaterally, between countries. KLM is allowed by bilateral agreement to fly between the Netherlands and

the US. It is unlikely that regulators would allow BA to acquire these Dutch routes through a takeover. A structure modelled on Shell may keep the route system of the national companies intact, while allowing the joint management of the service of those routes. It is thought that BA and KLM's large cargo operations would be managed separately from the passenger services.

ven with the ingenuity of a modernised version of either the Shell and Unilever structure, a merger would face tremendous obstacles. Political opposition in the Netherlands, fed by unions fearful of job losses and managers worried they would be eclipsed by the British, could put pressure on the government to use its 38 per cent stake in KLM to block a deal.

The sorry tale of US airline mergers, such as Northwest's deal with Republic, highlight the tremendous management difficulties in merging two large groups effectively.

Most importantly, any deal would be closely vetted by the EC competition authorities, egged on by KLM and BA's competitors. It would go right to the heart of the debate within the EC over the make European markets more competitive, and industrial policies to promote merged European companies large enough to compete with their US counterparts. It may be that the concept of an Anglo-Dutch merger based on the either the Shell or Unilever model, is an idea whose time has come, and gone.

## Fokus Bank falls to NKr1bn as property market weakens

By Karen Fossil in Oslo

FOKUS BANK, Norway's third biggest bank, suffered heavy net losses of NKribn (\$158.5m) for the first nine months of the

Although the bank incurred a NKr1.2bn loss in the same period last year, the figures are not comparable - in July Fokus merged with Rogalandsbanken and recently switched to a quarterly reporting standard.

With the volume of non-performing loans continuing to rise during the nine-month period, Fokus was forced to increase credit-loss forecasts for the year to NKrl.6bn from NKrl.3bn. The bank estimated that by the

end of the third quarter, its portfolio of non-performing loans totalled NKr2.87bn. No comparative figure was given. Provisions for credit losses in the nine-month period rose to

bank warned that "there is still a need for a further write-down of approximately NKr300m" of its property portfolio.

"The continued weak property; market has resulted in considerable losses on property companies and a further devaluation of collateral as property held for other loans," Fokus said. The bank said the increase in

loan-loss provisions was due mainly to problems within a group of small and medium-sized corporate clients, and within Norway's salmon farming indus-Group operating income in the

nine-month period fell to NKr396.8m from pro forma NKr466m. The bank reduced securities losses in the period to NKr19.2m from NKr127.7m. Group operating expenses were reduced to NKr1.16bn from

the third quarter. Fokus achieved a nine-month profit of NKr184.3m, before credit loss provisions, compared with a NKr4m loss in the same period last

The bank said it had achieved an equity ratio of 6.4 per cent on risk-weighted assets of NKr37.7bn. During the third quarter an earlier NKr1.5bn guarantee was converted to preference capital, and Fokus received an additional capital injection of NKr650m in preference capital from the guarantee fund of the commercial banks. To qualify for the injection of

preference capital, the bank was earlier ordered by the guarantee fund to cut costs by at least 20 per cent during 1993. To this end, the bank in December will present the guarantee fund with a plan to reduce

#### NKr1.82bn, and by 7 per cent in NKrl.90bn from NKrl.15bn. The Eagle Star loss rises to £284m

By Andrew Bolger in London

FRESH EVIDENCE of the grim ket emerged yesterday when Eagle Star, the insurance subsidiary of BAT Industries, reported mounting losses on its domestic mortgage indemnity business.

Eagle Star made a pre-tax loss of £234m (\$502.7m) in the nine months to September, compared with a loss of £248m in the same period last year. Further property repossessions by lenders during the third quarter led to a loss of £48m on domestic mortgage insurance business.

Sir Patrick Sheehy, chairman of BAT, said "nothing new has come out of the woodwork" and provisions were likely to continue at current levels for the rest of this year and the first quarter of next.

ahead, but said: "We do not state of the British bousing mar- believe housing will lead us out societies. It wants to linit its liaof the present recession. Mortgage indemnity claims by building societies and other lenders are triggered when the pro-

ceeds from the sale of a repossessed property are less than the value of the outstanding mortgage.
The underwriting loss of £169m on this business for the ninemonth period included £43m for earlier-year claims.

Eagle Star, which saw the departure of chairman and chief executive Michael Butt in September, accounts for about 17 per cent of the domestic mortgage indemnity market. It is providing for an average claim of £16,000 per property on repossession. Eagle Star is continuing to try. He declined to look further to negotiate better terms with

property lenders, mostly building bility and a better division of risk with the lender.

Sir Patrick said if Eagle Star failed to agree new terms by the end of the year, it was prepared to leave the business.

Eagle Star said losses on other underwriting business - such as motors, buildings and house contents - remained unacceptably high, as recent premium rate increases would take time to feed

Overall, BAT's tobacco businesses and other insurance operations in the US and UK helped to increase group pre-tax profits 11 per cent to £662m. Turnover rose 5 per cent to £14.25bb.

# Thorn EMI buys the rest of Chrysalis for \$30m

By Richard Gourlay in London

THORN EMI, the UK music and rentals group, yesterday bought the 50 per cent of the Chrysalis Records joint venture which it does not already own for \$30m in cash.

The group will also pay Chrysalis Group \$25m to take out group loans and \$2m in fees for the services of Mr Chris Wright, the chairman of Chrysalis Group who will non-executive chairman of Chrysalis

Chrysalis will retain its identity as a label, but Thorn EMI will amalgamate back office operations in the US with an annual saving of between \$9m and \$10m.

Mr Colin Southgate, Thorn EMI chairman, said the total cost of acquiring Chrysalis was \$150m for a company with sales of \$170m.

Thorn EMI paid \$96.6m for its half-share of the loss-making records division in 1989.

Following press speculation, Mr Southgate said Thorn EMI had held no detailed discussion with Mr Richard Branson's Virgin Group about a possible purchase of its record business but that he could not deny it would fit well into Thorn

Thorn EMI also announced pre-tax interim profits down from £96.2m to £94.9m on sales almost unchanged at £1.76bn. Earnings per share fell from 19.8p to 18.5p and the group is to maintain its interim divi-

Profits were supported by a strong performance in the music business where trading profit rose 12 per cent to £52.3m in its best first half. Productivity in music recording improved and the profitability of music publishing increased

The rentals business faced depressed conditions and trading profits fell 18 per cent to

## shake-up at Ovako

**By Robert Taylor** in Stockholm

THE OVAKO steel group, jointly owned by SKF, the world's leading roller bearing company, and Metra, the Finnish industrial group, is being split up because of recession in the world steel industry.

Over the first nine months of this year, Ovako made heavy losses which contributed to SKF's poor SKr22m (\$3.74m) profit for the third quarter. Return on capital at Ovako was 3 per cent compared with 17.9 per cent for the first nine months of 1990. In the first half, losses totalled SKr346m and SKF said the deficit for the whole of 1991 could be double that figure.

The two companies, which united their steel operations in the Ovako group in 1986, will split their operations into two wholly-owned subsidiaries, Ovako and Imatra Steel.

The new Ovako will be completely owned by SKF, with annual sales of SKr4.5bn and 4,500 employees based in Sweden, the US and France.

SKF said Ovako would adopt a role as a speciality steel company next year, focusing on producing ball-bearing steel. In the longer term, and to strengthen the company's development, Ovako would seek co-operation opportunities with international companies in the same industry. The closure of Oyako's loss-making plant at Lulea in northern Sweden could be ruled out and its future would be decided by

the end of the year.

Imatra Steel, comprising the old Ovako's Finnish operations and forges at Karlskrona, in Sweden, will be wholly-owned by Meira with annual turnover of SKr620m and 1,300 employees. In a statement, Metra said that Imatra would concentrate on production of easily machinable steels for the vehicle and engineering industries. Up to SKr500m has been invested in modernising Imatra's production in recent years.

Metra said that it was seeking financial assistance from the Finnish government to protect Imatra's continuing activities. State investment was vital for Imatra's future.

# Steel slump | Favourite emerges in Interhotel bid By Leslie Colltt in Berlin

MR ERICH Sixt, the Munich-based car rental operator, has surprised international hotel operators by out-bidding them for east Germany's Interhotel chain with a DM2.5bn (\$1.52bn) offer for the former state company.

Rival bids by the larger hotel chains fell just short of DM2bn, but three other German con-tenders equalled his offer. Backed by Bayerische Vereinsbank of Munich, Mr Sixt is favoured to gain control of 29 hotels from the Treuhand agency, making him the big-gest hotel operator in Ger-

sale of an east German company since the privatisation agency was founded in Febru-

The Treuhand's executive board recently recommended Mr Sixt's bid to the managing board, which is to meet this Friday, However, Treuband officials said yesterday that a final decision on the bid could be postponed. An official said that parallel negotiations continued this week with other contenders.

"It would be insane not to use the highest bid to obtain better conditions from rival bidders. This could be the first round," he suggested. Three other contenders had entered similar bids, but could agree to invest more in the hotels. Mr Sixt has pledged DM1bn in investments for Interhotel and

Interhotel's Hotel Stadt in east Berlin: one of the 29 being sold by Treuhand

aims to keep the chain intact. The rival Klingbeil Group of property developers in Berlin wants to bring in international hotel operators to manage Interhotel's flagship hotels. Another contender, Mr Roland Brust, a Heidelberg

Bank, while Maritim hotels of west Germany also placed a high bid. Mr Piers von Simson, who represents S.G. Warburg.

which has managed the sale of

property developer, formed a

consortium with Dresdner

Interhotel for the Trenhand. said that while the bids were very close, the deciding factor was likely to be the other conditions which the bidders were prepared to meet.

Nonetheless, the top bids represented a higher price -DM250,000 per room - than it would cost to complete a room in a newly-built four-star hotel. The winner of the contract will obtain the Grand Hotel in east Berlin, one of the most luxurious in Germany, in addition to 28 hotels of varying quality in east German cities. Four hotels in the Interhotel chain were excluded from the package and are to be sold individually. including the new Dom Hotel in east Berlin and the historic

Elephant Hotel in Weimar. One of the Treuhand's first steps last year was to revoke an operating contract between Internotel and the Steigenberger hotel group in west Germany. It virtually ensured that Steigenberger would have eained control of Interhotel for a modest initial investment.

#### **COMPANY NEWS IN BRIEF**

#### Court to examine Wagons-Lits case

THE BRUSSELS commercial court confirmed yesterday that it would examine on Friday minority shareholders' legal challenge to the FFr2.2bn (\$390m) bid for Wagons-Lits, the Franco-Belgian travel group, writes Andrew Hill in

Brussels. A group of disgruntled institutional investors is asking Accor, the French hotels group, for more information about its bid for Wagons-Lit. The summary proceedings will be the first of three separate court cases against Accor and Société Générale de Belgique, its partner in the

If Accor and SGB do not meet the investors' objections, the dissidents are likely to press for the offer to be increased from BFr8.650-ashare to BFr12,500, the price at which the two companies bought their 27 per cent stake in Wagons-Lits last year. Separately, the European Commission said yesterday it had begun a preliminary inquiry into the takeover.

The combined turnover of the companies involved crosses the threshold above which mergers have to be examined

The initial investigation will last a maximum of four weeks. After this, the Commission could decide to launch a fourmonth inquiry to examine in detail whether the merger is likely to hamper competition in the EC market.

Tabacalera. Spain's statecontrolled tobacco manufacturer and distributor, which is 33 per cent foreign-owned, has raised its third-quarter profits by 17.1 per cent to Pta17.1bn (\$168.5m), writes Tom Burns in

sale to foreign investors.

7,000 European employees, said the redundancies would be spread across France. Germany, the UK, Italy, the Netherlands and Portugal.

## Strong interest in Greek cement group sale

By Kerin Hope in Athens

SIX LEADING European cement-producers are showing interest in the sale of Heracles General Cement, the star attraction of Greece's privatisation programme.

The Industrial Reconstruction Organisation (IRO), the Greek privatisation umbrella, is offering its entire 69.8 per cent stake in the company, Europe's biggest cement exporter.

Another 15 to 17 per cent belongs to various state-controlled Greek banks, while the rest is listed on the Athens Stock Exchange and held by

local and foreign investors. IRO has opted for a trade sale rather than a sale through the Athens bourse, where Heracles is the third biggest listed

company, with a value of Dri35bn (\$720m). The government wants to speed up revenue collection from privatisation; officials hope the transaction will be completed

by March. Morgan Stanley International is financial adviser on the sale, together with Eteva, a public-sector Greek investment bank.

the world's largest cementmaker, and two big French producers. Lafarge Coppée and Ciments Français, are understood to be potential bidders. Ciments Français last year acquired Halyps Cement, the smallest of the four Greek

producers, and also owns sev-

eral Greek quarries. Other

It's always tempting to focus on reward. But you've got to keep an eye on risk.

After all, there's no reward without it.

There's risk in energy prices. Which could make investing in, say, a transportation company hugely rewarding. Or sadly disappointing.

There's risk in Latin America. And in Eastern Europe. But the opportunities there could be larger than those at home.

Everywhere you look, there's risk.

Managing risk—conventional and unconventional—is the single-minded mission of Bankers Trust.

As merchant bankers, we've honed our ability to help you uncover risk, analyse it, take it or shed it, profit by it.

No firm is better equipped to help you see and deal with global risk. With Bankers Trust beside you, you won't be flying blind.

Bankers Trust LEAD FROM STRENGTH.

# Hewlett-Packard boosted by higher US sales

By Louise Kehoe in San Francisco

HEWLETT-PACKARD, the US electronics group, reported stronger than expected fourthquarter operating results. boosted by improved sales in

Although special charges sharply reduced net earnings for the quarter, the group's share price rose, defying the stock market decline.

Fourth-quarter earnings were \$125m, or 50 cents a share, down from \$202m, or 83 cents, in the corresponding period last year.

The company took pre-tax charges of about \$150m, or approximately 40 cents a share. to cover the costs of voluntary severance programmes and related consolidation, relocation and facility expenses. Some 3,300 people, or about 3 per cent of the group's workforce, left the company.

Excluding the adjustment for special charges, net earnings grew hy around 12 per cent. which was at the high end of analyst's estimates. HP's stock price rose to \$47 % in morning trading, from a

Monday close of \$46%. Net revenues for the quarter were \$3.8bn, up about 7 per cent from \$3.6bn in the corresponding 1990 quarter. Net revenues in the US rose 11 per cent, while those outside the US increased by 4 per cent, reflecting weaker economic conditions in Europe.

"While we're concerned about the slowing of order growth internationally, we're 1,700 people.

### Profits slide to \$23.1m at Sea **Containers**

By Nikki Tait in New York

SEA CONTAINERS, the Bermuda-based containers and Sealink ferries group, reported a dip in after-tax profits to \$23.1m for the three months to

end-September. This compares with \$24.3m in the same period a year earlier. The company blamed the fall on losses by the group's cargo ships and some exceptional spending on container

repairs. Sea Containers claimed that its market share of the cross-Channel routes had increased from 15 per cent to 19 per cent, due to the introduction of two "SeaCats" on the Dover to Boulogne and Calais routes. Recession had affected ferry traffic, but prospects for 1992 looked brighter.

Orient-Express hotels fared better than in 1990, but Sea Containers warned that the US recession coupled with the political troubles in Yugoslavia affected business at its Hotel Cipriani in Venice.

#### Pathe quarterly report has no statements

By Karen Zagor in New York

PATHE Communications filed a quarterly report with the SEC which contained no financial statements, management discussion or analysis, writes Karen Zagor in New York. The company is waiting for

a Delaware court to rule on

whether Mr Giancarlo Par-retti, the Italian financier, will be reinstated as head of MGM-Pathe, the Hollywood studio acquired by Pathe last year. Pathe's chief financial officer, Mr Aurelio Germes, said: "We believe it is important and in the interest of our shareholders to make all necessary SEC filings, but we do not have control of, nor access to, the financial and account-

ing records of our subsidiary MGM-Pathe which are necessary in order to file a complete 10-Q [a quarterly reporting requirement]." Crédit Lyonnais, the French bank whose Dutch subsidiary has provided Pathe with more than \$1bn in loans and funds

related to MGM, ousted Mr

Parretti from the helm of MGM in April and essentially took control of the company. Mr Germes said it had sought assurances from Crédit Lyonnais Bank Nederland that funds would be made available to hire the necessary personnel to complete its 10-Q filings but that it had not received an

adequate response.

John Young: pleased with growth rate in US

For fiscal 1991, net earnings were \$755m, or \$3.02 a share compared with \$739m, or \$3.06, in 1990. Revenues rose 10 per cent to \$14.5bn, from \$13.2bn. Burr-Brown, the U. microelectronics group, expects to cut up to 20 per cent of its US workforce as part of a restructuring likely to result in substantial fourth-quarter charges, Reuter reports. Burr-Brown employs about

## Dayton Hudson margins squeezed

By Barbara Durr in Chicago

PRICE-CONSCIOUS consumers put heavy pressure on margins and drove down third-quarter results at Dayton Hudson, the Minneapolis based retailer. The company yesterday reported net earnings for the

period ended November 2 of \$35m, or 40 cents a share, down from \$58m, or 70 cents, a year Sales rose to \$3.96bn in the

third quarter, up 9 per cent from \$3.62bn last year. But Mr Kenneth Macke, the Dayton Hudson chairman, said ncreased sales did not offset the deteriorating margin rate in the highly promotional US

retailing climate. While the company's expense rates are declining and its inventories are in good shape. Mr Macke said he expected gross margins to remain under competitive pressures.

Dayton Hudson's Target chain, for example, has been fighting for market share against the highly successful Wal-Mart discount department

Operating profits for Target and Mervyn's, two of the three chains run by Dayton Hudson, declined in the third quarter, although operating profit at its more up-market department stores improved due to lower expenses rates.

For the first nine mouths, net earnings slipped to \$109m, or \$1.25 a share, compared with \$177m, or \$2.15, last year. Revenues in the first three quarters 10 per cent to \$10.9bn from \$9.9bn in

Dayton Hudson, which opened 32 stores during the third quarter, now operates 765 stores in 33 states.

In July, Toyota agreed with Volkswagen and its whollyowned Japanese unit Yolkswagen Audi Nippon, to sell VW and Audi cars from April 1992. Mitsubishi Motors, the car maker, plans to boost its purchases of US parts to \$1.4bn a year from April I 1994, AP-DJ reports from Tokyo. This will double the company's planned purchases of \$700m for the year to March 31 1992. Mitsubishi Heavy Industries (MHI) and trading house Mit-

subishi Corp, will launch joint ventures next month in Germany and the UK to sell MHI's printing machines, Reuter reports from Tokyo.

## THE DAVID THOMAS PRIZE

David Thomas was a Financial Times journalist killed on assignment in Kuwait in April 1991. Before joining the FT he had worked for, among others, the Trades Union Congress.

His life was characterised by original and radical thinking coupled with a search for new subjects and orthodoxies to challenge.

In his memory a prize has been established to provide an annual study/travel grant to enable the recipient to take a career break to explore a theme in the fields of industrial policy, third world development or the environment.

The theme for the 1992 prize, worth not less than £2,000, is: WHATWILLTHE COLLAPSE OF COMMUNISM DO TO THE ENVIRONMENT?

Applicants, aged 21-30, of any nationality and not in full time education, should submit 500 words in English on this subject, together with a brief c.v. and a proposal outlining how the award would be used to explore this theme further. The award winner will be required to write an essay 1500 to 2000 words in length at the end of the study period. The essay will be considered for publication in the Financial Times.

#### INTL. COMPANIES AND CAPITAL MARKETS

## O'Reilly spells out terms for Fairfax bid

By Tim Coone in Dublin

INDEPENDENT Newspapers, the Irish newspaper and publishing group, yesterday revealed details of the equity component of its A\$1.3bn (US\$1.02bn) takeover bid for Fairfax, the Australian newspaper group which went into receivership a year ago.

Under the offer, Independent would take 20 per cent control

would take 20 per cent control of Fairfax. The remaining 80 per cent would be placed in a public share offering in the first quarter of 1992, being fully underwritten by J.B. Were & Son, a leading Australian underwriter of equity

Independent newspapers intends to appoint only two directors to the board, Mr Tony O'Reilly, the chairman of Independent and the US Heinz food group, and Mr Liam Heally, Independent's chief

executive. A statement released by the company yesterday promised:
"The board of directors will be demonstrably Australian and independent of any shareholder group." Mr John Fairfax, who was deputy chairman of Fairfax until 1987 when his holding was bought out by his cousin, Mr Warwick Fairfax, would also be appointed to the

Independent faces rival bids from Tourang, a consortium led by Mr Kerry Packer and Mr Conrad Black, the propri-eter of the UK Daily Telegraph group, and AIN (Australian Independent Newspapers), a consortium of Australian

financial institutions. Tourang's bid has aroused concern in Australia over the concentration of media ownership as Mr Packer already holds 19 per cent of the Australia print media market as well as several TV stations. Fairfax, which prints the Sydney Morning Herald, The Age and the Australian Financial Review accounts for 12 per

cent of the market. For its part, the Independent bid has raised concern over foreign ownership of the Australian media, and which yesterday's statement by Independent was designed to address. Independent Newspapers also has a stake in Australian Provincial Newspapers, and controls it through additional holdings by Mr O'Reilly's Australian children.

The Pairfax receiver, Mr Des Nicholl, is expected to decide shortly whether Fairfax will be floated or sold to one of the

Fairfax went into receivership after it failed to honour payments on A\$1.3b of debts, including US\$450m in junk bonds, a result of a failed management buy-out led by Mr Warwick Fairfax in 1987.

#### Carolco poised for \$100m home video share deal

By Alan Friedman in Los Angeles and Karen Zagor in New York

CAROLCO Pictures, the loss-making independent Hollywood production company, is poised to acquire - for an estimated \$90m to \$100m in stock - the 46 per cent shareholding it does not already own in Live Entertainment, separately quoted home video distributor.

Carolco and Live Entertainment, which have been discussing the transaction for the past month, said yesterday that Carolco's board had agreed to swap about 2.5 shares of Carolco stock for each Live share. Live has about 12m shares outstanding, while Carolco has about

41.4m. The buy-out is part of a consolidation at the troubled company. Carolco has been suffering financially despite the success of its Terminator 2, an action film starring Arnold Schwarzenegger.

Live Entertainment is the sixth largest US home video distributor and also owns a chain of retail record shops in Massachusetts. The 46 per cent stake was spun off by Carolco when Live was quoted on the New York Stock Exchange in

the late 1980s. The buy-out of remaining shares in Live Entertainment would dilute the main Carolco shareholdings held by Mr Mario Kassar, Carolco chairman, as well as minority stakes held by Pioneer of Japan, Canal Plus of France and Rizzoli Corriere della Sera

of Italy. Live said yesterday that it expects the merger to take place in early 1992.

#### Decline at Benguet

BENGUET, the Philippines biggest gold producer, posted September 30 from 176.8m pesos, or 1.56 pesos, a year earlier, Reuter reports.

# UK bonds regain ground despite weakening pound

By Simon London in London and Patrick Harverson in New York

gained ground yesterday despite the weakness of sterling on the foreign exchange markets, which fuelled speculation about the need for higher interest rates to supp the UK currency.

Bond and futures prices by rose during the day. December gilt futures contra on Liffe closed at 95.10, from an opening level of 94.30. The benchmark 11% per cent government bond issue matur-ing 2003/2007 closed up 1/2 of a point on the day at 1132 for a yield of 9.70 per cent. Sterling fell below DM2.88 well below its DM2.95 central

rate within the European exchange rate mechanism and not far above its permitted floor of around DM2.86 While talk of a sterling crisis was seen as premature by analysts, the 1/2 point rise in French interest rates on Mon-

## GOVERNMENT

day to defend the franc has focused attention on stresses within the ERM.

Sentiment was buoyed by news that the Bank of England will auction £1.5bn 9 per cent conversion loan stock due 2011 on November 27. ■GERMAN government bonds

moved higher, rebounding from nervous trading on Monday which saw 10-year bunds fall by a 1/4-point. The December bund futures contract on the London Inter-

national Financial Futures Exchange closed at 86.24, up from an opening 86.05 and well above the day's low of 86.00. Traders reported overseas buying of bunds and switching out of some higher-yielding bond markets as investors

focused on the risk of devaluation of weaker European currencies. The Bundesbank council meets tomorrow, but analysts are not expecting further tightening of monetary conditions. Sentiment was buoyed by the result of the this week's Bundesbank repurchase operation, which was taken as a sign that the German authorities are not trying to squeeze interest rates higher.

■FRENCH government bonds were unchanged at the longer maturities following Monday's 'A-point fall in bond prices and 14-point rise in interest rates. The benchmark 9.5 per cent 10year bond was unchanged in late afternoon trading, yielding 8.81 per cent.

■ IN NEW YORK, all eyes were again on equities yesterday morning as short-term Treasury securities rose in the wake of another big fall in share prices. At midday, the benchmark 30-year bond fell % to 101%, yielding 7.874 per cent, but the

100%, pushing the yield down to 5.483 per cent. Trading activity was reported to be light. In the absence of any major economic news, bond traders moved prices in response to fresh losses in the equity markets. Hopes that investors who have sold stock holdings will move their money into short-term Treasury issues helped the short end of the market, particularly the five-year note which posted the biggest gain along the maturity

In the credit markets, the Federal Reserve intervened via \$1.5bn in customer repurchase agreements, aimed at putting downward pressure on the Fed funds rate. By midday, Fed funds were trading unchanged at 4% per cent.

JAPANESE government bond prices were stable in Tokyo trading, with the mar-ket taking little notice of volatility on world equity markets. The benchmark No 129 closed unchanged on a yield of 5.85 per cent, having fallen to 5.865 per cent during the day.

### Venezuela debt move threatens loan

two-year note climbed & to

SUSPENSION by Venezuela of its foreign currency debt may put in jeopardy a new loan from international banks. according to bankers, writes Stephen Fidler in Caracas. The new loan of about \$300m is scheduled for January as part of the debt restructuring agreed between Venezuela and its banks last year. Venezuela

payments on a small portion of compliance with its International Monetary Fund pro-

Some bankers say these waivers may not be forthcoming unless the non-payment issue is addressed. The debt in question, at least \$1.5bn, was issued to finance purchases of military equipment. The loans are controversial because of allegations that there was

because it has fallen out of over-invoicing to finance bribes to secure the contracts. Banks argue that the debt carries the explicit backing of the republic. The debt, excluded from the restructuring, is mainly held by banks but has also been traded in the secondary market.

Venezuela has no problem meeting the payments; its foreign reserves now exceed

needs waivers from the banks FT/AIBD INTERNATIONAL BOND SERVICE
